§ 3407.9 Use of environmental documents in decisionmaking.

In carrying out agency responsibilities under NEPA, CSREES officials shall:

(a) Consider all relevant environmental documents in evaluating programs, proposals, or projects for final agency action.

(b) Make all relevant final environmental documents, comments, and responses part of the record in rulemaking and adjudicatory proceedings.

(c) Ensure that all relevant final environmental documents, comments, and responses are submitted to CSREES in a timely fashion, are subjected to normal agency review processes, and are made a part of the official record.

(d) Consider only those alternatives encompassed by the range of alternatives discussed in the relevant environmental documents when evaluating plans, programs, or proposals for agency action.

§ 3407.10 Preparation of environmental assessments.

(a) Format and content. An EA may be prepared in any format provided that it covers, in a logical and succinct fashion, the information necessary for determining whether a proposed CSREES action may have a significant environmental impact and thus warrant preparation of an EIS. The information must include brief discussions on the need for the project, alternatives to the proposed action, environmental impacts of the proposed action and alternatives, and a listing of agencies and persons consulted (40 CFR 1508.9). Where possible, EAs should be limited to 10–15 pages. NOTE: It is the scope and complexity of the environmental issues, rather than the size of the project, that should be used to determine the length of the EA.

(b) Supplements to environmental assessments. Where substantial changes occur or new information becomes available under a project or activity for which an EA has been prepared and it is determined by a responsible CSREES official specified in §3407.4(b) that the changes are pertinent to environmental concerns, a supplement to the EA may be required. Supplements to EAs shall be evaluated and processed as stated in paragraph (c) of this section.

(c) Decision notice. Upon completion of an EA and any supplement thereto, the responsible CSREES official will evaluate the information it contains, determine whether an EIS is required or whether no significant environmental impact is likely to occur, and will document the decision and the reasons upon which it is based (40 CFR 1508.13). The EA shall be available to the public.

§ 3407.11 Preparation of environmental impact statements.

(a) Actions involving more than one agency. If more than one Federal agency participates in a program activity, a lead agency shall be selected in accordance with 40 CFR 1501.5(c). The lead agency, in full cooperation with all participating agencies, shall assume responsibility for involving the public as required in 40 CFR 1501.4(b) and shall prepare the EIS or shall cause the EIS to be prepared as provided in 40 CFR 1501.5.

(b) Notice of intent. If a responsible CSREES official designated in §3407.4(b) of this part recommends the preparation of an EIS, the public shall be apprised of the decision. This notice shall be prepared according to 40 CFR 1508.2.

(c) Draft and Final EIS. The process of preparing the draft and final EIS, as well as the format of the document, shall comply with the provisions of 40 CFR parts 1502–1506.

(d) Supplemental statements. Where substantial changes occur or new information becomes available under a project or activity for which an EIS or draft EIS has been prepared and it is determined by a responsible CSREES official specified in §3407.4(b) that the changes are pertinent to environmental concerns, a supplement to the EIS or draft EIS may be required. The supplement shall be evaluated and processed in accordance with 40 CFR 1502.9(c).

(e) Decisionmaking and implementation. A responsible CSREES official designated in §3407.4(b) may make a decision no sooner than thirty days after the notice of availability of the final EIS has been published in the FEDERAL.
