Agricultural Marketing Service, USDA

§ 56.77

washers. Chlorine or quaternary sanitizing rinse water may be used as part of the replacement water, provided, they are compatible with the washing compound. Iodine sanitizing rinse water may not be used as part of the replacement water.

(7) Only potable water may be used to wash eggs. Each official plant shall submit certification to the national office stating that their water supply is potable. An analysis of the iron content of the water supply, stated in parts per million, is also required. When the iron content exceeds 2 parts per million, equipment shall be provided to reduce the iron content below the maximum allowed level. Frequency of testing for potability and iron content shall be determined by the Administrator. When the water source is changed, new tests are required.

(8) Waste water from the egg washing operation shall be piped directly to drains.

(9) The washing, rinsing, and drying operations shall be continuous and shall be completed as rapidly as possible to maximize conservation of the egg’s quality and to prevent sweating of eggs. Eggs shall not be allowed to stand or soak in water. Immersion-type washers shall not be used.

(10) Prewetting shell eggs prior to washing may be accomplished by spraying a continuous flow of water over the eggs in a manner which permits the water to drain away or other methods which may be approved by the Administrator. The temperature of the water shall be the same as prescribed in this section.

(11) Washed eggs shall be spray-rinsed with water having a temperature equal to, or warmer than, the temperature of the wash water. The spray-rinse water shall contain a sanitizer that has been determined acceptable for the intended use by the national supervisor and of not less than 100 ppm nor more than 200 ppm of available chlorine or its equivalent. Alternate procedures, in lieu of a sanitizer rinse, may be approved by the national supervisor.

(12) Test kits shall be provided and used to determine the strength of the sanitizing solution.

(13) During non-processing periods, eggs shall be removed from the washing and rinsing area of the egg washer and from the scanning area whenever there is a buildup of heat that may diminish the quality of the egg.

(14) Washed eggs shall be reasonably dry before packaging and packing.

(15) Steam, vapors, or odors originating from the washing and rinsing operation shall be continuously and directly exhausted to the outside of the building.

(g) Requirements for eggs officially identified with a grademark. (1) Shell eggs that are officially identified with a grademark shall be placed under refrigeration at an ambient temperature no greater than 45 °F (7.2 °C) promptly after packaging.

(2) Eggs that are to be officially identified with the grademark shall be packed only in new or good used packing material and new packaging materials that are clean, free of mold, mustiness and off odors, and must be of sufficient strength and durability to adequately protect the eggs during normal distribution. When packed in other than fiber packing material, the containers must be of sound construction and maintained in a reasonably clean manner.

(h) Use of approved chemicals and compounds. (1) All egg washing and equipment cleaning compounds, defoamers, destainers, sanitizers, inks, oils, lubricants, or any other compound that comes into contact with the shell eggs shall be approved by the national supervisor for their specified use and handled in accordance with the manufacturer’s instructions.

(2) All pesticides, insecticides, and rodenticides shall be approved for their specified use and handled in accordance with the manufacturer’s instructions.

[69 FR 76376, Dec. 21, 2004]

§ 56.77 Health and hygiene of personnel.

(a) No person known to be affected by a communicable or infectious disease shall be permitted to come in contact with the product.

(b) Plant personnel coming into contact with the product shall wear clean clothing.

PART 57—INSPECTION OF EGGS
(EGG PRODUCTS INSPECTION ACT)

Subpart A—Regulations Governing the Inspection of Eggs

GENERAL

Sec. 57.1 Definitions.
57.10 Administration.
57.13 Federal and State cooperation.
57.17 Nondiscrimination.
57.18 OMB control number.

SCOPE OF INSPECTION

57.20 Inspection in accordance with methods prescribed or approved.
57.22 Basis of service.
57.28 Inspections.

RELATION TO OTHER AUTHORITIES

57.35 Eggs in commerce.

EGGS NOT INTENDED FOR HUMAN FOOD

57.45 Prohibition on eggs not intended for use as human food.

EXEMPTIONS

57.100 Specific exemptions.
57.105 Suspension or termination of exemptions.

PERFORMANCE OF SERVICES

57.110 Licensed inspectors.
57.112 Suspension of license or authority; revocation.
57.114 Surrender of license.
57.119 Political activity.
57.120 Financial interest of inspectors.
57.130 Identification.
57.132 Access to plants.
57.134 Accessibility of product.

RECORDS AND RELATED REQUIREMENTS FOR EGG HANDLERS AND RELATED INDUSTRIES

57.200 Records and related requirements.
57.220 Information and assistance to be furnished to inspectors.

ADMINISTRATIVE DETENTION

57.240 Detaining product.

APPEAL OF AN INSPECTION

57.300 Who may request an appeal inspection.
57.310 Where to file an appeal.
57.320 How to file an appeal.
57.330 When an application for an appeal inspection may be refused.
57.340 Who shall perform the appeal.
57.350 Procedures for selecting appeal samples.
57.360 Appeal inspection certificates.
57.370 Cost of appeals.

7 CFR Ch. I (1–1–10 Edition)

RETENTION

57.426 Retention.

REGISTRATION OF SHELL EGG HANDLERS

57.690 Persons required to register.

INSPECTION AND DISPOSITION OF RESTRICTED EGGS

57.700 Prohibition on disposition of restricted eggs.
57.720 Disposition of restricted eggs.

IDENTIFICATION OF RESTRICTED EGGS OR EGG PRODUCTS NOT INTENDED FOR HUMAN CONSUMPTION

57.800 Identification of restricted eggs.
57.801 Nest run or washed ungraded eggs.
57.840 Identification of inedible, unwholesome, or adulterated egg products.
57.960 Identification wording.

IMPORTS

57.900 Requirements for importation of restricted eggs into the United States.
57.905 Importation of restricted eggs or eggs containing more restricted eggs than permitted in the official standards for U.S. Consumer Grade B.
57.915 Foreign inspection certification required.
57.920 Importer to make application for inspection of imported eggs.
57.925 Inspection of imported eggs.
57.930 Imported eggs; retention in customs custody; delivery under bond; movement prior to inspection; sealing; handling; facilities, and assistance.
57.935 Means of conveyance and equipment used in handling eggs to be maintained in sanitary condition.
57.945 Foreign eggs offered for importation; reporting of findings to customs; handling of products refused entry.
57.950 Labeling of containers of eggs for importation.
57.955 Labeling of shipping containers of eggs for importation.
57.960 Small importations for consignee’s personal use, display, or laboratory analysis.
57.965 Returned U.S. inspected and marked products; not importations.
57.970 Charges for storage, cartage, and labor with respect to products imported contrary to the Act.

Subpart B—Rules of Practice Governing Proceedings Under the Egg Products Inspection Act

SCOPE AND APPLICABILITY OF RULES OF PRACTICE

57.1000 Administrative proceedings.
