

§ 548.302

29 CFR Ch. V (7-1-11 Edition)

monthly or semi-monthly period for which the salary is paid.”

(b) Section 548.3(a) may be applied to salaried employees paid on a monthly or semi-monthly basis. Under section 7(a) of the Act the method of computing the regular rate of pay for an employee who is paid on a monthly or semi-monthly salary basis is to reduce the salary to its weekly equivalent by multiplying the monthly salary by 12 (the number of months) or the semi-monthly salary by 24, and dividing by 52 (the number of weeks). The weekly equivalent is then divided by the number of hours in the week which the salary is intended to compensate.⁸ Section 548.3(a) is designed to provide an alternative method of computing the rate for overtime purposes in the case of an employee who is compensated on a monthly or semi-monthly salary basis, where this method is found more desirable. This method is applicable only where the salary is paid for a specified number of days per week and a specified number of hours per day normally or regularly worked by the employee. It permits the employer to take into account the variations in the number of regular working days in each pay period. The basic rate authorized by § 548.3(a) is obtained by dividing the monthly or semi-monthly salary by the number of regular working days in the month or half-month, and then by the number of hours of the normal or regular work day.

Example. An employee is compensated at a semi-monthly salary of \$154 for a workweek of 5 days of 8 hours each, Monday through Friday. If a particular half-month begins on Tuesday and ends on the second Tuesday following, there are 11 working days in that half-month. The employee's basic rate would then be computed by dividing the \$154 salary by 11 working days of 8 hours each, or 88 hours. The basic rate in this situation would therefore be \$1.75 an hour. The basic rate would remain the same regardless of the fact that the employee did not actually work 11 days of 8 hours each because of the occurrence of a holiday, or because the employee took a day off, or because he worked longer than 8 hours on some days during the period, or because he worked fewer than 8 hours on some days, or because he worked more than 11 days. In any of these circumstances the employee's basic rate would still be \$1.75 an

hour. If in the next semimonthly period there are 10 working days the rate would be computed by dividing the salary of \$154 by 80 working hours, or 10 days of 8 hours each. The basic rate would therefore be \$1.925 an hour. The rate would remain \$1.925 an hour even though the employee did not in fact work ten 8-hour days during the period for the reasons indicated above, or for any other reason.

(c) The overtime compensation for each workweek should be computed at not less than time and one-half the established basic rate applicable in the period during which the overtime is worked. Thus, in the example given above all overtime worked in the first half-month would be computed at not less than time and one-half the basic rate of \$1.75 an hour; in the second half-month overtime would be paid for at not less than time and one-half the rate of \$1.925 an hour. Where a workweek overlaps two semimonthly periods part of the overtime may be performed in one semimonthly period and part in another semimonthly period with a different basic rate. If it is desired to avoid computing overtime compensation in the same workweek at two different rates, the employment arrangement may provide that overtime compensation for each workweek should be computed at the established basic rate applicable in the half-monthly or monthly period during which the workweek ends.

(Sec. 1, 52 Stat. 1060, as amended, 29 U.S.C. 201, *et seq.*)

§ 548.302 Average earnings for period other than a workweek.

(a) Section 548.3(b) authorizes as an established basic rate: “A rate per hour which is obtained by averaging the earnings, exclusive of payments described in paragraphs (1) through (7) of section 7(e) of the act, of the employee for all work performed during the workday or any other longer period not exceeding sixteen calendar days for which such average is regularly computed under the agreement or understanding. Such a rate may be used to compute overtime compensation for all the overtime hours worked by the employee during the particular period for

⁸See § 778.113 of this chapter.

which the earnings average is computed.”

(b)(1) The ordinary method of computing overtime under the act is at the employee’s regular rate of pay, obtained by averaging his hourly earnings for each workweek. Section 548.3(b) authorizes overtime to be computed on the basis of the employee’s average hourly earnings for a period longer or shorter than a workweek. It permits the payment of overtime compensation on the basis of average hourly earnings for a day, a week, two weeks or any period up to 16 calendar days, if the period is established and agreed to with the employee prior to the performance of the work.⁹ The agreement or understanding may contemplate that the basic rate will be the average hourly earnings for a day or a specified number of days within the sixteen day limit, or it may provide that the basic rate will be the average hourly earnings for the period required to complete a specified job or jobs.

Example 1. An employee is employed on a piece-work basis with overtime after 8 hours a day and on Saturday. Ordinarily his overtime compensation would be computed by averaging his earnings for the entire workweek to arrive at the regular rate of pay and then computing the overtime compensation due. Under this subsection of the regulations the employer and the employee may agree to compute overtime on the basis of the average hourly earnings for each day. Similarly, in a situation involving a bi-weekly or a semi-monthly pay period the employer may find it convenient to compute overtime on the basis of the average hourly earnings for the bi-weekly or semi-monthly period.¹⁰

Example 2. An employee, who normally would come within the forty hour provision of section 7(a) of the Act, is paid a fixed amount of money for the completion of each job. Each job takes 2 or 3 days to complete. Under the employment agreement, the employee is entitled to time and one-half an authorized basic rate for all hours worked in excess of forty in the workweek. The authorized basic rate is the employee’s average hourly earnings for each job. Suppose he completes two jobs in a particular workweek and all his overtime hours are on job No. 2.

⁹ Averaging over periods in excess of 16 calendar days may in appropriate cases be authorized by the Administrator under § 548.4.

¹⁰ See § 548.301 (c) for a discussion of the method of computing overtime for an employee paid on a semi-monthly basis.

The employee’s average hourly earnings on job No. 2 may be used to compute his overtime pay.

(2) In this connection it should be noted that although the basic rate is obtained by averaging earnings over a period other than a workweek the number of overtime hours under the act must be determined on a workweek basis.

(c) In computing the basic rate under § 548.3(b), the employer may exclude from the computation the payments which he could exclude in computing the “regular” rate of pay.¹¹

[20 FR 5681, Aug. 6, 1955, as amended at 26 FR 7731, Aug. 18, 1961]

§ 548.303 Average earnings for each type of work.

(a) Section 548.3(c) authorizes as an established basic rate: “A rate per hour which is obtained by averaging the earnings, exclusive of payments described in paragraphs (1) through (7) of section 7(e) of the act, of the employee for each type of work performed during each workweek, or any other longer period not exceeding sixteen calendar days, for which such average is regularly computed under the agreement or understanding. Such a rate may be used to compute overtime compensation, during the particular period for which such average is computed, for all the overtime hours worked by the employee at the type of work for which the rate is obtained.”

(b) Section 548.3(c) differs from § 548.3(b) in this way: Section 548.3(b) provides for the computation of the basic rate on the average of all earnings during the specified period; § 548.3(c) permits the basic rate to be computed on the basis of the earnings for each particular type of work. Thus, if the employee performs different types of work, each involving a different rate of pay such as different piece-rate, job rates, or a combination of these with hourly rates, a separate basic rate may be computed for each type of work and overtime computed

¹¹ See §§ 778.200 through 778.225 of this chapter for an explanation of what payments may be excluded.
