§ 996.13 Determination of whether to offer certification for a hydrographic product or class.

(a) Certification of a hydrographic product or class shall be at the option of NOAA. NOAA may decide at any time whether or not to offer certification for a product or class. However, it is most likely that a determination will be made only after a non-Federal entity has submitted a specific product for certification. NOAA’s decision shall be based on the following criteria:

(1) The suitability of the adopted standards and tests for their intended purpose;
(2) The availability of a qualified entity to perform the compliance tests;
(3) Availability of resources; and
(4) Other relevant criteria as they become apparent.

(b) NOAA’s decision as to whether certification for a hydrographic product or class is offered shall be publicly announced in the FEDERAL REGISTER or by other appropriate means.

(c) Any entity may request NOAA to reconsider its decision to offer or not offer certification by submitting its request in writing to the Quality Assurance Program address within 30 days of NOAA’s announcement of its decision. NOAA shall have, if its other obligations permit, 60 calendar days after the receipt of a request for reconsideration to either deny the request, or to reconsider and announce its decision. NOAA’s original decision if unappealed within 30 days, or its decision upon reconsideration, shall be considered final.

Subpart C—Certification of a Hydrographic Product and Decertification.

§ 996.20 Submission of a hydrographic product for certification.

(a) Upon adoption by NOAA of standards and compliance tests, any non-Federal entity may submit a hydrographic product for certification under a particular standard. This non-Federal entity shall be known as the applicant. Submission shall be made in writing to the Quality Assurance Program address. The submission shall include:

(1) Name and description of the hydrographic product and its product class if any;
(2) Identification and contact information for the non-Federal entity submitting the product for certification;
(3) The identification of the standard and compliance tests adopted by this Quality Assurance Program under which the hydrographic product is to be certified;
(4) A proposed, qualified, competent, independent compliance testing body to perform the compliance tests, which NOAA may accept at its discretion, or for which NOAA may select an alternate testing body;
(5) Other information deemed relevant by the sponsor or requested by NOAA.

(b) [Reserved]

§ 996.21 Performance of compliance testing.

(a) NOAA and the applicant shall submit the applicant’s hydrographic product to the testing body for performance of the compliance tests. That body shall determine compliance or non-compliance of the hydrographic product with the NOAA-adopted standard, and shall provide to NOAA written documentation stating the results of the compliance tests according to its usual practices.

(b) Alternatively, NOAA may choose, at its option, to perform, have performed by a NOAA-designated entity, compliance tests for the particular hydrographic product standard. NOAA’s decision shall be publicly announced in the FEDERAL REGISTER or by other appropriate means.

(h) Any party may request NOAA to reconsider its decision to adopt or reject the compliance tests by submitting its request in writing to the Quality Assurance Program address within 30 days of NOAA’s announcement of its decision. NOAA shall have, if its other obligations permit, 60 calendar days after the receipt of a request for reconsideration to either deny the request, or to reconsider and announce its decision. NOAA’s original decision if unappealed within 30 days, or its decision upon reconsideration, shall be considered final.
