concluded that a critical mass of items have been designated, USDA will exercise its discretion, in accordance with the competitive procedures outlined in paragraph (b) of this section, to allocate a portion of the available USDA testing funds to give priority to testing of products for which private sector firms provide cost sharing for the testing.

(b) Competitive program for cost sharing for determining life cycle costs, environmental and health benefits, and performance.

(1) Subject to the availability of funds and paragraph (a) of this section, USDA will announce annually the solicitation of proposals for cost sharing for life cycle costs, environmental and health benefits, and performance testing of biobased products in accordance with the standards set forth in §2902.8 to carry out this program. Information regarding the submission of proposals for cost sharing also will be posted on the USDA informational Web site, http://www.biobased.oce.usda.gov.

(2) Proposals will be evaluated and assigned a priority rating. Priority ratings will be based on the following criteria:

(i) A maximum of 25 points will be awarded a proposal based on the market readiness;

(ii) A maximum of 20 points will be awarded a proposal based on the potential size of the market for that product in Federal agencies;

(iii) A maximum of 25 points will be awarded based on the financial need for assistance of the manufacturer or vendor;

(iv) A maximum of 20 points will be awarded a proposal based on the product’s prospective competitiveness in the market place;

(v) A maximum of 10 points will be awarded a proposal based on its likely benefit to the environment.

(3) Cost-sharing proposals will be considered first for high priority products of small and emerging private business enterprises. If funds remain to support further testing, USDA will consider cost sharing proposals for products of all other producers of biobased items as well as the remaining proposals for products of small and emerging private business enterprises. Proposals will be selected based on priority rating until available funds for the fiscal year are committed.

(4)(i) For products selected for life cycle costs and environmental and health benefits testing under this paragraph, USDA could provide up to 50 percent of the cost of determining the life cycle costs and environmental and health effects, up to a maximum of $5,000 of assistance per product.

(ii) For products selected for performance testing under this paragraph, USDA could provide up to 50 percent of the cost for performance testing, up to $100,000 of assistance per product for up to two performance tests (measures of performance) per product.

(5) For selected proposals, USDA will enter into agreements with and provide the funds directly to the testing entities.

(6) Proposals submitted in one fiscal year, but not selected for cost sharing of testing in that year, may be resubmitted to be considered for cost sharing in the following year.

Subpart B—Designated Items

SOURCE: 71 FR 13705, Mar. 16, 2006, unless otherwise noted.

§2902.10 Mobile equipment hydraulic fluids.

(a) Definition. Hydraulic fluids formulated for general use in non-stationary equipment, such as tractors, end loaders, or backhoes.

(b) Minimum biobased content. The minimum biobased content is 44 percent and shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) Preference effective date. No later than March 16, 2007, procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased mobile equipment hydraulic fluids. By that date, Federal agencies that have the responsibility for drafting or reviewing specifications for items to be procured shall ensure that the relevant specifications require the use of biobased mobile equipment hydraulic fluids.

(d) Determining overlap with an EPA-designated recovered content product.
§ 2902.12 Water tank coatings.

(a) Definition. Coatings formulated for use in potable water storage systems.

(b) Minimum biobased content. The minimum biobased content is 59 percent and shall be based on the entire product.

(c) Preference effective date. No later than November 20, 2007, procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased water tank coatings. By that date, Federal agencies that have the responsibility for drafting or reviewing specifications for items to be procured shall ensure that the relevant specifications require the use of biobased water tank coatings.
