§ 151.2037 If my vessel cannot conduct ballast water management practices because of its voyage and/or safety concerns, will I be prohibited from discharging ballast water?

(a) A vessel that cannot practically meet the requirements of § 151.2035(b)(3) because its alternative environmentally sound ballast water management method is inoperable must employ one of the other ballast water management practices stated in § 151.2035(b). If the vessel cannot employ other ballast water management practices due to voyage or safety concerns, the vessel will not be prohibited from the discharge of ballast water in areas other than the Great Lakes and the Hudson River. However, the vessel must discharge only that amount of ballast water operationally necessary to ensure the safety of the vessels for cargo operations and make ballast water records available to the local Captain of the Port upon request.
