(g) The housing must be accessible to social, recreational, educational, commercial, and health facilities and services, and other municipal facilities and services that are at least equivalent to those typically found in neighborhoods consisting largely of similar unassisted standard housing.

(h) Travel time and cost via public transportation or private automobile, from the neighborhood to places of employment providing a range of jobs for low-income workers, must not be excessive. (While it is important that elderly housing not be totally isolated from employment opportunities, this requirement need not be adhered to rigidly for such projects.)

(i) The project may not be built on a site that has occupants unless the relocation requirements referred to in §941.207 are met.

(j) The project may not be built in an area that has been identified by HUD as having special flood hazards and in which the sale of flood insurance has been made available under the National Flood Insurance Act of 1968, unless the project is covered by flood insurance as required by the Flood Disaster Protection Act of 1973, and it meets any relevant HUD standards and local requirements.

§941.203 Design and construction standards.

(a) Physical structures shall be designed, constructed and equipped so as to improve or harmonize with the neighborhoods they occupy, meet contemporary standards of modest comfort and liveability, promote security, and be attractive and marketable to the people they are intended to serve. Building design and construction shall strive to encourage in residents a proprietary sense, whether or not homeownership is intended or contemplated.

(b) Projects must comply with:

1. A national building code, such as Uniform Building Code, Council of American Building Officials Code, or Building Officials Conference of America Code;

2. Applicable State and local laws, codes, ordinances, and regulations; and

3. Other Federal requirements, including any Federal fire-safety requirements and HUD minimum property standards (e.g., 24 CFR part 200, subpart S, and §941.208).

(c) Projects for families with children shall consist to the maximum extent practicable of low-density housing (e.g., non-elevator structures, scattered sites or other types of low-density developments appropriate in the community).

(d) High-rise elevator structures shall not be provided for families with children regardless of density, unless the PHA demonstrates and HUD determines that such construction is appropriate, taking into consideration land costs, the safety and security of the prospective occupants, and the availability of community services.

[61 FR 38017, July 22, 1996]

§941.205 PHA contracts.

(a) ACC requirements. In order to be considered as eligible project expenses, all development related contracts entered into by the PHA shall provide for compliance with the provisions of the ACC.

(b) Contract forms. HUD may prescribe the form of any development related contracts, and the PHA shall use such forms. If a form is not prescribed, the PHA may develop its own form; however, it must contain all applicable federal requirements.

(c) When HUD approval is required. The PHA is authorized to execute all development-related contracts without prior HUD review or approval with the exception of:

1. All forms of site or property acquisition contracts regardless of development method; and

2. Contracts whose amount exceeds a contract approval threshold established by HUD for that PHA; and

3. A contract for the selection of a program manager to develop and implement the PHA’s proposal (see §941.201(c)).

(d) Each PHA shall certify before executing any contract with a contractor that the contractor is not suspended,
