Subpart B—Active Ingredients

§ 355.10 Anticaries active ingredients.

The active ingredient of the product consists of any of the following when used in the concentration and dosage form established for each ingredient:

(a) Sodium fluoride—(1) Dentifrices containing 850 to 1,150 ppm theoretical total fluorine in a gel or paste dosage form. Sodium fluoride 0.188 to 0.254 percent with an available fluoride ion concentration ≥ 650 parts per million (ppm).

(b) Dentifrices containing 1,500 ppm theoretical total fluorine in a powdered dosage form. Sodium fluoride 0.188 to 0.254 percent with an available fluoride ion concentration ≥ 850 ppm for products containing the abrasive sodium bicarbonate and a poured-bulk density of 1.0 to 1.2 grams per milliliter.

(3) Treatment rinses. (i) An aqueous solution of acidulated phosphate fluoride derived from sodium fluoride acidulated with a mixture of sodium phosphate, monobasic, and phosphoric acid to a level of 0.1 molar phosphate ion and a pH of 3.0 to 4.5 and which yields an effective fluoride ion concentration of 0.02 percent.

(ii) An aqueous solution of acidulated phosphate fluoride derived from sodium fluoride acidulated with a mixture of sodium phosphate, dibasic, and phosphoric acid to a pH of 3.5 and which yields an effective fluoride ion concentration of 0.01 percent.

(iii) Sodium fluoride 0.02 percent aqueous solution with a pH of approximately 7.

(iv) Sodium fluoride 0.05 percent aqueous solution with a pH of approximately 7.

(v) Sodium fluoride concentrate containing adequate directions for mixing with water before using to result in a 0.02-percent or 0.05-percent aqueous solution with a pH of approximately 7.

(b) Sodium monofluorophosphate—(1) Dentifrices containing 850 to 1,150 ppm theoretical total fluorine in a gel or paste dosage form. Sodium monofluorophosphate 0.654 to 0.884 percent with an available fluoride ion concentration (consisting of PO₃F⁻ and F⁻ combined) ≥ 800 ppm.

(2) Dentifrices containing 1,500 ppm theoretical total fluorine in a gel or paste dosage form. Sodium monofluorophosphate 0.857 to 1.125 percent with an available fluoride ion concentration ≥ 1,300 ppm.

§ 355.50 Labeling of anticaries drug products.

(a) Statement of identity. The labeling of the product contains the established name of the drug, if any, and identifies the product as: (select one or both of the following: ‘‘anticavity’’ or ‘‘fluoride’’) (select one of the following as appropriate: ‘‘dentifrice,’’ ‘‘toothpaste,’’ ‘‘tooth polish,’’ ‘‘tooth powder;’’ (optional: ‘‘dental’’) ‘‘preventive treatment gel;’’ or (optional: ‘‘treatment’’ or ‘‘dental’’)) (select one of the following: ‘‘rinse,’’ ‘‘concentrated solution,’’ ‘‘rinse powder,’’ or ‘‘rinse effervescent tablets’’). The word ‘‘mouthwash’’ may be substituted for the word ‘‘rinse’’ in this statement of identity if the product also has a cosmetic use, as defined in section 201(i) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 321(i)).

(b) Indication. The labeling of the product states, under the heading ‘‘Indication,’’ the following: ‘‘Aids in the prevention of dental (select one of the following: ‘‘cavities,’’ ‘‘decay,’’ ‘‘caries (decay),’’ or ‘‘caries (cavities)’’). Other truthful and nonmisleading statements, describing only the indication for use that has been established and listed in this paragraph (b), may also be used, as provided in §330.1(c)(2) of this chapter, subject to the provisions of section 502 of the Federal Food, Drug, and Cosmetic Act (the act) relating to misbranding and the prohibition in section 301(d) of the act against the introduction or delivery for introduction into interstate commerce of unapproved new drugs in violation of section 505(a) of the act.

(c) Warning. The labeling of the product contains the following warning under the heading ‘‘Warning’’: (1) For all fluoride dentifrice (gel, paste, and powder) products. ‘‘Keep out of reach of children under 6 years of age. If more than used for brushing is accidentally swallowed, get medical help or contact a...’
