§ 319.56–39

harvest season to qualify as a low prevalence production site, and certification of low prevalence will be valid for one harvest season only. The NPPO of Chile will present a list of certified production sites to APHIS.

(3) Post-harvest processing. After harvest and before packing, the fruit must be washed, rinsed in a potable water bath, washed with detergent with brushing using bristle rollers, rinsed with a hot water shower with brushing using bristle rollers, predried at room temperature, waxed, and dried with hot air.

(4) Phytosanitary inspection. The fruit must be inspected in Chile at an APHIS-approved inspection site under the direction of APHIS inspectors in coordination with the NPPO of Chile after the post-harvest processing. A biometric sample will be drawn and examined from each consignment of fruit, which may represent multiple grower lots from different packing sheds. Clementines, mandarins, or tangerines in any consignment may be shipped to the United States only if the consignment passes inspection as follows:

(i) Fruit presented for inspection must be identified in the shipping documents accompanying each lot of fruit that identify the production site(s) where the fruit was produced and the packing shed(s) where the fruit was processed. This identity must be maintained until the fruit is released for entry into the United States.

(ii) A biometric sample of boxes from each consignment will be selected and the fruit from these boxes will be visually inspected for quarantine pests, and a portion of the fruit will be washed and the collected filtrate will be microscopically examined for B. chilensis.

(A) If a single live B. chilensis mite is found, the fruit will be eligible for importation into the United States only if it is fumigated in Chile in accordance with paragraph (e) of this section. The production site will be suspended from the low prevalence certification program and all subsequent lots of fruit from the production site of origin will be required to be fumigated as a condition of entry to the United States for the remainder of the shipping season.

(B) If inspectors find evidence of any other quarantine pest, the fruit in the consignment will remain eligible for importation into the United States only if an authorized treatment for the pest is available in part 305 of this chapter and the entire consignment is treated for the pest in Chile under APHIS supervision.

(iii) Each consignment of fruit must be accompanied by a phytosanitary certificate issued by the NPPO of Chile that contains an additional declaration stating that the fruit in the consignment meets the conditions of §319.56–38(d).

(e) Approved fumigation. Clementines, grapefruit, mandarins, sweet oranges, or tangerines that do not meet the conditions of paragraph (d) of this section may be imported into the United States if the fruit is fumigated either in Chile or at the port of first arrival in the United States with methyl bromide for B. chilensis in accordance with part 305 of this chapter. An APHIS inspector will monitor the fumigation of the fruit and will prescribe such safeguards as may be necessary for unloading, handling, and transportation preparatory to fumigation. The final release of the fruit for entry into the United States will be conditioned upon compliance with prescribed safeguards and required treatment.

(f) Trust fund agreement. Clementines, grapefruit, mandarins, sweet oranges, or tangerines may be imported into the United States under this section only if the NPPO of Chile or a private export group has entered into a trust fund agreement with APHIS in accordance with §319.56–6.

§ 319.56–39 Fragrant pears from China.

Fragrant pears may be imported into the United States from China only under the following conditions and in accordance with all other applicable provisions of this subpart:

(a) Origin, growing, and harvest conditions. (1) The pears must have been
grown in the Korla region of Xinjiang Province in a production site that is registered with the national plant protection organization (NPPO) of China.

(2) All propagative material introduced into a registered production site must be certified free of the pests listed in this section by the NPPO of China.

(3) Within 30 days prior to harvest, the NPPO of China or officials authorized by the NPPO of China must inspect the registered production site for signs of pest infestation and allow APHIS to monitor the inspections. The NPPO of China must provide APHIS with information on pest detections and pest detection practices, and APHIS must approve the pest detection practices.

(4) If any of the quarantine pests listed in this section are found during the pre-harvest inspection or at any other time, the NPPO of China must notify APHIS immediately.

(a) Upon detection of Oriental fruit fly (Bactrocera dorsalis), APHIS may reject the lot or consignment and may prohibit the importation into the United States of fragrant pears from China until an investigation is conducted and APHIS and the NPPO of China agree that appropriate remedial action has been taken.

(i) Upon detection of Oriental fruit fly (Bactrocera dorsalis), APHIS may reject the lot or consignment and may prohibit the importation into the United States of fragrant pears from China until an investigation is conducted and APHIS and the NPPO of China agree that appropriate remedial action has been taken.

(ii) Upon detection of peach fruit borer (Carposina sasaki), yellow peach moth (Conogethes punctiferalis), apple fruit moth (Cydia inopinata), Hawthorn spider mite (Tetranychus viennensis), red plum maggot (Cydia funebrana), brown rot (Monilinia fructigena), Asian pear scab (Venturia nashicola), pear trellis rust (Gymnosporangium fuscum), Asian pear black spot (Alternaria spp.), or phylloxeran (Aphanostigma sp. poss. jackusienis), APHIS may reject the lot or consignment and may prohibit the importation into the United States of fragrant pears from the production site for the season. The exportation to the United States of fragrant pears from Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua may be prohibited only under the following conditions and in accordance with all other applicable provisions of this subpart:

(a) For peppers of the species Capsicum annuum, Capsicum frutescens, Capsicum baccatum, and Capsicum chinense from areas free of Mediterranean fruit fly (Bactrocera dorsalis), APHIS may reject the lot or consignment and may prohibit the importation into the United States of fragrant pears from China until an investigation is conducted and APHIS and the NPPO of China agree that appropriate remedial action has been taken.

(b) Upon detection of large pear borer (Numonina pivivorella), pear curculio (Rhyynchites fovepessin), or Japanese apple curculio (R. heros), APHIS may reject the lot or consignment.

(b) Packing requirements. (1) The fragrant pears must be packed in cartons that are labeled in accordance with §319.56–5(e).

(2) The fragrant pears must be held in a cold storage facility while awaiting export. If fruit from unregistered production sites are stored in the same facility, the fragrant pears must be isolated from that other fruit.

(c) Shipping requirements. (1) The fragrant pears must be shipped in insect-proof containers and all pears must be safeguarded during transport to the United States in a manner that will prevent pest infestation.

(2) The fragrant pears may be imported only under a permit issued by APHIS in accordance with §319.56–3(b).

(c) Shipping requirements. (1) The fragrant pears must be shipped in insect-proof containers and all pears must be safeguarded during transport to the United States in a manner that will prevent pest infestation.

(3) Each consignment of pears must be accompanied by a phytosanitary certificate issued by the NPPO of China stating that the conditions of this section have been met and that the consignment has been inspected and found free of the pests listed in this section.
