§ 1220.302 Exemption.

(a) A producer who operates under an approved National Organic Program (NOP) (7 CFR part 205) system plan; produces only products that are eligible to be labeled as 100 percent organic under the NOP, except as provided for in paragraph (g) of this section; and is not a split operation shall be exempt from the payment of assessments.

(b) To apply for an exemption under this section, the producer shall submit the request to the Board or other party as designated by the Board—on a form provided by the Board—at any time initially and annually thereafter on or before January 1 as long as the producer continues to be eligible for the exemption.

(c) The request shall include the following: the producer's name and address, a copy of the organic farm or organic handling operation certificate provided by a USDA-accredited certifying agent as defined in section 2103 of the Organic Foods Production Act of 1990 (7 U.S.C. 6502), a signed certification that the applicant meets all of the requirements specified for an assessment exemption, and such other information as may be required by the Board under the provisions of this subpart. Upon termination of this subpart, §1220.251 shall apply to determine disposition of all such property.
