an inmate under close observation beyond seven days requires approval of
the Warden, who makes this decision in consultation with the Captain and qualified health personnel.

(b) The supervising staff member shall be the same sex as the inmate and shall maintain complete and constant visual supervision of the inmate.

(c) The supervisor responsible for initiating the close observation watch shall advise the inmate of the conditions and of what is expected.

(1) The inmate shall be required to provide a urine sample within two hours of placement under close observation in accordance with the provisions of §550.30 of this chapter on urine surveillance. A second urine sample is required prior to releasing the inmate from close observation.

(2) The light will be kept on at all times.

(3) No inmate under close observation status may be allowed to come into contact with another inmate.

(4) The inmate ordinarily may not be allowed personal property while under close observation status, except legal and personal mail and a reasonable amount of legal materials when requested. Personal hygiene items will be controlled by staff.

(5) When the inmate is lying on a bed, the inmate shall be required to lie on top of the mattress in full view, weather and room temperature permitting. When necessary for the inmate to use cover, hands must remain visible at all times so that staff can observe any attempt to move contraband.

(6) Due to security concerns, the inmate ordinarily may not be permitted recreation outside of the cell.

(7) The inmate is to be served the same meals as those served to the general population, unless medically contraindicated.

(8) No medications may be given to the inmate except for those prescribed and given by hospital personnel. No laxatives may be given except natural laxatives, i.e., coffee, prune juice, etc.

(9) When the inmate needs to urinate and/or defecate, the inmate will be furnished an empty hospital bed pan.

(10) When the inmate requests to shave, to brush teeth, or other such request, a wash pan and container of water is to be provided for use in the cell.

(11) Institution staff shall be available to the inmate upon request, within in reason and within the bounds of security concerns.

[56 FR 21036, May 6, 1991]

§ 552.13 X-ray, major instrument, fluoroscope, or surgical intrusion.

(a) The institution physician may authorize use of a fluoroscope, major instrument (including anoscope or vaginal speculum), or surgical intrusion for medical reasons only, with the inmate’s consent.

(b) The institution physician may authorize use of an X-ray for medical reasons and only with the consent of the inmate. When there exists no reasonable alternative, and an X-ray examination is determined necessary for the security, good order, or discipline of the institution, the Warden, upon approval of the Regional Director, may authorize the institution physician to order a non-repetitive X-ray examination for the purpose of determining if contraband is concealed in or on the inmate (for example: in a cast or body cavity). The X-ray examination may not be performed if it is determined by the institution physician that it is likely to result in serious or lasting medical injury or harm to the inmate. Staff shall place documentation of the examination and the reasons for the examination in the inmate’s central file and medical file.

(1) The Warden and Regional Director or persons officially acting in that capacity may not redelegate the authority to approve an X-ray examination for the purpose of determining if contraband is present. An Acting Warden or Acting Regional Director may, however, perform this function.

(2) Staff shall solicit the inmate’s consent prior to the X-ray examination. However, the inmate’s consent is not required.

(c) The Warden may direct X-rays of inanimate objects where the inmate is not exposed.
