conditions. If the soil on the comparison site could not produce an agricultural commodity under natural conditions, the subject wetland will be considered to be converted wetland.

(2) Where woody hydrophytic vegetation has been removed from hydric soils for the purpose of or permitting the production of an agricultural commodity, the area will be considered to be converted wetland.

(b) A wetland shall not be considered to be converted if:

(1) Production of an agricultural commodity on such land is possible as a result of a natural condition, such as drought, and it is determined that the actions of the person producing such agricultural commodity do not permanently alter or destroy natural wetland characteristics. Destruction of herbaceous hydrophytic vegetation (i.e., plants other than woody shrubs or trees) as a result of the production of an agricultural commodity shall not be considered as altering or destroying natural wetland characteristic if such vegetation could return following cessation of the natural condition which made production of the agricultural commodity possible; or

(2) Such land is correctly identified as farmed wetland or farmed-wetland pasture.

§ 12.33 Use of wetland and converted wetland.

(a) The provisions of §12.32(b)(2) are intended to protect remaining functions and values of the wetlands described therein. Persons may continue to farm such wetlands under natural conditions or as they did prior to December 23, 1985. However, no action can be taken to increase effects on the water regime beyond that which existed on such lands on or before December 23, 1985, unless NRCS determines the effect on losing remaining wetland values would be minimal under §12.35(b)(1)(v). If, after December 23, 1985, changes due to human activity occurred in the watershed and resulted in an increase in the water regime on a person’s land, the person may be allowed to adjust the existing drainage system to accommodate the increased water regime on the condition that the person affected by this additional water provides NRCS with appropriate documentation of the increased water regime, the causes thereof, and the planned changes in the existing drainage system. In order to maintain program eligibility, a person must provide sufficient documentation and receive approval from NRCS prior to making any changes that will have the effect of increasing the capacity of the existing drainage systems.

(b) Unless otherwise provided in this part, the production of an agricultural commodity on land determined by NRCS to be prior-converted cropland is exempted by law from these regulations for the area which was converted. Maintenance or improvement of drainage systems on prior-converted croplands are not subject to this rule so long as the prior-converted croplands are used for the production of food, forage, or fiber and as long as such actions do not alter the hydrology of nearby wetlands or do not make possible the production of an agricultural commodity on these other wetlands. Other wetlands under this section means any natural wetland, farmed wetland, farmed-wetland pasture, or any converted wetland that is not exempt under §12.5 of this part.

(c) Abandonment is the cessation for five consecutive years of management or maintenance operations related to the use of a farmed wetland or a farmed-wetland pasture. Unless the criteria for receiving an exemption under §12.5(b)(1)(iii) are met, such land is considered to be abandoned when the land meets the wetland criteria of §12.31. In order for documentation of site conditions to be considered adequate under §12.5(b)(1)(iii), the affected person must provide to NRCS available information concerning the extent of hydrological manipulation, the extent of woody vegetation, and the history of use. In accordance with §12.5(b)(1)(iii), participation in a USDA approved wetland restoration, set-aside, diverted acres, or similar programs shall not be deemed to constitute abandonment.

(d) The maintenance of the drainage capacity or any alteration or manipulation, including the maintenance of a natural waterway operated and maintained as a drainage outlet, that affects the circulation and flow of water.
made to a farmed wetland or farmed-wetland pasture would not cause a person to be determined to be ineligible under this part, provided that the maintenance does not exceed the scope and effect of the original alteration or manipulation, as determined by NRCS, and provided that the area is not abandoned. Any resultant conversion of wetlands is to be at the minimum extent practicable, as determined by NRCS.

§ 12.34 Paperwork Reduction Act assigned number.

The information collection requirements contained in this regulation (7 CFR part 12) have been approved by the Office of Management and Budget under provisions of 44 U.S.C. chapter 35 and have been assigned OMB Number 0560–0004.

PART 13 [RESERVED]

PART 14—DETERMINING THE PRIMARY PURPOSE OF CERTAIN PAYMENTS FOR FEDERAL TAX PURPOSES

Sec.
14.1 Purpose.
14.2 Applicability.
14.3 Objective.
14.4 Policy.
14.5 Procedure.
14.6 Criteria for determining the primary purpose of payments with respect to potential exclusion from gross income.
14.7 Non-Federal programs and payments.

SOURCE: 45 FR 58507, Sept. 4, 1980, unless otherwise noted.

§ 14.1 Purpose.

(a) Part 14 sets forth criteria to be used by the Secretary of Agriculture in determining the primary purpose of certain payments received by persons under applicable programs. Determining the primary purpose for which applicable payments are made is one step toward the exclusion of all or part of the payments from gross income for Federal income tax purposes.

(b) The criteria set forth in part 14 apply only to the determinations to be made by the Secretary of Agriculture.

§ 14.2 Applicability.

(a) Part 14 applies only to payments received under the programs listed in paragraphs (a)(1) through (10) of this section. Payments received under programs not listed in paragraphs (a)(1) through (10) of this section, are not considered eligible for exclusion from gross income under this part.

(1) The rural clean water program authorized by section 208(j) of the Federal Water Pollution Control Act (33 U.S.C. 1288(j)).

(3) The water bank program authorized by the Water Bank Act (16 U.S.C. 1301 et seq.).

(6) The Great Plains conservation program authorized by section 16 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590p(b)).

(9) Any small watershed program administered by the Secretary of Agriculture that is determined by the Secretary of the Treasury or his delegate to be substantially similar to the type of programs described in paragraphs (a)(1) through (8) of this section.

(10) Any program of a State, a possession of the United States, a political subdivision of a State or a possession of the United States, the District of Columbia, or a combination of any of the foregoing under which payments
