§ 24.229 Tank car and tank truck requirements.

Railroad tank cars and tank trucks used to transport spirits for use in wine production will be constructed, marked, filled, labeled, and inspected in the manner required by regulations in 27 CFR part 19. § 24.230 Examination of tank car or tank truck.

Upon arrival of a tank car or tank truck at the bonded wine premises, the proprietor shall carefully examine the car or truck to see whether the seals are intact and whether there is any evidence of tampering or loss by leaking or otherwise. Any evidence of loss will be reported to the appropriate TTB officer. The contents of the tank car or tank truck will be gauged by weight or volume at the time of receipt by the proprietor. If the tank car or tank truck has been accurately calibrated and the calibration chart is available at the bonded wine premises, the spirits may be gauged by volume in the tank car or tank truck. In any case where a volume gauge is made, the actual measurements of the spirits in the gauging tank, tank car, or tank truck, and the temperature of the spirits will be recorded on the copy of the transfer record accompanying the shipment. (Sec. 201, Pub. L. 85-859, 72 Stat. 1360, as amended, 1362, as amended, 1381, as amended (26 U.S.C. 5206, 5214, 5366))

(a) If the spirits to be used are in a spirits storage tank on bonded wine premises, or are received immediately prior to use from a distilled spirits plant not adjacent or contiguous to bonded wine premises, the proprietor shall determine the proof of the spirits and the quantity used by volume gauge or by weight. Upon completion of the transfer of spirit from the spirits storage tank to the spirits addition tank, the proprietor shall lock the spirits storage tank.

The proprietor shall gauge the remnant package and attach to it a label showing the date of gauge, the weight of the remnant package, and the proof.
