code-sharing carrier’s operational reviews and assessments of the foreign carrier and, where appropriate and agreed to by the air carriers concerned and DOD, on-site surveys of the foreign air carrier. Such carriers must also meet the 12 months prior experience requirement of §861.4(e)(1). The CARB or higher authority may prescribe additional review requirements. Should circumstances warrant, use of these air carriers by DOD passengers on official business may be restricted or prohibited as necessary to assure the highest levels of passenger safety.

(c) Other foreign air carriers carrying individually ticketed DOD passengers on official business. Foreign air carriers carrying individually ticketed DOD passengers on official business are not subject to DOD survey and approval under §§861.4 and 861.5. However, the DOD Air Carrier Survey and Analysis Division may periodically review the performance of such carriers. Reviews may include voluntary on-site surveys as directed by the CARB or higher authority. In the event questions relating to the safety and continued use of the carrier arise, the matter may be referred to the CARB for appropriate action.

(d) Foreign air carriers from countries in which the CAA is not in compliance with ICAO standards. Unless otherwise authorized, use by DOD personnel on official business of foreign air carriers from countries in which the CAA is not in compliance with ICAO standards is prohibited except for the last leg into and the first leg out of the U.S. on such carriers. This includes foreign air carriers performing any portion of a route awarded to a U.S. air carrier under the GSA City Pair Program pursuant to a code-sharing agreement with that U.S. air carrier.

(e) On-site surveys. The scope of the on-site survey of a foreign air carrier will be at the discretion of the CARB. In the event a foreign air carrier denies a request made under this part to conduct an on-site survey, the CARB will consider all available information and make a use/nonuse recommendation to DOD. If placed in nonuse status by DOD, such air carriers will not be used unless, in accordance with the reference in §861.1 (b), in the judgment of the appropriate Combatant Commander, no acceptable alternative to using the carrier exists and the travel is mission essential.

§861.7 Disclosure of voluntarily provided safety-related information.

(a) General. In accordance with paragraph (h) of the reference in §861.1 (a), DOD may withhold from public disclosure safety-related information voluntarily provided to DOD by an air carrier for the purposes of this part if DOD determines that—

(1) The disclosure of the information would, in the future, inhibit an air carrier from voluntarily providing such information to DOD or another Federal agency for the purposes of this part or for other air safety purposes; and

(2) The receipt of such information generally enhances the fulfillment of responsibilities under this part or other air safety responsibilities involving DOD or another Federal agency.

(b) Processing requests for disclosure of voluntarily provided safety-related information. Requests for public disclosure will be administratively processed in accordance with 32 CFR part 806, Air Force Freedom of Information Act Program.

(c) Disclosure of voluntarily provided safety-related information to other agencies. The Department of Defense may, at its discretion, disclose voluntarily provided safety-related information submitted under this part by an air carrier, to other agencies with safety responsibilities. The DOD will provide such information to another agency only upon receipt of adequate assurances that it will protect the information from public disclosure, and that it will not release such information unless specifically authorized.
