section is prohibited from directed fishing in any groundfish fishery in the GOA and adjacent waters open by the State of Alaska for which it adopts the applicable Federal fishing season for that species (except sablefish harvested under the IFQ Program) from July 1 through July 14 of each year if that vessel has not participated in that directed groundfish fishery in any two years from 1996 through 2002 during the following time periods:

(A) June 30, 1996 through July 6, 1996;
(B) June 29, 1997 through July 5, 1997;
(C) June 28, 1998 through July 4, 1998;
(D) July 4, 1999 through July 10, 1999;
(E) July 8, 2000 through July 15, 2000;
(F) July 1, 2001 through July 7, 2001; and
(G) June 30, 2002 through July 6, 2002.

(ii) For purposes of this paragraph (h), participation in a fishery in Statistical Area 650 during a time period specified in paragraph (h)(4)(i) of this section shall be considered as participation in that same fishery in Statistical Area 640 during that time period.

§ 679.83 Rockfish Program entry level fishery.

(a) Rockfish entry level fishery—(1) General. A rockfish entry level harvester and rockfish entry level processor may participate in the rockfish entry level fishery as follows:

(i) Trawl catcher vessels. Trawl catcher vessels participating in the rockfish entry level fishery may collectively harvest, prior to September 1, an amount not greater than 50 percent of the total allocation to the rockfish entry level fishery as calculated under §679.81(a)(2). Allocations to trawl catcher vessels shall be made first from the allocation of Pacific ocean perch available to the rockfish entry level fishery. If the amount of Pacific ocean perch available for allocation is less than the total allocation allowable for trawl catcher vessels in the rockfish entry level fishery, then northern rockfish and pelagic shelf rockfish shall be allocated to trawl catcher vessels.

(ii) Longline gear vessels. Longline gear vessels participating in the rockfish entry level fishery may collectively harvest, prior to September 1, an amount not greater than 50 percent of the total allocation to the rockfish entry level fishery as calculated under §679.81(a)(2). Allocations of Pacific ocean perch, northern rockfish, and pelagic shelf rockfish to longline gear vessels shall be made after the allocation to trawl catcher vessels.

(iii) Secondary species allocations. Secondary species shall not be allocated to the rockfish entry level fishery. Secondary species shall be managed based on a MRA for the target species as described in Table 10 to this part.

(iv) Halibut PSC allocations—trawl vessels. Halibut PSC from trawl vessels in the rockfish entry level fishery shall be accounted against the allocation to the deep water species fishery complex for that seasonal apportionment. If the Halibut PSC allocation in the deep water fishery complex has been achieved or exceeded for that seasonal apportionment, the rockfish entry level fishery for trawl vessels will be closed until deep water species fishery complex halibut PSC is available.

(v) Halibut PSC allocations—longline gear vessels. Halibut PSC from longline gear vessels in the rockfish entry level fishery shall be accounted against the allocation to the other non-trawl fishery category for that seasonal apportionment. If the Halibut PSC allocation in the other non-trawl fishery category has been reached or exceeded for that seasonal apportionment, the rockfish entry level fishery for longline gear vessels will be closed until deep water species fishery complex halibut PSC is available.

(2) Reallocation among trawl and longline gear vessels. Any allocation of Pacific ocean perch, northern rockfish, or pelagic shelf rockfish that has not been harvested by 1200 hours, A.l.t. on September 1, may be harvested by either trawl or longline gear vessels in the rockfish entry level fishery.

(3) Opening of the rockfish entry level fishery. The Regional Administrator maintains the authority to not open the rockfish entry level fishery if he deems it appropriate for conservation or other management measures. Factors such as the total allocation, anticipated harvest rates, and number of
participants will be considered in making any such decision.

(b) [Reserved]

[71 FR 67252, Nov. 20, 2006, as amended at 72 FR 37681, July 11, 2007]

§ 679.84 Rockfish Program record-keeping, permits, monitoring, and catch accounting.

(a) Recordkeeping and reporting. See § 679.5(r).

(b) Permits. See § 679.4(n).

(c) Catch monitoring requirements for catcher/processors assigned to a rockfish cooperative or rockfish limited access fishery. The requirements under paragraphs (c)(1) through (9) of this section apply to any catcher/processor vessel participating in a rockfish cooperative or the rockfish limited access fishery, and that is subject to a sideboard limit as described in this section. At all times when a vessel has groundfish on-board that were harvested under a CQ permit that were harvested during a rockfish limited access fishery, or that were harvested by a vessel subject to a sideboard limit as described under § 679.82(d) through (g), as applicable, the vessel owner or operator must ensure that:

(1) Catch weighing. All groundfish are weighed on a NMFS-approved scale in compliance with the scale requirements at § 679.28(b). Each haul must be weighed separately and all catch must be made available for sampling by a NMFS-certified observer.

(2) Observer sampling station. An observer sampling station meeting the requirements at § 679.28(d) is available at all times.

(3) Observer coverage requirements. The vessel is in compliance with the observer coverage requirements described at § 679.50(c)(7)(i).

(4) Operational line. The vessel has no more than one operational line or other conveyance for the mechanized movement of catch between the scale used to weigh total catch and the location where the observer collects species composition samples.

(5) Fish on deck. No fish are allowed to remain on deck unless an observer is present, except for fish inside the codend and fish accidentally spilled from the codend during hauling and dumping. Fish accidentally spilled from the codend must be moved to the fish bin.

(6) Sample storage. The vessel owner or operator provides sufficient space to accommodate a minimum of 10 observer sampling baskets. This space must be within or adjacent to the observer sample station.

(7) Pre-cruise meeting. The Observer Program Office is notified by phone at 1-907-271-1702 at least 24 hours prior to departure when the vessel will be carrying an observer who had not previously been deployed on that vessel within the last 12 months. Subsequent to the vessel’s departure notification, but prior to departure, NMFS may contact the vessel to arrange for a pre-cruise meeting. The pre-cruise meeting must minimally include the vessel operator or manager, and any observers assigned to the vessel.

(8) Belt and flow operations. The vessel operator stops the flow of fish and clear all belts between the bin doors and the area where the observer collects samples of unsorted catch when requested to do so by the observer.

(9) Vessel crew in tanks or bins. The vessel owner or operator must comply with the bin monitoring standards specified in § 679.28(i).

(d) Catch monitoring requirements for catcher/processors assigned to the opt-out fishery. At all times any catcher/processor vessel assigned to the opt-out fishery has groundfish onboard that vessel that were harvested subject to a sideboard limit as described under § 679.82(d) through (g), as applicable, the vessel owner or operator must ensure catch from an individual haul is not mixed with catch from another haul prior to sampling by a NMFS-certified observer, that all catch be made available for sampling by a NMFS-certified observer, and that the requirements in paragraphs (c)(3), (4), (5), (8), and (9) of this section are met.

(e) Catch monitoring requirements for catcher vessels. The owner or operator of a catcher vessel must ensure the vessel complies with the observer coverage requirements described at § 679.50(c)(7)(ii) at all times the vessel is participating in a rockfish cooperative, rockfish limited access fishery, or rockfish sideboard fishery described in this section.
