§ 10.540  Packing materials and containers for shipment.

(a) Packing materials and containers for shipment, as defined in §10.530(j) of this subpart, are to be disregarded in determining whether the non-originating materials used in the production of the good undergo an applicable change in tariff classification set out in General Note 25(o), HTSUS. Accordingly, such materials and containers are not required to undergo the applicable change in tariff classification even if they are non-originating.

(b) Packing materials and containers for shipment, as defined in §10.530(j) of this subpart, are to be disregarded in determining the regional value content of a good imported into the United States. Accordingly, in applying either the build-down or build-up method for determining the regional value content of the good imported into the United States, the value of such packing materials and containers for shipment (whether originating or non-originating) is disregarded and not included in AV, adjusted value, VNM, value of non-originating materials, or VOM, value of originating materials.

Example. Singaporean Producer A produces good C. Producer A ships good C to the U.S. in a shipping container which it purchased from Company B in Singapore. The shipping container is originating. The value of the shipping container determined under section §10.538(a)(2) of this subpart is $3. Good C is subject to a regional value content requirement. The transaction value of good C is $100, which includes the $3 shipping container. The United States importer decides to use the build-up method, \[ RVC = \left( \frac{AV - VNM}{AV} \right) \times 100 \] (see §10.535(b) of this subpart), in determining whether good C satisfies the regional value content requirement. In applying this method, the non-originating blister packages are taken into account as non-originating. As such, their $10 adjusted value is included in the VNM, value of non-originating materials, of good C.

Example 2. Same facts as in Example 1, but the blister packages are originating. In this case, the adjusted value of the originating blister packages would not be included as part of the VNM of good C under the build-down method. However, if the U.S. importer had used the build-up method, \[ RVC = \left( \frac{VOM}{AV} \right) \times 100 \] (see §10.535(c) of this subpart), the adjusted value of the blister packaging would be included as part of the VOM, value of originating material.

§ 10.541  Indirect materials.

An indirect material, as defined in §10.502(j) of this subpart, will be considered to be an originating material without regard to where it is produced, and its value will be the cost registered in the accounting records of the producer of the good.

Example. Singaporean Producer C produces good C using non-originating material A. Producer C imports non-originating rubber gloves for use by workers in the production of good C. Good C is subject to a tariff shift requirement. As provided in §10.531(b)(1) of this subpart and General Note 25(o), each of the non-originating materials in good C must undergo the specified change in tariff classification in order for good C to be considered originating. Although non-originating material A must undergo the applicable tariff shift in order for good C to be considered originating, the rubber gloves do not become originating materials because they are indirect materials and are considered originating without regard to where they are produced.

§ 10.542  Third country transportation.

(a) General. A good will not be considered an originating good by reason of having undergone production that would enable the good to qualify as an originating good if subsequent to that production the good undergoes further production or any other operation outside the territories of the Parties, other than unloading, reloading, or any other process necessary to preserve the good in good condition or to transport the good to the territory of a Party.

(b) Documentary evidence. An importer making a claim that a good is originating may be required to demonstrate, to CBP’s satisfaction, that no further production or subsequent operation, other than permitted under paragraph (a) of this section, occurred outside the territories of the Parties.
