§ 72.3 Areas quarantined in the Virgin Islands of the United States, the Northern Mariana Islands, the Commonwealth of Puerto Rico, and the Island of Guam.

The entire Territories of the Virgin Islands of the United States and the Island of Guam, the Northern Mariana Islands, and the Commonwealth of Puerto Rico are quarantined.

[43 FR 60864, Dec. 29, 1978]

§ 72.6 Interstate movement of cattle from quarantined areas not eradicating ticks.

Cattle in quarantined areas where tick eradication is not being conducted may be shipped or transported interstate in accordance with §§72.9 through 72.15 under the following conditions: The cattle must have been dipped twice with a permitted dip as provided in §72.13, with an interval of 7 to 12 days between dippings immediately preceding shipment, at a designated dipping station approved under §72.16 and located in the State of origin of the shipment or, in specific cases, after having been otherwise treated at a designated dipping station under the supervision of an APHIS inspector and in a manner approved by the Administrator. In all cases, the cattle must be inspected by an APHIS inspector just prior to final dipping, found to be apparently free of ticks, and be certified as such by APHIS before the cattle may be released for interstate movement.

§ 72.7 Interstate movement of cattle from cooperating States.

Cattle in areas where tick eradication is being conducted in cooperation with State authorities, which on inspection by an APHIS inspector are found to be apparently free from ticks, may, after one dipping, with a permitted dip as provided in §72.13, under the supervision of an APHIS inspector and certification by the inspector, be shipped or transported interstate for any purpose upon compliance with the requirements set forth in §§72.9 through 72.15.
