

§ 648.97

50 CFR Ch. VI (10–1–10 Edition)

measures are recommended, an analysis of impacts and a recommendation to the Regional Administrator on whether to issue the management measures as a final rule. If the Councils recommend that the management measures should be issued as a final rule, the Councils must consider at least the following four factors and provide support and analysis for each factor considered:

(A) Whether the availability of data on which the recommended management measures are based allows for adequate time to publish a proposed rule, and whether regulations have to be in place for an entire harvest/fishing season;

(B) Whether there has been adequate notice and opportunity for participation by the public and members of the affected industry in the development of the Councils' recommended management measures;

(C) Whether there is an immediate need to protect the resource or to impose management measures to resolve gear conflicts; and

(D) Whether there will be a continuing evaluation of management measures adopted following their implementation as a final rule.

(ii) *Action by NMFS.* (A) If the Regional Administrator approves the Councils' recommended management measures and determines that the recommended management measures should be issued as a final rule based on the factors specified in paragraph (c)(3)(i) of this section, the Secretary may, for good cause found under the standard of the Administrative Procedure Act, waive the requirement for a proposed rule and opportunity for public comment in the FEDERAL REGISTER. The Secretary, in so doing, shall publish only the final rule. Submission of the recommendations does not preclude the Secretary from deciding to provide additional opportunity for prior notice and comment in the FEDERAL REGISTER.

(B) If the Regional Administrator concurs with the Councils' recommendation and determines that the recommended management measures should be published first as a proposed rule, then the measures shall be published as a proposed rule in the FED-

ERAL REGISTER. After additional public comment, if NMFS concurs with the Councils' recommendation, then the measures shall be issued as a final rule in the FEDERAL REGISTER.

(C) If the Regional Administrator does not concur, then the Councils shall be notified in writing of the reasons for the non-concurrence.

(iii) *Adjustments for gear conflicts.* The Councils may develop a recommendation on measures to address gear conflict as defined under §600.10 of this chapter, in accordance with the procedure specified in §648.55(d) and (e).

(d) *Emergency action.* Nothing in this section is meant to derogate from the authority of the Secretary to take emergency action under section 305(c) of the Magnuson-Stevens Act.

§ 648.97 Closed areas.

(a) *Oceanographer Canyon Closed Area.* No fishing vessel or person on a fishing vessel may enter, fish, or be in the area known as Oceanographer Canyon Closed Area (copies of a chart depicting this area are available from the Regional Administrator upon request), as defined by straight lines connecting the following points in the order stated, while on a monkfish DAS:

OCEANOGRAPHER CANYON CLOSED AREA

Point	N. Lat.	W. Long.
(1) OC1	40°10'	68°12'
(2) OC2	40°24'	68°09'
(3) OC3	40°24'	68°08'
(4) OC4	40°10'	67°59'
(5) OC1	40°10'	68°12'

(b) *Lydonia Canyon Closed Area.* No fishing vessel or person on a fishing vessel may enter, fish, or be in the area known as Lydonia Canyon Closed Area (copies of a chart depicting this area are available from the Regional Administrator upon request), as defined by straight lines connecting the following points in the order stated, while on a monkfish DAS:

Fishery Conservation and Management

[70 FR 21946, Apr. 28, 2005]

Subpart G—Management Measures for the Summer Flounder Fisheries

§ 648.100 Catch quotas and other restrictions.

(a) *Review.* The Summer Flounder Monitoring Committee shall review each year the following data, subject to availability, unless a TAL has already been established for the upcoming calendar year as part of a multiple-year specification process, provided that new information does not require a modification to the multiple-year quotas, to determine the annual allowable levels of fishing and other restrictions necessary to achieve, with at least a 50-percent probability of success, a fishing mortality rate (F) that produces the maximum yield per recruit (F_{max}): Commercial, recreational, and research catch data; current estimates of fishing mortality; stock status; recent estimates of recruitment; virtual population analysis results; levels of noncompliance by fishermen or individual states; impact of size/mesh regulations; discards; sea sampling and winter trawl survey data or, if sea sampling data are unavailable, length frequency information from the winter trawl survey and mesh selectivity analyses; impact of gear other than otter trawls on the mortality of summer flounder; and any other relevant information.

(b) *Recommended measures on an annual basis.* Based on this review and requests for research quota as described in paragraph (f) of this section, the Summer Flounder Monitoring Committee shall recommend to the Demersal Species Committee of the MAFMC and the Commission the following measures to ensure, with at least a 50-percent probability of suc-

cess, that the F specified in paragraph (a) of this section will not be exceeded:

(1) Research quota set from a range of 0 to 3 percent of the maximum allowed to achieve the specified F.

(2) Commercial quota set from a range of 0 to the maximum allowed to achieve the specified F, set after reductions for research quota.

(3) Commercial minimum fish size.

(4) Minimum mesh size.

(5) Recreational possession limit set from a range of 0 to 15 summer flounder to achieve the specified F, set after reductions for research quota.

(6) Recreational minimum fish size.

(7) Recreational season.

(8) Recreational state conservation equivalent and precautionary default measures utilizing possession limits, minimum fish sizes, and/or seasons set after reductions for research quota.

(9) Restrictions on gear other than otter trawls.

(10) Adjustments to the exempted area boundary and season specified in § 648.104(b)(1) by 30-minute intervals of latitude and longitude and 2-week intervals, respectively, based on data specified in paragraph (a) of this section, to prevent discarding of sublegal sized summer flounder in excess of 10 percent, by weight.

(11) Total allowable landings on an annual basis for a period not to exceed 3 years.

(12) Changes, as appropriate, to the Northeast Region SBRM, including the CV-based performance standard, fishery stratification, and/or reports.

(c) *Fishing measures.* The Demersal Species Committee shall review the recommendations of the Summer Flounder Monitoring Committee. Based on these recommendations and any public comment, the Demersal Species Committee shall recommend to the MAFMC measures necessary to ensure, with at least a 50-percent probability of success, that the applicable specified F will not be exceeded. The MAFMC shall review these recommendations and, based on the recommendations and any public comment, recommend to the Regional Administrator measures necessary to ensure, with at least a 50-percent probability of success, that the applicable specified F will not be exceeded. The
