

§ 1437.303 Aquaculture, including ornamental fish.

(a) Aquaculture is a value loss crop and is compensable only in accord with restrictions set in this section. Eligible aquacultural species shall only include:

(1) Any species of aquatic organisms grown as food for human consumption as determined by CCC.

(2) Fish raised as feed for other fish that are consumed by humans; and

(3) Ornamental fish propagated and reared in an aquatic medium.

(b) The aquacultural facility must be:

(1) A commercial enterprise on private property;

(2) Owned or leased by the producer, with readily identifiable boundaries; and

(3) Managed and maintained using good aquacultural growing practices.

(c) Producers must:

(1) Ensure adequate and proper flood prevention, growing medium, fertilization or feeding, irrigation and water quality, predator control, and disease control; and

(2) Have control of the waterbed.

(d) Eligible aquacultural species must be:

(1) Placed in the facility and not be indigenous to the facility; and

(2) Kept in a controlled environment; and

(3) Planted or seeded in containers, wire baskets, net pens, or similar device designed for the protection and containment of the seeded aquacultural species.

(e) In the crop year in which a notice of loss is filed, producers may be required, at the discretion of CCC, to provide evidence that the aquacultural species are produced in a facility in accordance with paragraphs (b), (c) and (d) of this section.

§ 1437.304 Floriculture.

(a) Floriculture, except for seed crops as specified in paragraph (d) of this section, is a value loss crop and is compensable only in accord with restrictions set in this section. Eligible floriculture shall be limited to commercial production of:

(1) Field-grown flowers, including flowers grown in containers or other growing medium maintained in a field

setting according to industry standards, as determined by CCC; and

(2) Tubers and bulbs, for use as propagation stock of eligible floriculture plants; and

(3) Seed for propagation of eligible floriculture plants.

(b) Floriculture does not include flowering plants indigenous to the location of the floriculture facility or acreage.

(c) Eligible floriculture must be grown in a region or controlled environment conducive to the successful production of flowers, tubers, and bulbs, as determined by CCC.

(d) Claims on losses on the production of flower seed for propagation of eligible floriculture plants will not be treated under "value loss" rules, but under the rules for normal production low yield crops under subpart B of this part.

(e) The facility or acreage for eligible floriculture must be managed and maintained using good floriculture growing practices. At a minimum, producers are responsible for providing a controlled environment and must ensure adequate and proper fertilization, irrigation, weed control, insect and disease control, and rodent and wildlife control.

(f) In the crop year in which a notice of loss is filed, producers may be required, at the discretion of CCC, to provide evidence the floriculture is produced in accordance with paragraph (e) of this section.

(g) Flowers having any dollar value shall be counted as having full value for loss calculations. Damaged plants that are determined able to rejuvenate or determined to be merely stunted shall be counted as worth full value.

§ 1437.305 Ornamental nursery.

(a) Eligible ornamental nursery stock is a value loss crop and is compensable only in accord with restrictions set out in this section. Eligible ornamental nursery stock is limited to field-grown and containerized decorative plants grown in a controlled environment for commercial sale.

(b) The property upon which the nursery stock is located must be owned or leased by the producer.

§ 1437.306

7 CFR Ch. XIV (1-1-10 Edition)

(c) The eligible nursery stock must be placed in the ornamental nursery facility and not be indigenous to the facility.

(d) The facility must be managed and cared for using good nursery growing practices for the geographical region. At a minimum producers must provide a controlled environment and ensure adequate and proper flood prevention, growing medium, fertilization, irrigation, insect and disease control, weed control, rodent and wildlife control, and over-winterization storage facilities.

(e) An ornamental plant having any value as an ornamental plant, or a damaged ornamental plant that may rejuvenate and re-establish value as an ornamental plant, shall be considered as worth full value based on the age or size of the plant at the time of disaster.

(f) In the crop year in which a notice of loss is filed, producers may be required, at the discretion of CCC, to provide evidence the ornamental nursery is maintained in accordance with this section.

§ 1437.306 Christmas tree crops.

(a) A Christmas tree is a value loss crop and may generate a claim for benefits under this part only if the tree was grown exclusively for commercial use as a Christmas tree, and only if other requirements of this section are met.

(b) The unit of measure for all Christmas tree crops is a plant.

(c) A Christmas tree having any value as a Christmas tree, or a damaged Christmas tree that may rejuvenate and re-establish value as a Christmas tree, shall be considered as worth full value based on the age of the tree at the time of disaster.

§ 1437.307 Mushrooms.

(a) Eligible mushrooms is a value loss crop and is only compensable in accord with the restrictions of this section. To be eligible, the mushrooms must be grown as a commercial crop in a facility with a controlled environment utilizing good mushroom growing practices. The facility must be located on private property either owned or leased by the producer.

(b) The controlled environment for eligible mushrooms must include primary and backup systems for:

- (1) Temperature and humidity controls;
- (2) Proper and adequate lighting; and
- (3) Positive air pressurization and filtration.

(c) The growing medium must consist of a substrate (a habitat and nutrient base) sterilized by heat treatment.

(d) Good mushroom growing practices must be used, and they consist of proper and adequate insect and disease control and the maintenance of a sterile environment. Maintaining a sterile environment includes at a minimum:

- (1) Adequate hygiene;
- (2) Overall cleanliness;
- (3) Isolation or minimum contact procedures;
- (4) Use of footpaths; and
- (5) Availability and frequent utilization of wash-down facilities.

(e) In the crop year in which a notice of loss is filed, producers may be required, at the discretion of CCC, to provide evidence the mushrooms are maintained in accordance with this section.

§ 1437.308 Ginseng.

(a) Ginseng is a value loss crop and is compensable only as allowed in this section. Ginseng is eligible only if:

(1) The ginseng includes stratified seeds for use as propagation stock in a commercial ginseng operation or rootlet for commercial sale that are grown in a controlled, cultivatable environment on private property either owned or leased by the producer; and

(2) The ginseng is grown using good ginseng growing practices with all plant needs supplied and under control of the producer;

(b) Ginseng will not be eligible to generate benefits under this part if it:

- (1) Is indigenous to the facility;
- (2) Is grown solely for medicinal purposes; and
- (3) Includes wild ginseng rootlet that is harvested and transplanted from woodland grown ginseng.

(c) Good ginseng growing practices must be followed, and include, but are not limited to:

- (1) Adequate drainage;
- (2) Proper and adequate shade;
- (3) Accurate pH level;
