

weight (mass) of the total organic carbon in the finished product. The 12 percent biobased content must be of a qualifying biobased feedstock. Cotton, wool, linen, and silk are not qualifying biobased feedstocks for the purpose of determining the biobased content of bedding, bed linens, and towels.

(c) *Preference effective date.* No later than November 20, 2007, procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased bedding, bed linens, and towels. By that date, Federal agencies that have the responsibility for drafting or reviewing specifications for items to be procured shall ensure that the relevant specifications require the use of biobased bedding, bed linens, and towels.

[71 FR 13705, Mar. 16, 2006, as amended at 71 FR 67032, Nov. 20, 2006]

§ 2902.16 Adhesive and mastic removers.

(a) *Definition.* Solvent products formulated for use in removing asbestos, carpet, and tile mastics as well as adhesive materials, including glue, tape, and gum, from various surface types.

(b) *Minimum biobased content.* The preferred procurement product must have a biobased content of at least 58 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference compliance date.* No later than May 14, 2009, procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased adhesive and mastic removers. By that date, Federal agencies that have the responsibility for drafting or reviewing specifications for items to be procured shall ensure that the relevant specifications require the use of biobased adhesive and mastic removers.

[73 FR 27953, May 14, 2008]

§ 2902.17 Plastic insulating foam for residential and commercial construction.

(a) *Definition.* Spray-in-place plastic foam products designed to provide a sealed thermal barrier for residential

or commercial construction applications.

(b) *Minimum biobased content.* The preferred procurement product must have a biobased content of at least 7 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference compliance date.* No later than May 14, 2009, procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased plastic insulating foam for residential and commercial construction. By that date, Federal agencies that have the responsibility for drafting or reviewing specifications for items to be procured shall ensure that the relevant specifications require the use of biobased plastic insulating foam for residential and commercial construction.

(d) *Determining overlap with an EPA-designated recovered content product.* Qualifying biobased products that fall under this item may, in some cases, overlap with the EPA-designated recovered content product: Building Insulation. USDA is requesting that manufacturers of these qualifying biobased products provide information on the BioPreferred Web site of qualifying biobased products about the intended uses of the product, information on whether or not the product contains any recovered material, in addition to biobased ingredients, and performance standards against which the product has been tested. This information will assist Federal agencies in determining whether or not a qualifying biobased product overlaps with EPA-designated building insulation and which product should be afforded the preference in purchasing.

NOTE TO PARAGRAPH (d): Biobased insulating products within this designated item can compete with similar insulating products with recycled content. Under the Resource Conservation and Recovery Act of 1976, section 6002, the U.S. Environmental Protection Agency designated building insulation containing recovered materials as items for which Federal agencies must give preference in their purchasing programs. The designation can be found in the Comprehensive Procurement Guideline, 40 CFR 247.12. EPA provides recovered materials content

§ 2902.18

recommendations for building insulation products in the Recovered Materials Advisory Notice (RMAN) published for these products. The RMAN recommendations can be found by accessing EPA's Web site <http://www.epa.gov/epaoswer/non-hw/procure/products.htm> and then clicking on the appropriate product name.

[73 FR 27953, May 14, 2008]

§ 2902.18 Hand cleaners and sanitizers.

(a) *Definitions.* (1) *Hand cleaners.* Products formulated for personal care use in removing a variety of different soils, greases, and similar substances from human hands with or without the use of water.

(2) *Hand sanitizers.* Products formulated for personal care use in removing bacteria from human hands with or without the use of water. Personal care products that are formulated for use in removing a variety of different soils, greases and similar substances and bacteria from human hands with or without the use of water are classified as hand sanitizers for the purposes of this rule.

(b) *Minimum biobased content.* The minimum biobased content requirement for all hand cleaners and/or sanitizers shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product. The applicable minimum biobased contents are:

(1) Hand cleaners—64 percent.

(2) Hand sanitizers (including hand cleaners and sanitizers)—73 percent.

(c) *Preference compliance date.* No later than May 14, 2009, procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased hand cleaners and sanitizers. By that date, Federal agencies that have the responsibility for drafting or reviewing specifications for items to be procured shall ensure that the relevant specifications require the use of biobased hand cleaners and sanitizers.

[73 FR 27953, May 14, 2008]

§ 2902.19 Composite panels.

(a) *Definitions.* (1) *Plastic lumber composite panels.* Engineered products suitable for non-structural outdoor needs

7 CFR Ch. XXIX (1–1–10 Edition)

such as exterior signs, trash can holders, and dimensional letters.

(2) *Acoustical composite panels.* Engineered products designed for use as structural and sound deadening material suitable for office partitions and doors.

(3) *Interior panels.* Engineered products designed specifically for interior applications and providing a surface that is impact-, scratch-, and wear-resistant and that does not absorb or retain moisture.

(4) *Structural interior panels.* Engineered products designed for use in structural construction applications, including cabinetry, casework, paneling, and decorative panels.

(5) *Structural wall panels.* Engineered products designed for use in structural walls, curtain walls, floors and flat roofs in commercial buildings.

(b) *Minimum biobased content.* The minimum biobased content requirement for all composite panels shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product. The applicable minimum biobased contents are:

(1) Plastic lumber composite panels—23 percent.

(2) Acoustical composite panels—37 percent.

(3) Interior panels—55 percent.

(4) Structural interior panels—89 percent.

(5) Structural wall panels—94 percent.

(c) *Preference compliance date.* No later than May 14, 2009, procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased composite panels. By that date, Federal agencies that have the responsibility for drafting or reviewing specifications for items to be procured shall ensure that the relevant specifications require the use of biobased composite panels.

(d) *Determining overlap with an EPA-designated recovered content product.* Qualifying biobased products that fall under this item may, in some cases, overlap with the following EPA-designated recovered content products: Laminated Paperboard and Structural
