§ 20.11
(d) Tests of nonspilling features (storage-battery lamps of class 1).
(e) Temperature tests.
§ 20.11 Material required for MSHA records.
In order that MSHA may know exactly what it has tested and approved, detailed records are kept covering each investigation. These include drawings and actual equipment, as follows:
(a) Drawings. The original drawings submitted with the application for the tests and the final drawings which the manufacturer must submit to MSHA before approval is granted, to show the details of the lamp as approved, are retained. These drawings are used to identify the lamp and its parts in the approval and as a means of checking the future commercial product of the manufacturer.
(b) Equipment. (1) If MSHA so desires, parts of the lamps which are used in the tests will be retained as a permanent record of the investigation and of the lamps submitted.
(2) If the lamp is approved, MSHA will require the manufacturer, as soon as his first manufactured lamps are available, to submit one complete lamp, with the approval plate attached, as a record of his commercial product.
§ 20.12 How approvals are granted.
(a) All approvals are granted by official letter from MSHA. A lamp will be approved under this part only when the testing engineers judge that the lamp has met the requirements of this part and after MSHA’s records concerning the lamp are complete, including manufacturer’s drawings that show the lamp as it is to be made commercially. No verbal reports of MSHA’s decision concerning the investigation will be given, and no informal approvals will be granted.
(b) As soon as the manufacturer has received the formal approval he shall be free to advertise his lamp as permissible.
§ 20.14 Instructions for handling future changes in lamp design.
All approvals are granted with the understanding that the manufacturer will make the lamp according to the drawings submitted to MSHA, which have been considered and included in the approval. Therefore, when the manufacturer desires to make any change in the design of the lamp, the manufacturer should first obtain an extension of the original approval to cover the change. The procedure is as follows:
(a)(1) The manufacturer shall write to the U.S. Department of Labor, Mine Safety and Health Administration, Approval and Certification Center, 765 Technology Drive, Triadelphia, WV 26059, requesting an extension of the original approval and describing the
