based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count; or

(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested;

(2) All harvested production from the insurable acreage in the unit;

(d) Mature popcorn may be adjusted for excess moisture and quality deficiencies. If moisture adjustment is applicable, it will be made prior to any adjustment for quality.

(1) Production will be reduced by 0.12 percentage point for moisture in excess of 15 percent. We may obtain samples of the production to determine the moisture content.

(2) Popcorn production will be eligible for quality adjustment if, due to an insurable cause of loss that occurs within the insurance period, it is not merchantable popcorn and is rejected by the processor. The production will be adjusted by:

(i) Dividing the value per pound of the damaged popcorn by the base contract price per pound for undamaged popcorn; and

(ii) Multiplying the result by the number of pounds of such popcorn.

14. Late Planting

Late planting provisions in the Basic Provisions are applicable for popcorn if you provide written approval from the processor by the acreage reporting date that it will accept the production from the late planted acres when it is expected to be ready for harvest.

15. Prevented Planting

Your prevented planting coverage will be 60 percent of your production guarantee for timely planted acreage. If you have limited or additional levels of coverage, as specified in 7 CFR part 400, subpart T, and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

§ 457.127 [Reserved]

§ 457.128 Guaranteed production plan of fresh market tomato crop insurance provisions.

The Guaranteed Production Plan of Fresh Market Tomato Crop Insurance

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Both FCIC and reinsured policies:

Guarantee Production Plan of Fresh Market Tomato Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

§ 457.128 (a) Definitions

Acres—Forty-three thousand five hundred sixty (43,560) square feet of land when row widths do not exceed six feet, or if row widths exceed six feet, the land area on which at least 7,260 linear feet of rows are planted.

Carton—A container that contains 25 pounds of fresh tomatoes unless otherwise provided in the Special Provisions.

Direct marketing—Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

First fruit set—The date when 30 percent of the plants on the unit have produced fruit that has reached a minimum size of one inch in diameter.

Harvest—Picking of marketable tomatoes.

Mature green tomato—A tomato that:

(a) Has a heightened gloss due to a waxy skin that cannot be torn by scraping;

(b) Has a well-formed jelly-like substance in the locules;

(c) Has seeds that are sufficiently hard so they are pushed aside and not cut by a sharp knife in slicing; and
