(d) EDA’s funding of the Project for design and engineering work does not in any way commit EDA to fund construction of the Project.

Subpart B—Requirements for Approved Projects

§ 305.5 Project administration by District Organization.

(a) When a District Organization is not the Recipient or co-Recipient of Investment Assistance, the District Organization may administer the Project for the Recipient if EDA determines fulfillment of the following conditions:

1. The Recipient has requested (either in the application or by separate written request) that the District Organization for the Region in which the Project is located administer the Project;

2. The Recipient certifies and EDA finds that:

   i. Administration of the Project is beyond the capacity of the Recipient’s current staff and would require hiring additional staff or contracting for such services;

   ii. No local organization or business exists that could administer the Project in a more efficient or cost-effective manner than the staff of the District Organization; and

   iii. The staff of the District Organization would administer the Project without sub-contracting the work; and

3. The allowable costs for the administration of the Project by the District Organization’s staff will not exceed the amount that would be allowable to the Recipient.

(b) EDA must approve the request either by approving the application in which the request is made or by separate specific written approval.

§ 305.6 Allowable methods of procurement for construction services.

(a) Recipients may use alternate construction procurement methods to the traditional design/bid/build procedures (including lump sum or unit price-type construction contracts). These methods include but are not limited to design/build, construction management at risk and force account. If an alternate method is used, the Recipient shall submit to EDA for approval a construction services procurement plan and the Recipient must use a design professional to oversee the process. The Recipient shall submit the plan to EDA prior to advertisement for bids and shall include the following, as applicable:

1. Justification for the proposed method for procurement of construction services;

2. The scope of work with cost estimates and schedules;

3. A copy of the proposed construction contract;

4. The name and qualifications of the selected design professional; and

5. Procedures to be used to ensure full and open competition, including the selection criteria.

(b) For all procurement methods, the Recipient must comply with the procurement standards set forth in 15 CFR parts 14 or 24, as applicable.

§ 305.7 Services performed by the Recipient’s own forces.

In certain circumstances, the Recipient may wish to consider having a portion or all of the design, construction, inspection, legal services or other work and/or services in connection with the Project performed by personnel who are employed by the Recipient either full-time or part-time. EDA may approve the use of such “in-house forces” if:

(a) The services are routinely performed by the Recipient for all construction Projects performed by the Recipient (for example, inspection or legal); or

(b) The Recipient has a special skill required for the construction of the Project (for example, construction of unique Indian structures); or

(c) The Recipient has made all reasonable efforts to obtain a contractor but has failed to do so because of uncontrollable factors such as the remoteness of the Project site or an over-abundance of construction work in the Region; or

(d) The Recipient demonstrates substantial cost savings.
