(2) For buildings individually listed in the National Register, the procedures contained in 36 CFR part 60 must be followed prior to the move, or the building will be removed from the National Register, will not be considered a certified historic structure, and will have to be renominated for listing. The owner may submit a part 1 application in order to receive a preliminary determination from the NPS of whether a move will cause the property to be removed from the National Register. However, preliminary approval of such a part 1 application does not satisfy the requirements of 36 CFR part 60. The SHPO must follow the remaining procedures in that regulation so that the NPS can determine that the moved building will remain listed in the National Register and retain its status as a certified historic structure.

(3) If an owner moves (or proposes to move) a building into a registered historic district or moves (or proposes to move) a building elsewhere within a registered historic district, a part 1 application containing the required information described in paragraph (h)(1) of this section must be submitted. The building to be moved will be evaluated to determine if it contributes to the historic significance of the district both before and after the move as in §67.4(i).

(i) Properties within registered historic districts will be evaluated to determine if they contribute to the historic significance of the district by applying the following Standards for Evaluating Significance within Registered Historic Districts as set forth in §67.5.

(j) Once the significance of a property located within a registered historic district or a potential historic district has been determined by the Secretary, written notification will be sent to the owner and the SHPO in the form of a certification of significance or nonsignificance.

(k) Owners shall report to the Secretary through the SHPO any substantial damage, alteration or changes to a property that occurs after issuance of a certification of significance and prior to a final certification of rehabilitation. The Secretary may withdraw a certification of significance, upon thirty days notice to the owner, if a property has been damaged, altered or changed effective as of the date of the occurrence. The property may also be removed from the National Register, in accordance with the procedures in 36 CFR part 60. A revocation of certification of significance pursuant to this part may be appealed under §67.10. For damage, alteration or changes caused by unacceptable rehabilitation work, see §67.6(f).

§67.5 Standards for evaluating significance within registered historic districts.

(a) Properties located within registered historic districts are reviewed by the Secretary to determine if they contribute to the historic significance of the district by applying the following Standards for Evaluating Significance within Registered Historic Districts.

(1) A building contributing to the historic significance of a district is one which by location, design, setting, materials, workmanship, feeling and association adds to the district's sense of time and place and historical development.

(2) A building not contributing to the historic significance of a district is one which does not add to the district's sense of time and place and historical development; or one where the location, design, setting, materials, workmanship, feeling and association have been so altered or have so deteriorated that the overall integrity of the building has been irretrievably lost.

(3) Ordinarily buildings that have been built within the past 50 years shall not be considered to contribute to the significance of a district unless a strong justification concerning their historical or architectural merit is given or the historical attributes of the district are considered to be less than 50 years old.

(b) A condemnation order may be presented as evidence of physical deterioration of a building but will not of itself be considered sufficient evidence to warrant certification of nonsignificance for loss of integrity. In certain cases it may be necessary for the owner to report to the SHPO any material change in the condition of the property that occurs after issuance of a certification of significance and prior to a final certification of rehabilitation.
to submit a structural engineer's report to help substantiate physical deterioration and/or structural damage. Guidance on preparing a structural engineer's report is available from the appropriate SHPO or NPS WASO.

(c) Some properties listed in the National Register, primarily districts, are resources whose concentration or continuity possesses greater historical significance than many of their individual component buildings and structures. These usually are documented as a group rather than individually. Accordingly, this type of National Register documentation is not conclusive for the purposes of this part and must be supplemented with information on the significance of the specific property. Certifications of significance and nonsignificance will be made on the basis of the application documentation, existing National Register documentation, and other available information as needed. The Keeper may amend the National Register documentation by issuing a supplementary record if the application material warrants such an amendment. If a certification request is received for a property which is not yet listed on the National Register or which is outside a district's established period or area of significance, a preliminary determination of significance will be issued only if the request includes adequate documentation and if there is written assurance from the SHPO that the SHPO plans to nominate the property or district or that the district nomination in question is being revised to expand its significance or for certified districts, written assurance from the duly authorized representative that the district documentation is being revised to expand the significance. Certifications will become final when the property or district is listed or when the district documentation is officially amended unless the significance of the property has been lost as a result of alteration or damage. For procedures on amending listings to the National Register and additional information on the use of National Register documentation and the supplementary record which is contained in National Register Bulletin 19, “Policies and Procedures for Processing National Register Nomination,” consult the appropriate SHPO or NPS WASO.

(d) Where rehabilitation credits are sought, certifications of significance will be made on the appearance and condition of the property before rehabilitation was begun.

(e) If a nonhistoric surface material obscures a facade, it may be necessary for the owner to remove a portion of the surface material prior to requesting certification so that a determination of significance or nonsignificance can be made. After the material has been removed, if the obscured facade has retained substantial historic integrity and the property otherwise contributes to the historic district, it will be determined to be a certified historic structure. However, if the obscuring material remains when a determination of nonsignificance is requested under §67.4(a)(2), the property will be presumed to contribute to the historic significance of the district, if otherwise qualified, and, therefore, not eligible for the other tax credits under section 47 of the Internal Revenue Code.

(f) Additional guidance on certifications of historic significance is available from SHPOs and NPS WASO.

§67.6 Certifications of rehabilitation.

(a) Owners who want rehabilitation projects for certified historic structures to be certified by the Secretary as being consistent with the historic character of the structure, and, where applicable, the district in which the structure is located, thus qualifying as a certified rehabilitation, shall comply with the procedures listed below. A fee, as described in §67.11, for reviewing all proposed, ongoing, or completed rehabilitation work is charged by the Secretary. No certification decisions will be issued on any application until the appropriate remittance is received.

(1) To initiate review of a rehabilitation project for certification purposes, an owner must complete part 2 of the Historic Preservation Certification Application according to instructions accompanying the application. These instructions explain in detail the documentation required for certification of a rehabilitation project. The application may describe a proposed rehabilitation project, a project in progress, or
