§611.3 Advanced technology vehicle.

In order to demonstrate that a vehicle is an "advanced technology vehicle", an automobile manufacturer must provide the following:

(a) Emissions certification. An automobile manufacturer must written certify that the vehicle meets, or will meet, the emissions requirements specified in the definition of "advanced technology vehicle"; and

(b) Demonstration of fuel economy performance. An automobile manufacturer must demonstrate that the vehicle has a combined average fuel economy of at least 225 percent of the average combined fuel economy for vehicles with substantially similar attributes for model year 2005.

(1) A combined average fuel economy calculation required under this paragraph for a vehicle that is a dual fueled automobile for the purpose of CAFE is calculated as if the vehicle were not a dual fueled automobile.

(2) The average combined fuel economy for vehicles with substantially similar attributes is a harmonic production weighted average of the combined average fuel economy of all vehicles with substantially similar attributes in model year 2005, as published by DOE.

(3) In the case of an electric drive vehicle with the ability to recharge from an off-board source, an automobile manufacturer must provide DOE with a test procedure and sufficient data to demonstrate that the vehicle meets or
exceeds the applicable average combined fuel economy of vehicles with substantially similar attributes.

**Subpart B—Direct Loan Program**

§ 611.100 Eligible applicant.

(a) In order to be eligible to receive a loan under this part, an applicant

(1) Must be either—

(i) An automobile manufacturer that can demonstrate an improved fuel economy as specified in paragraph (b) of this section, or

(ii) A manufacturer of a qualifying component; and

(2) Must be financially viable without receipt of additional Federal funding associated with the proposed eligible project.

(b) Improved fuel economy. (1) If the applicant is an automobile manufacturer that manufactured in model year 2005, vehicles subject to the CAFE requirements, the applicant must demonstrate that its adjusted average fuel economy for its light-duty vehicle fleet produced in the most recent year for which final CAFE compliance data is available, at the time of application, is greater than or equal to the adjusted average fuel economy of the applicant's fleet for MY 2005, based on the MY 2005 final CAFE compliance data.

(2) If the applicant is an automobile manufacturer that did not manufacture in model year 2005, vehicles subject to the CAFE requirements, the applicant must demonstrate that its adjusted average fuel economy for its light-duty vehicle fleet produced in the most recent year for which final CAFE compliance data is available, at the time of application, is greater than or equal to the adjusted average fuel economy of the applicant's fleet for MY 2005, based on the MY 2005 final CAFE compliance data.

(3) The CAFE values under this paragraph are to be calculated using the CAFE procedures applicable to the model year being evaluated.

(4) An applicant must provide fuel economy data, at the model level, relied upon to make the demonstration required by this section.

(5) An applicant that is a manufacturer of a qualifying component under paragraph (a)(1)(ii) of this section does not need to make a showing of improved fuel economy under this paragraph.

(c) In determining under paragraph (a)(2) of this section whether an applicant is financially viable, the Department will consider a number of factors, including, but not limited to:

(1) The applicant’s debt-to-equity ratio as of the date of the loan application;

(2) The applicant’s earnings before interest, taxes, depreciation, and amortization (EBITDA) for the applicant’s most recent fiscal year prior to the date of the loan application;

(3) The applicant’s debt to EBITDA ratio as of the date of the loan application;

(4) The applicant’s interest coverage ratio (calculated as EBITDA divided by interest expenses) for the applicant’s most recent fiscal year prior to the date of the loan application;

(5) The applicant’s fixed charge coverage ratio (calculated as EBITDA plus fixed charges divided by fixed charges plus interest expenses) for the applicant’s most recent fiscal year prior to the date of the loan application;

(6) The applicant’s liquidity as of the date of the loan application;

(7) Statements from applicant’s lenders that the applicant is current with all payments due under loans made by those lenders at the time of the loan application; and

(8) Financial projections demonstrating the applicant’s solvency through the period of time that the loan is outstanding.

(d) For purposes of making a determination under paragraph (a)(2) of this section, additional Federal funding includes any loan, grant, guarantee, insurance, payment, rebate, subsidy, credit, tax benefit, or any other form of direct or indirect assistance from the Federal government, or any agency or instrumentality thereof, other than the proceeds of a loan approved under this Part, that is, or is expected to be made available with respect to, the project for which the loan is sought under this Part.

§ 611.101 Application.

An application must include, at a minimum, the following information and materials:
