§ 522.1193 Ivermectin and clorsulon.

(i) Indications for use. For the treatment and control of gastrointestinal roundworms (adults and fourth-stage larvae) (large roundworm, _Ascaris suum_; red stomach worm, _Hyostrongylus rubidus_; nodular worm, _Oesophagostomum spp._; threadworm, _Strongyloides ransomi_ (adults only)); somatic roundworm larvae (threadworm, _S. ransomi_ (somatic larvae)); lungworms (_Metastrongylus spp._ (adults only)); _lice_ (_H. suis_); and _mites_ (_S. scabiei var. suis_).

(ii) Limitations. Do not treat reindeer within 18 days of slaughter.

(iii) Limitations. Do not treat swine within 18 days of slaughter.

(iv) Limitations. Do not treat cattle within 18 days of slaughter.

(v) Limitations. Do not treat swine within 18 days of slaughter.

(vi) Limitations. Do not treat swine within 18 days of slaughter.

(vii) Limitations. Do not treat swine within 18 days of slaughter.

(viii) Limitations. Do not treat swine within 18 days of slaughter.

(ix) Limitations. Do not treat swine within 18 days of slaughter.

(x) Limitations. Do not treat swine within 18 days of slaughter.

(xi) Limitations. Do not treat swine within 18 days of slaughter.

(xii) Limitations. Do not treat swine within 18 days of slaughter.

(xiii) Limitations. Do not treat swine within 18 days of slaughter.

(xiv) Limitations. Do not treat swine within 18 days of slaughter.

(xv) Limitations. Do not treat swine within 18 days of slaughter.

(xvi) Limitations. Do not treat swine within 18 days of slaughter.

(xvii) Limitations. Do not treat swine within 18 days of slaughter.

(xviii) Limitations. Do not treat swine within 18 days of slaughter.

(xix) Limitations. Do not treat swine within 18 days of slaughter.

(xx) Limitations. Do not treat swine within 18 days of slaughter.

(xxi) Limitations. Do not treat swine within 18 days of slaughter.

(xxii) Limitations. Do not treat swine within 18 days of slaughter.

(xxiii) Limitations. Do not treat swine within 18 days of slaughter.

(xxiv) Limitations. Do not treat swine within 18 days of slaughter.

(xxv) Limitations. Do not treat swine within 18 days of slaughter.

(xxvi) Limitations. Do not treat swine within 18 days of slaughter.

(xxvii) Limitations. Do not treat swine within 18 days of slaughter.

(xxviii) Limitations. Do not treat swine within 18 days of slaughter.

(xxix) Limitations. Do not treat swine within 18 days of slaughter.

(3) Limitations. For subcutaneous use only. Not for intravenous or intramuscular use. Do not treat cattle within 49 days of slaughter. Because a withdrawal time in milk has not been established, do not use in female dairy cattle of breeding age. Do not use in other animal species because severe adverse reactions, including fatalities in dogs, may result. A withdrawal period has not been established for this product in preruminating calves. Do not use in calves to be processed for veal.

§ 522.1204 Kanamycin sulfate injection.

(a) Specifications. Each milliliter of kanamycin sulfate injection veterinary contains either 50 or 200 milligrams of kanamycin.

(b) Sponsor. See No. 000856 in §510.600(c) of this chapter.

(c) Conditions of use. (1) It is used in the treatment of bacterial infections due to kanamycin sensitive organisms in dogs and cats.

(2) It is administered subcutaneously or intramuscularly at 5 milligrams per pound of body weight per day in equally divided doses at 12-hour intervals.

(3) Its label shall bear an appropriate expiration date.
Food and Drug Administration, HHS

§ 522.1222 Ketamine hydrochloride injectable dosage forms.

§ 522.1222a Ketamine.

(a) **Specifications.** Each milliliter contains ketamine hydrochloride equivalent to 100 milligrams (mg) ketamine base activity.

(b) **Sponsors.** See Nos. 000010, 059130, 061690, 026637, and 063286 in § 510.600(c) of this chapter.

(c) **Special considerations.** Federal law restricts this drug to use by or on the order of a licensed veterinarian.

(d) **Conditions of use.**

(1) **Cats**—(i) **Amount.** 5 to 15 mg/pound body weight intramuscularly, depending on the effect desired.

(ii) **Indications for use.** For restraint or as the sole anesthetic agent in diagnostic or minor, brief surgical procedures that do not require skeletal muscle relaxation.

(2) **Subhuman primates**—(i) **Amount.** 3 to 15 mg/kilogram body weight intramuscularly, depending upon the species, general condition, and age of the subject.

(ii) **Indications for use.** For restraint.

§ 522.1222b Ketamine hydrochloride with promazine hydrochloride and aminopentamide hydrogen sulfate injection.

(a) **Chemical name.** Ketamine hydrochloride, (±)-2-(o-chlorophenyl)-2-(methylamino) cyclohexanone hydrochloride, with promazine hydrochloride, 10-[3-(dimethylamino) propyl] phenothiazine monohydrochloride, and aminopentamide hydrogen sulfate.

(b) **Specifications.** The drug is a sterile aqueous solution and each milliliter contains: Ketamine hydrochloride equivalent to 100 milligrams ketamine base activity, 7.5 milligrams of promazine hydrochloride, and 0.0625 milligram of aminopentamide hydrogen sulfate, with 1:10,000 benzethonium chloride.

(c) **Sponsor.** See Code No. 000856 in § 510.600(c) of this chapter.

(d) **Special considerations.** Federal law restricts this drug to use by or on the order of a licensed veterinarian.

(e) **Conditions of use.** (1) It is used in cats as the sole anesthetic agent for ovariohysterectomy and general surgery.

(2) It is administered intramuscularly at a recommended dose from 15 to 20 milligrams ketamine base per pound of body weight, depending on the effect desired.

(3) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§ 522.1225 Ketoprofen solution.

(a) **Specifications.** Each milliliter of sterile aqueous solution contains 100 milligrams of ketoprofen.

(b) **Sponsor.** See 000856 in 21 CFR 510.600(c) of this chapter.

(c) **Conditions of use in horses**—(1) **Amount.** 1.0 milligram per pound of body weight once daily for up to 5 days.

(2) **Indications for use.** For alleviation of inflammation and pain associated with musculoskeletal disorders in horses.

(3) **Limitations.** For intravenous use only. Do not use in breeding animals. Effects on fertility, pregnancy, or fetal health have not been determined. Not for use in horses intended for food. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§ 522.1228 [Reserved]

§ 522.1244 Levamisole phosphate injection.

(a) **Specifications.** Each milliliter of sterile aqueous solution contains levamisole phosphate equivalent to 136.5 or 182 milligrams of levamisole hydrochloride (13.65 or 18.2 percent).

(b) **Sponsor.** See Nos. 000061 and 057561 in § 510.600 of this chapter for use of levamisole hydrochloride.
