§ 882.4030 Skull plate anvil.
(a) Identification. A skull plate anvil is a device used to form alterable skull plates in the proper shape to fit the curvature of a patient’s skull.
(b) Classification. Class I (general controls). The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 882.9.

§ 882.4060 Ventricular cannula.
(a) Identification. A ventricular cannula is a device used to puncture the ventricles of the brain for aspiration or for injection. This device is frequently referred to as a ventricular needle.
(b) Classification. Class I (general controls). When made only of surgical grade stainless steel, the device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 882.9.

§ 882.4100 Ventricular catheter.
(a) Identification. A ventricular catheter is a device used to gain access to the cavities of the brain for injection of material into, or removal of material from, the brain.
(b) Classification. Class II (performance standards).

§ 882.4125 Neurosurgical chair.
(a) Identification. A neurosurgical chair is an operating room chair used to position and support a patient during neurosurgery.
(b) Classification. Class I (general controls). The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 882.9.

§ 882.4150 Scalp clip.
(a) Identification. A scalp clip is a plastic or metal clip used to stop bleeding during surgery on the scalp.
(b) Classification. Class II (performance standards).

§ 882.4175 Aneurysm clip applier.
(a) Identification. An aneurysm clip applier is a device used by the surgeon for holding and applying intracranial aneurysm clips.
(b) Classification. Class II (performance standards).

§ 882.4190 Clip forming/cutting instrument.
(a) Identification. A clip forming/cutting instrument is a device used by the physician to make tissue clips from wire stock.
(b) Classification. Class I. The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter.

§ 882.4200 Clip removal instrument.
(a) Identification. A clip removal instrument is a device used to remove surgical clips from the patient.
(b) Classification. Class I (general controls). The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 882.9.

§ 882.4215 Clip rack.
(a) Identification. A clip rack is a device used to hold or store surgical clips during surgery.
(b) Classification. Class I (general controls). The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to the limitations in § 882.9.
