be submitted to PIRO as described in §665.13. If the application for a limited access permit is submitted on behalf of a partnership or corporation, the application must be accompanied by a supplementary information sheet obtained from PIRO and contain the names and mailing addresses of all partners or shareholders and their respective percentage of ownership in the partnership or corporation.

§ 665.143 Prohibitions.
In addition to the general prohibitions specified in §600.725 of this chapter and §665.15, in Crustacean Permit Area 3, it is unlawful for any person to fish for, take, or retain deepwater shrimp without a permit issued under §665.142.

§ 665.144 Notifications.
(a) The operator of any vessel fishing subject to the requirements of this subpart must:
(1) Report, not less than 24 hours, but not more than 36 hours, before landing, the port, the approximate date and the approximate time at which spiny and slipper lobsters will be landed.
(2) Report, not less than 6 hours and not more than 12 hours before off-loading, the location and time that off-loading of spiny and slipper lobsters will begin.
(b) The Regional Administrator will notify permit holders of any change in the reporting method and schedule required in paragraphs (a)(1) and (a)(2) of this section at least 30 days prior to the opening of the fishing season.

§ 665.145 At-sea observer coverage.
All fishing vessels subject to §§665.140 through 665.145 and subpart A of this part must carry an observer when requested to do so by the Regional Administrator.

§§ 665.146–665.159 [Reserved]

§ 665.160 American Samoa precious coral fisheries. [Reserved]

§ 665.161 Definitions.
As used in §§665.160 through 665.169:
American Samoa precious coral management unit species (American Samoa precious coral MUS) means any coral of the genus *Corallium* in addition to the following species of corals:

<table>
<thead>
<tr>
<th>Local name</th>
<th>English common name</th>
<th>Scientific name</th>
</tr>
</thead>
<tbody>
<tr>
<td>Amu piniki-mumu.</td>
<td>Pink coral (also known as red coral).</td>

</tbody>
</table>

American Samoa precious coral permit area means the area encompassing the precious coral beds within the U.S. EEZ around American Samoa. Each bed is designated by a permit area code and assigned to one of the following four categories:
(1) Established beds. [Reserved]
(2) Conditional beds. [Reserved]
(3) Refugia. [Reserved]
(4) Exploratory Area. Permit Area X–P–AS includes all coral beds, other than established beds, conditional beds, or refugia, in the EEZ seaward of American Samoa.

§ 665.162 Permits.
(a) Any vessel of the United States fishing for, taking, or retaining American Samoa precious coral MUS in any American Samoa precious coral permit area must have a permit issued under §665.13.
(b) Each permit will be valid for fishing only in the permit area specified on the permit. Precious Coral Permit Areas are defined in §665.161.
(c) No more than one permit will be valid for any one vessel at any one time.
(d) No more than one permit will be valid for any one person at any one time.
(e) The holder of a valid permit to fish one permit area may obtain a permit to fish another permit area only upon surrendering to the Regional Administrator any current permit for the precious coral fishery issued under §665.13.
(f) General requirements governing application information, issuance, fees,
expiration, replacement, transfer, alteration, display, sanctions, and appeals for permits for the precious coral fishery are contained in § 665.13.

§ 665.163 Prohibitions.

In addition to the general prohibitions specified in § 600.725 of this chapter and in § 665.15, it is unlawful for any person to:

(a) Use any vessel to fish for, take, retain, possess or land precious coral in any precious coral permit area, unless a permit has been issued for that vessel and area as specified in § 665.13 and that permit is on board the vessel.

(b) Fish for, take, or retain any species of American Samoa precious coral MUS in any precious coral permit area:

(1) By means of gear or methods prohibited by § 665.164.

(2) In refugia specified in § 665.161.

(3) In a bed for which the quota specified in § 665.167 has been attained.

(4) In violation of any permit issued under § 665.13 or § 665.17.

(c) Take and retain, possess, or land any live pink coral or live black coral from any precious coral permit area that is less than the minimum height specified in § 665.165 unless:

(1) A valid EFP was issued under § 665.17 for the vessel and the vessel was operating under the terms of the permit; or

(2) The coral originated outside coral beds listed in this paragraph, and this can be demonstrated through receipts of purchase, invoices, or other documentation.

§ 665.164 Gear restrictions.

Only selective gear may be used to harvest coral from any precious coral permit area.

§ 665.165 Size restrictions.

The height of a live coral specimen shall be determined by a straight line measurement taken from its base to its most distal extremity. The stem diameter of a living coral specimen shall be determined by measuring the greatest diameter of the stem at a point no less than 1 inch (2.54 cm) from the top surface of the living holdfast.

(a) Live pink coral harvested from any precious coral permit area must have attained a minimum height of 10 inches (25.4 cm).

(b) Black coral. Live black coral harvested from any precious coral permit area must have attained either a minimum stem diameter of 1 inch (2.54 cm), or a minimum height of 48 inches (122 cm).

§ 665.166 Closures.

(a) If the Regional Administrator determines that the harvest quota for any coral bed will be reached prior to the end of the fishing year, NMFS shall publish a notice to that effect in the Federal Register and shall use other means to notify permit holders. Any such notice must indicate the reason for the closure, the bed being closed, and the effective date of the closure.

(b) A closure is also effective for a permit holder upon the permit holder’s actual harvest of the applicable quota.

§ 665.167 Quotas.

(a) General. The quotas limiting the amount of precious coral that may be taken in any precious coral permit area during the fishing year are listed in § 665.167(d). Only live coral is counted toward the quota. The accounting period for all quotas begins July 1, 1983.

(b) Conditional bed closure. A conditional bed will be closed to all non-selective coral harvesting after the quota for one species of coral has been taken.

(c) Reserves and reserve release. The quotas for exploratory area X-P-AS will be held in reserve for harvest by vessels of the United States in the following manner:

(1) At the start of the fishing year, the reserve for the American Samoa exploratory area will equal the quota minus the estimated domestic annual harvest for that year.

(2) As soon as practicable after December 31 each year, the Regional Administrator will determine the amount harvested by vessels of the United States between July 1 and December 31 of the year that just ended on December 31.

(3) NMFS will release to TALFF an amount of precious coral for each exploratory area equal to the quota.
