§ 855.13 Civil fly-ins.

(a) Civil aircraft operators may be invited to a specified Air Force airfield for:
   (1) A base open house to perform or provide a static display.
   (2) A flying safety seminar.
   (b) Civil fly-in procedures:
      (1) The installation commander or a designated representative:
          (i) Requests approval from the MAJCOM, FOA, or DRU with an information copy to HQ USAF/XOOBC.
          (ii) Ensures that DD Form 2402 is completed by each user.
      (2) The MAJCOM, FOA, or DRU ensures HQ USAF/XOOBC and SAF/PAC are advised of the approval or disapproval for the fly-in.
      (3) Aerial performance by civil aircraft at an Air Force open house requires MAJCOM or FOA approval and an approved landing permit as specified in AFI 35–201, Community Relations.
      Regardless of the aircraft’s historic military significance, DD Forms 2400, 2401, and 2402 must be submitted and approved before the performance. The permit can be approved at MAJCOM, FOA, DRU, or installation level. Use will be authorized only for the period of the event. Fly-in procedures do not apply to aircraft transporting passengers (revenue or non-revenue) for the purpose of attending the open house or demonstration flights associated with marketing a product.

§ 855.14 Unauthorized landings.

(a) Unauthorized landing procedures. The installation commander or a designated representative will identify an unauthorized landing as either an emergency landing, an inadvertent landing, or an intentional landing. An unauthorized landing may be designated as inadvertent or intentional whether or not the operator has knowledge of the provisions of this part, and whether or not the operator filed a permit.

---

2 See footnote 1 to §855.6.
flight plan identifying the installation as a destination. Aircraft must depart the installation as soon as practical. On all unauthorized landings, the installation commander or a designated representative:

1. Informs the operator of subpart B procedures and the requirement for notifying the Federal Aviation Administration (FAA) as specified in section 6 of the FAA Airmans Information Manual.

2. Notifies the Federal Aviation Flight Standards District Office (FSDO) by telephone or telefax, followed by written notification using FAA Form 8020–9, 8020–11, or 8020–17, as appropriate. A copy of the written notification must be provided to HQ USAF/XOOBC.

3. Ensures the operator completes a DD Form 2402, and collects applicable charges. (In some instances, it may be necessary to arrange to bill the user for the appropriate charges.) DD Form 2402 need not be completed for commercial carriers if it is known that the form is already on file at HQ USAF/XOOBC.

4. In a foreign country, notifies the local US Defense Attache Office (USDAO) by telephone or telefax and, where applicable, the appropriate USDAO in the country of aircraft registry, followed by written notification with an information copy to HQ USAF/XOOBC and the civil aviation authority of the country or countries concerned.

(b) Emergency landings. Any aircraft operator who experiences an inflight emergency may land at any Air Force airfield without prior authorization (approved DD Form 2401 and 24 hours prior notice). An inflight emergency is defined as a situation that makes continued flight hazardous.

1. The Air Force will use any method or means to clear an aircraft or wreckage from the runway to preclude interference with essential military operations after coordinating with the FSDO and National Transportation Safety Board. Removal efforts will minimize damage to the aircraft or wreckage; however, military or other operational factors may be overriding.

2. An operator making an emergency landing:

(i) Is not charged a landing fee.

(ii) Pays all costs for labor, material, parts, use of equipment and tools, and so forth, to include, but not limited to:

(A) Spreading foam on the runway.

(B) Damage to runway, lighting, and navigation aids.

(C) Rescue, crash, and fire control services.

(D) Movement and storage of aircraft.

(E) Performance of minor maintenance.

(F) Fuel or oil (AFM 67–1, vol 1, part three, chapter 1, Air Force Stock Fund and DPSC Assigned Item Procedures).

(c) Inadvertent unauthorized landings. (1) The installation commander or a designated representative may determine a landing to be inadvertent if the aircraft operator:

(i) Landed due to flight disorientation.

(ii) Mistook the Air Force airfield for a civil airport.

(2) Normal landing fees must be charged and an unauthorized landing fee may be assessed to compensate the Government for the added time, effort, and risk involved in the inadvertent landing. Only the unauthorized landing fee may be waived by the installation commander or a designated representative if, after interviewing the pilot-in-command and appropriate Government personnel, it is determined that flying safety was not significantly impaired. The pilot-in-command may appeal the imposition of an unauthorized landing fee for an inadvertent landing to the MAJCOM, FQA, or DRU whose decision will be final. A subsequent inadvertent landing will be processed as an intentional unauthorized landing.

(d) Intentional unauthorized landings. (1) The installation commander may categorize an unauthorized landing as intentional when there is unequivocal evidence that the pilot deliberately:

(i) Landed without an approved DD Form 2401 on board the aircraft.

(ii) Landed for a purpose not approved on the DD Form 2401.

(iii) Operated an aircraft not of a model or registration number on the approved DD Form 2401.

4See footnote 1 to 855.6.
§ 855.15 Detaining an aircraft.

(a) An installation commander in the United States, its territories, or its possessions may choose to detain an aircraft for an intentional unauthorized landing until:

(1) The unauthorized landing has been reported to the FAA, HQ USAF/XOObC, and the appropriate US Attorney.

(2) Of all applicable charges have been paid.

(b) If the installation commander wishes to release the aircraft before the investigation is completed, he or she must obtain bond, promissory note, or other security for payment of the highest charge that may be assessed.

(c) The pilot and passengers will not be detained longer than is necessary for identification, although they may be permitted to remain in a lounge or other waiting area on the base at their request for such period as the installation commander may determine (normally not to exceed close of business hours at his office of the entity owning the aircraft, if the operator does not own the aircraft). No person, solely due to an intentional unauthorized landing, will be detained involuntarily after identification is complete without coordination from the appropriate US Attorney, the MAJCOM, FOA, or DRU, and HQ USAF/XOObC.

§ 855.16 Parking and storage.

The time that an aircraft spends on an installation is at the discretion of the installation commander or a designated representative but should be linked to the purpose of use authorized. Parking and storage may be permitted on a nonexclusive, temporary, or intermittent basis, when compatible with military requirements. At those locations where there are Air Force aero clubs, parking and storage privileges may be permitted in the area designated for aero club use without regard for the purpose of use authorized, if consistent with aero club policies. Any such permission may be revoked upon notice, based on military needs and the installation commander’s discretion.

§ 855.17 Fees for landing, parking, and storage.

(a) Landing, parking, and storage fees (Tables 3 and 4 to this part) are determined by aircraft maximum gross takeoff weight (MGTOW). All fees are normally due and collectable at the time of use of the Air Force airfield. DD Form 1131, Cash Collection Voucher, is used to deposit the fees with the base accounting and finance officer. In some instances, it may be necessary to bill the user for charges incurred.

(b) Landing fees are not charged when the aircraft is operating in support of official Government business or for any purpose, the cost of which is subject to reimbursement by the US Government. Parking and Storage Fees (Table 4 to this part) are charged if an aircraft must remain beyond the period necessary to conduct official Government business and for all non-official Government business operations.
