§ 256.01–4 Construction or service contracts, and centralized procurement accounting.

(a) Specific accounts have not been provided in which to classify expenditures made in the performance of construction or service contracts, under which the service company undertakes projects to construct physical property for associate or nonassociate companies. The difference in the nature of undertakings which will be embraced in such contracts renders impracticable an attempt to prescribe the accounts applicable in all cases. The service company shall keep records pursuant to its work order system indicating the cost of each contract or project, the amount of service costs allocated thereto, and such additional classification of expenditures relating to projects as will meet the accounting requirements of the company for which the work is performed.

(b) Service costs allocated to construction shall include the proper proportion of salaries, expense of officers and employees, pay of employees on the service company’s regular staff specifically assigned to construction work, and other expenses of maintaining the service company’s organization and equipment. Cost of materials, construction payrolls, outside services, and other expenses directly attributable to construction work shall be excluded from the accounting system of the service company and charged directly by the vendor or supplier to the construction project.

(c) Service costs allocated to centralized procurement activities shall include only the cost of the support services performed by the service company in connection with the procurement of goods for associate companies. Cost of goods procured shall be excluded from the accounting system of the service company and charged directly by the vendor or supplier to the associate company concerned. The service company shall keep records indicating the cost of goods, if any, which it procures for each associate company and the amount of service costs allocated thereto. These records should be maintained to meet the Federal Energy Regulatory Commission’s accounting requirements for electric and gas companies.

§ 256.01–5 Determination of service cost accounting.

Service at cost and fair allocation of costs require, first of all, an accurate accounting for the elements which make up the aggregate expense of conducting the business of the service company. In the accounts herein prescribed, the total amounts included in the expense accounts during any period plus such amount as appropriately may be added as compensation for the use of capital, if paid, constitute cost during such period.

§ 256.01–6 Departmental classification required.

The importance of “salaries and wages” as an element of cost requires analysis of this item of expense by departmental or other functional category in accordance with the departmental organization of the service company. To the extent practicable, such departmental organization should be established along lines which will provide a readily available basis for analysis.

§ 256.01–7 Records.

(a) The books of account and other records of the service company shall be so kept as to show fully the facts pertaining to all entries in these accounts. All such entries shall be supported by detailed information sufficient to permit ready identification and audit.

(b) The books and records referred to herein shall include not only accounting records in a limited technical sense but all other records such as minute books, stock books, reports, working papers, memoranda, etc., which may be useful in developing the history of or facts regarding any transactions of the service company.

(c) No company shall destroy any records except as authorized by the provisions of part 257 of this chapter.

(d) The accounts may be further subdivided: Provided, Such subdivisions do not impair the integrity of the prescribed accounts. The titles of all subdivisions or subaccounts shall refer by number to the accounts of which they are subdivisions.
(e) Clearing-accounts shall be kept when necessary or useful in making the proper distribution of items to the appropriate accounts prescribed herein or in accumulating general overhead cost such as rent, utility, employee benefits, and other general and support services that are to be allocated to work orders.

(f) On or before the effective date of this Uniform System of Accounts, the several accounts prescribed herein shall be opened by transferring thereto the balances carried in the accounts previously maintained by the service company. The service company is authorized to make such subdivisions, reclassification, or consolidations of such balances as are necessary to meet the requirements of this Uniform System of Accounts.

(g) Except where this Uniform System of Accounts accords specific treatment for specified accounts, all accounts and financial statements shall be maintained in accordance with Regulation S-X and Accounting Series Releases of this Commission. The Uniform System of Accounts promulgated by the Federal Energy Regulatory Commission, as amended from time to time, and the interpretations thereof adopted from time to time by the Federal Energy Regulatory Commission, and accounting regulations and orders of any other Federal or State Commission having jurisdiction over associate companies shall be complied with unless expressly inconsistent with the requirements of this system.

[44 FR 8250, Feb. 9, 1979, as amended at 49 FR 27310, July 3, 1984]

§ 256.01–8 Definitions.

Definitions contained in the Public Utility Holding Company Act of 1935 shall be applicable to terms not specifically defined herein.

(a) Accounts means the accounts prescribed by this Uniform System of Accounts.

(b) Associate company means any company in the same holding company system.

(c) Company or the company, when not otherwise indicated in the context, means the service company.

(d) Commission means the Securities and Exchange Commission.

(e) Direct cost shall include labor cost and expenses which can be identified through a work order system as being applicable to services performed for a single or group of associate and non-associate companies. Cost incidental to or related to a directly charged item shall be classified as direct costs.

(f) Federal commission means any Federal agency, including the Securities and Exchange Commission, which has jurisdiction to regulate public utility companies in some relevant respect.

(g) Federal Energy Regulatory Commission means the Federal Energy Regulatory Commission or any successor thereto.

(h) Holding company system means any holding company, together with all of its subsidiary companies and all mutual service companies of which such holding company or any subsidiary company thereof is a member company.

(i) Indirect cost shall include those costs of a general overhead nature such as general services, housekeeping costs, and other support cost which cannot be separately identified to a single or group of associate and non-associate companies and therefore must be allocated. Indirect costs shall be accumulated on a departmental basis.

(j) Mutual service company, service company or subsidiary service company means a company approved by the Commission as a mutual service company or a subsidiary company of a registered holding company found by the Commission to be organized and conducted as to meet the requirements of section 13(b) of the Act and the provisions of Rule 88 promulgated thereunder.

(k) Nonassociate companies means a person, partnership, organization, government body or company which is not a member of the holding company system.

(l) Operating company means an electric utility company or gas utility company as defined in the Public Utility Holding Company Act of 1935.

(m) Person means an individual or company.

(n) State commission means any commission, board, agency, or officer, by whatever name designated, or a State,
