§ 230.41 Eligibility requirements for cost-share assistance.

(a) All landowners of nonindustrial private forest land as defined in § 230.31 of this subpart, including those who engage in primary processing of raw wood products on a part-time or intermittent basis and who otherwise meet the requirements of this section, are eligible to apply for and receive assistance under FLEP without regard to race, color, religion, national origin, age, sex, disability, political affiliation, sexual orientation, or marital or family status.

(b) A landowner is eligible to receive funds under the cost-share element of FLEP for treatment of not more than a total of 1,000 acres of land annually, except where a State Forester, with the concurrence of a responsible official, determines that significant public benefits would accrue from approval of a landowner’s treating up to 5,000 acres annually. In making a determination of significant public benefits, the State Forester and the responsible official shall consider, at a minimum, whether landowners who treat more than 1,000 acres annually can achieve cost-effective resource management objectives without unduly excluding FLEP participation of other eligible landowners.

(c) In order to meet the following minimum requirements to be eligible to receive cost-share through FLEP for all practices except development of a management plan, a landowner must:

(1) Own the minimum acreage as established in the State priority plan; however, in no case shall the minimum acreage requirement be higher than 25 acres;

(2) Agree to conduct land treatment(s) according to the landowner’s practice plan and to maintain FLEP practices for a minimum of 10 years, unless the State Forester specifies a shorter duration. The 10-year lifespan does not apply to recurring practices such as prescribed burning, light disking in openings, herbicide application, and other practices that are identified as needed in the management plan and practice plan; and

(3) Have a management plan submitted to the State Forester in which the lands are located that meets any requirements established by the State...
in its priority plan. Existing landowner management plans such as Tree Farm management plans, Forest Stewardship management plans, or similar plans may either meet, or can be amended to meet this requirement.

(d) A leaseholder who has a long-term lease on the land to be treated through FLEP must provide a copy of the lease to the State Forester in order to be eligible to receive cost-share assistance.

§ 230.42 Cost-share assistance application and payment procedures.

(a) Landowner applications for cost-share payments shall not be approved unless cost-share funds are available. The obligation of funds upon approval of an application constitutes an agreement by the State and the landowner to cost-share a completed practice on a reimbursable basis when the service representative verifies that the practice has been implemented.

(b) Upon receiving an application for an eligible FLEP practice and making a determination that funds are available, a service representative shall prepare a practice plan that identifies the needed practices, specifications, and performance period for the implementation of the practice(s) to achieve the objectives of the landowner. The requirements of a practice plan may be contained in a management plan. The practice plan is the basis for determining acceptable performance upon completion of the practice.

(c) Upon approval of a FLEP application, the State Forester shall notify the landowner in writing. Such notice shall state that the landowner can begin implementing the approved practice(s) and that funds have been obligated for reimbursement of a specified amount of the total cost. Practice costs incurred before approval are not eligible unless authorized by the State Forester. The notice shall also state that payment shall be made upon the service representative's verification that the practice has been implemented in accordance with the specifications of the practice plan and activities described in the management plan.

(d) Any landowner who carries out practices under FLEP shall be responsible for obtaining the authorities, rights, easements, or other approvals necessary to the performance and maintenance of the practices in keeping with applicable laws and regulations.

(e) To be eligible for cost-share reimbursement payment, a landowner must complete each practice within the performance period specified in the State priority plan, not to exceed 24 months. However, if practice(s) are not completed within the performance period specified, due to conditions beyond the landowner’s control, the State Forester may grant an extension for a time period specified in the State priority plan, not to exceed 12 months.

(f) Upon certification by the service representative that a practice has been completed in accordance with the practice plan, the cost-share payment shall be calculated and disbursed to the landowner. Landowners must provide to service representatives the right of access to the landowner’s property to inspect practices for the duration of the maintenance period for the practices.

(g) The maximum aggregate amount of cost-share payment under FLEP to any one landowner shall not exceed $300,000 through 2007, with the following exception for Alaska Indian Tribes. The Alaska State Forester, in consultation with the State Forest Stewardship Coordinating Committee and the Responsible Official, shall establish the maximum aggregate payment to any one Alaska Indian Tribe, however, the 1,000- and 5,000-acre limits shall apply.

(h) The State priority plan shall set the levels of cost-share assistance to be paid to landowners, not to exceed 75 percent of the total costs incurred by a participating landowner. Non-Federal program funds and other donated assistance may be used to supplement cost-share through FLEP; however, the total of all funds and assistance shall not exceed 100 percent of the total cost of practice implementation, and the Federal share of the total cost shall be reduced by any gross revenue from any material sold as a result of the cost-share practice.

(i) States may use the cost-share rate to define priority practices and priority areas by reserving the maximum
