Administrator may modify the Councils’ recommendations using any of the measures that were not rejected by both Councils. After such review, NMFS shall publish a proposed rule in the Federal Register specifying a coastwide commercial quota and other measures necessary to assure that the F specified in paragraph (a) of this section will not be exceeded in any fishing year (May 1–April 30), for a period of 1–5 fishing years. After considering public comments, NMFS shall publish a final rule in the Federal Register to implement such a quota and other measures.

(e) [Reserved]

(f) Distribution of annual quota. (1) The annual quota specified according to the process outlined in paragraph (a) of this section shall be allocated between two semi-annual quota periods as follows: May 1 through October 31 (57.9 percent) and November 1 through April 30 (42.1 percent).

(2) All spiny dogfish landed for a commercial purpose in the states from Maine through Florida shall be applied against the applicable semi-annual commercial quota, regardless of where the spiny dogfish were harvested.

§ 648.231 Closures.

The Regional Administrator shall determine the date by which the quota for each semi-annual period described in §648.230(d)(1) will be harvested and shall close the EEZ to fishing for spiny dogfish on that date for the remainder of that semi-annual period by publishing a notification in the Federal Register. Upon the closure date and for the remainder of the semi-annual quota period, no vessel may fish for or possess spiny dogfish in the EEZ, nor may vessels issued a Federal permit purchase spiny dogfish from vessels issued a spiny dogfish permit under this part.

§ 648.232 Time Restrictions. [Reserved]

§ 648.233 Minimum Fish Sizes. [Reserved]

§ 648.234 Gear restrictions. [Reserved]

§ 648.235 Possession and landing restrictions.

(a) Quota Period 1. From May 1 through October 31, vessels issued a valid Federal spiny dogfish permit specified under §648.4(a)(11) may:

(1) Possess up to 3,000 lb (1.36 mt) of spiny dogfish per trip; and

(2) Land only one trip of spiny dogfish per calendar day.

(b) Quota Period 2. From November 1 through April 30, vessels issued a valid Federal spiny dogfish permit specified under §648.4(a)(11) may:

(1) Possess up to 3,000 lb (1.36 mt) of spiny dogfish per trip; and

(2) Land only one trip of spiny dogfish per calendar day.

(c) Regulations governing the harvest, possession, landing, purchase, and sale of shark fins are found at part 600, subpart N, of this chapter.

§ 648.236 Special Management Zones. [Reserved]

(a) Within season management action. The Councils may, at any time, initiate action to add or adjust management measures if they find that action is necessary to meet or be consistent with the goals and objectives of the Spiny Dogfish FMP.

(1) Adjustment process. After the Councils initiate a management action, they shall develop and analyze appropriate management actions over the span of at least two Council meetings. The Councils shall provide the public with advance notice of the availability of both the proposals and the analysis for comment prior to, and at, the second Council meeting. The Councils’ recommendation on adjustments or additions to management measures must come from one or more of the following
Fishery Conservation and Management

§ 648.237

categories: Minimum fish size; maximum fish size; gear requirements, restrictions or prohibitions (including, but not limited to, mesh size restrictions and net limits); regional gear restrictions; permitting restrictions and reporting requirements; recreational fishery measures (including possession and size limits and season and area restrictions); commercial season and area restrictions; commercial trip or possession limits; fin weight to spiny dogfish landing weight restrictions; on-board observer requirements; commercial quota system (including commercial quota allocation procedures and possible quota set-asides to mitigate bycatch, conduct scientific research, or for other purposes); recreational harvest limit; annual quota specification process; FMP Monitoring Committee composition and process; description and identification of essential fish habitat; description and identification of habitat areas of particular concern; overfishing definition and related thresholds and targets; regional season restrictions (including option to split seasons); restrictions on vessel size (length and GRT) or shaft horsepower; target quotas; measures to mitigate marine mammal entanglements and interactions; regional management; changes to the Northeast Region SBRM, including the CV-based performance standard, the means by which discard data are collected/obtained, fishery stratification, reports, and/or industry-funded observers or observer set-aside program; any other management measures currently included in the Spiny Dogfish FMP; and measures to regulate aquaculture projects.

(2) Councils' recommendation. After developing management actions and receiving public testimony, the Councils shall make a recommendation approved by a majority of each Council's members, present and voting, to the Regional Administrator. The Councils' recommendation must include supporting rationale, an analysis of impacts and, if management measures are recommended, a recommendation to the Regional Administrator on whether to issue the management measures as a final rule. If the Councils recommend that the management measures should be issued as a final rule, they must consider at least the following factors and provide support and analysis for each factor considered:

(i) Whether the availability of data on which the recommended management measures are based allows for adequate time to publish a proposed rule and whether regulations have to be in place for an entire harvest/fishing season.

(ii) Whether there has been adequate notice and opportunity for participation by the public and members of the affected industry in the development of the Councils' recommended management measures.

(iii) Whether there is an immediate need to protect the resource.

(iv) Whether there will be a continuing evaluation of management measures adopted following their implementation as a final rule.

(3) NMFS action. If the Councils' recommendation includes adjustments or additions to management measures and:

(i) If NMFS concurs with the Councils' recommended management measures and determines that the recommended management measures should be issued as a final rule based on the factors specified in paragraph (b)(2) of this section, then the measures will be issued as a final rule in the FEDERAL REGISTER.

(ii) If NMFS concurs with the Councils' recommendation and determines that the recommended management measures should be published first as a proposed rule, then the measures will be published as a proposed rule in the FEDERAL REGISTER. After additional public comment, if NMFS concurs with the Councils' recommendation, then the measures will be issued as a final rule in the FEDERAL REGISTER.

(iii) If NMFS does not concur, the Councils will be notified in writing of the reasons for the non-concurrence.

(b) Emergency action. Nothing in this section is meant to derogate from the authority of the Secretary to take
emergency action under section 305(e) of the Magnuson-Stevens Act.

Subpart M—Management Measures for the Atlantic Deep-Sea Red Crab Fishery

SOURCE: 67 FR 63233, Oct. 10, 2002, unless otherwise noted.

§ 648.260 Specifications.

(a) Process for setting specifications. The Council’s Red Crab Plan Development Team (PDT) shall prepare a Stock Evaluation and Assessment (SAFE) Report at least every 3 years. Based on the SAFE Report, the PDT shall develop and present to the Council recommended specifications as defined in this paragraph (a) for up to 3 fishing years. The PDT shall meet at least once annually during the intervening years between SAFE Reports to review the status of the stock and the fishery. Based on such review, the PDT shall provide a report to the Council on any changes or new information about the red crab stock and/or fishery, and it shall recommend whether the specifications for the upcoming years need to be modified. The annual review shall be limited in scope and shall concentrate on the most recent fishery-dependent information including, but not limited to, days-at-sea (DAS) used and red crab landings. In the event that the PDT recommends an adjustment to the specifications, the PDT shall prepare a supplemental specifications package for a specific time duration up to 3 years. Specifications include the specification of OY, the setting of any target TACs, allocation of DAS, and/or adjustments to trip/possession limits.

(1) Target total allowable catch. The target TAC for each fishing year will be 3.910 million lb (1,775 mt), unless modified pursuant to this paragraph.

(2) Adjustments to DAS allocation based on target TAC. For purposes of determining the appropriate DAS allocation, any overage of the target TAC that occurs in a given fishing year will be subtracted from the target TAC in the following fishing year and, conversely, any underage of the target TAC that occurs in a given fishing year will be added to the target TAC in the following fishing year.

(3) In-season adjustments. The specifications established pursuant to this section may be adjusted by NMFS, after consulting with the Council, during the fishing year by publishing notification in the FEDERAL REGISTER stating the reasons for such action and providing an opportunity for prior public comment. Any adjustments must be consistent with the Atlantic Deep-Sea Red Crab FMP objectives and other FMP provisions.

(b) Development of specifications. In developing the management measures and specifications, the PDT shall review at least the following data, if available: Commercial catch data; current estimates of fishing mortality and catch-per-unit-effort (CPUE); discards; stock status; recent estimates of recruitment; virtual population analysis results and other estimates of stock size; sea sampling, port sampling, and survey data or, if sea sampling data are unavailable, length frequency information from port sampling and/or surveys; impact of other fisheries on the mortality of red crabs; and any other relevant information.

(1) The PDT, after its review of the available information on the status of the stock and the fishery, may recommend to the Council any measures necessary to assure that the specifications will not be exceeded, as well as changes to the appropriate specifications.

(2) The Council shall review these recommendations and any public comment received and shall submit its recommendation to the Regional Administrator after at least one Council meeting. If the Council submits a recommendation to the Regional Administrator after one Council meeting and the Regional Administrator concurs with the recommendation, the Regional Administrator shall publish the Council’s recommendation in the FEDERAL REGISTER as a proposed rule unless there is adequate justification to waive prior notice and comment. The Council may instead choose to follow the framework adjustment process specified at §648.261 and request that the Regional Administrator publish the
