be submitted whenever desired for laboratory analysis in order to determine the rates of tax applicable thereto.

§ 26.50a Verification of eligible flavors.

(a) Any person who, after December 1, 1990, ships to the United States any distilled spirits on which the tax has been or is to be paid or determined at an effective tax rate based in part on the alcohol content derived from any eligible flavor not previously approved on TTB Form 5530.5 (1678) or 5150.19 shall, before the first tax determination at that rate, request and receive a statement of eligibility for each flavor to be used in the computation of the effective tax rate.

(b) To receive a statement of eligibility, the person shipping the distilled spirits shall submit to the TTB Alcohol and Tobacco Laboratory, 6000 Ammendale Road, Ammendale, MD 20705, the following:

(1) An 8-ounce sample; and

(2) A statement of composition using TTB Form 5154.1 or a letterhead request that lists the—

(1) Name and percentage of alcohol by volume of the flavor; and
§ 26.51 Formulas for articles, eligible articles and products manufactured with denatured spirits.

(a) Formulas for articles and eligible articles. Formulas for articles made with distilled spirits must show the quantity and proof of the distilled spirits used, and the percentage of alcohol by volume contained in the finished product. Formulas for articles made with beer or wine must show the kind and quantity thereof (liquid measure), and the percent of alcohol by volume of such beer or wine. Formulas and samples for eligible articles are required in accordance with subpart F of part 17 of this chapter.

(c) Formulas required. Formulas required by this section shall be submitted on Form 5150.19, except that formulas for eligible articles shall be submitted on Form 5154.1 (formerly 1678). Formulas shall be submitted in accordance with §26.54. Any formula for an eligible article approved on Form 5150.19 prior to October 23, 1986 shall continue to be valid until revoked or voluntarily surrendered. Any person holding such a formula is not required to submit a new formula.

§ 26.52 Still wines containing carbon dioxide.

(a) General. Still wines may contain not more than 0.392 gram of carbon dioxide per 100 milliliters of wine; except that a tolerance to this maximum limitation, not to exceed 0.009 gram of carbon dioxide per 100 milliliters of wine, will be allowed where the amount of carbon dioxide in excess of 0.392 gram per 100 milliliters of wine was due to mechanical variations which could not be completely controlled under good commercial practices. Such tolerance will not be allowed where it is found that the limitation of 0.392 gram of carbon dioxide per 100 milliliters of wine is continuously or intentionally exceeded, or where the variation results from the use of methods or equipment not in accord with good commercial practices.

(b) Notice required. Proprietors intending to add carbon dioxide to, or retain carbon dioxide in, still wines to be shipped to the United States shall submit a notice to the appropriate TTB officer. The notice shall show the name and address of the proprietor and shall identify the method or process, the kinds (class and type) of wine, and the type of equipment to be used. A corrected notice shall be filed if there is any change (except for minor changes) in the information contained in the notice.
