

§4.118

38 CFR Ch. I (7–1–11 Edition)

	Rating
7710 Adenitis, tuberculous, active or inactive. Rate under §§ 4.88c or 4.89 of this part, whichever is appropriate.	
7714 Sickle cell anemia: With repeated painful crises, occurring in skin, joints, bones or any major organs caused by hemolysis and sickling of red blood cells, with anemia, thrombosis and infarction, with symptoms precluding even light manual labor	100
With painful crises several times a year or with symptoms precluding other than light manual labor	60
Following repeated hemolytic sickling crises with continuing impairment of health	30
Asymptomatic, established case in remission, but with identifiable organ impairment	10
NOTE: Sickle cell trait alone, without a history of directly attributable pathological findings, is not a ratable disability. Cases of symptomatic sickle cell trait will be forwarded to the Director, Compensation and Pension Service, for consideration under § 3.321(b)(1) of this chapter.	
7715 Non-Hodgkin's lymphoma: With active disease or during a treatment phase	100
NOTE: The 100 percent rating shall continue beyond the cessation of any surgical, radiation, antineoplastic chemotherapy or other therapeutic procedures. Six months after discontinuance of such treatment, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of § 3.105(e) of this chapter. If there has been no local recurrence or metastasis, rate on residuals.	
7716 Aplastic anemia: Requiring bone marrow transplant, or; requiring transfusion of platelets or red cells at least once every six weeks, or; infections recurring at least once every six weeks	100
Requiring transfusion of platelets or red cells at least once every three months, or; infections recurring at least once every three months	60
Requiring transfusion of platelets or red cells at least once per year but less than once every three months, or; infections recurring at least once per year but less than once every three months	30
Requiring continuous medication for control	10
NOTE: The 100 percent rating for bone marrow transplant shall be assigned as of the date of hospital admission and shall continue with a mandatory VA examination six months following hospital discharge. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of § 3.105(e) of this chapter.	

[60 FR 49227, Sept. 22, 1995]

THE SKIN

§ 4.118 Schedule of ratings—skin.

A veteran who VA rated under diagnostic codes 7800, 7801, 7802, 7803, 7804, or 7805 before October 23, 2008 can request review under diagnostic codes 7800, 7801, 7802, 7804, and 7805, irrespec-

tive of whether the veteran's disability has increased since the last review. VA will review that veteran's disability rating to determine whether the veteran may be entitled to a higher disability rating under diagnostic codes 7800, 7801, 7802, 7804, and 7805. A request for review pursuant to this rulemaking will be treated as a claim for an increased rating for purposes of determining the effective date of an increased rating awarded as a result of such review; however, in no case will the award be effective before October 23, 2008.

	Rating
7800 Burn scar(s) of the head, face, or neck; scar(s) of the head, face, or neck due to other causes; or other disfigurement of the head, face, or neck: With visible or palpable tissue loss and either gross distortion or asymmetry of three or more features or paired sets of features (nose, chin, forehead, eyes (including eyelids), ears (auricles), cheeks, lips), or; with six or more characteristics of disfigurement	80
With visible or palpable tissue loss and either gross distortion or asymmetry of two features or paired sets of features (nose, chin, forehead, eyes (including eyelids), ears (auricles), cheeks, lips), or; with four or five characteristics of disfigurement	50
With visible or palpable tissue loss and either gross distortion or asymmetry of one feature or paired set of features (nose, chin, forehead, eyes (including eyelids), ears (auricles), cheeks, lips), or; with two or three characteristics of disfigurement ...	30
With one characteristic of disfigurement	10
Note (1): The 8 characteristics of disfigurement, for purposes of evaluation under § 4.118, are: Scar 5 or more inches (13 or more cm.) in length. Scar at least one-quarter inch (0.6 cm.) wide at widest part. Surface contour of scar elevated or depressed on palpation. Scar adherent to underlying tissue. Skin hypo- or hyper-pigmented in an area exceeding six square inches (39 sq. cm.). Skin texture abnormal (irregular, atrophic, shiny, scaly, etc.) in an area exceeding six square inches (39 sq. cm.). Underlying soft tissue missing in an area exceeding six square inches (39 sq. cm.). Skin indurated and inflexible in an area exceeding six square inches (39 sq. cm.).	

	Rat- ing		Rat- ing
<p>Note (2): Rate tissue loss of the auricle under DC 6207 (loss of auricle) and anatomical loss of the eye under DC 6061 (anatomical loss of both eyes) or DC 6063 (anatomical loss of one eye), as appropriate.</p> <p>Note (3): Take into consideration unretouched color photographs when evaluating under these criteria.</p> <p>Note (4): Separately evaluate disabling effects other than disfigurement that are associated with individual scar(s) of the head, face, or neck, such as pain, instability, and residuals of associated muscle or nerve injury, under the appropriate diagnostic code(s) and apply §4.25 to combine the evaluation(s) with the evaluation assigned under this diagnostic code.</p> <p>Note (5): The characteristic(s) of disfigurement may be caused by one scar or by multiple scars; the characteristic(s) required to assign a particular evaluation need not be caused by a single scar in order to assign that evaluation.</p>		<p>Note (1): A superficial scar is one not associated with underlying soft tissue damage</p> <p>Note (2): If multiple qualifying scars are present, or if a single qualifying scar affects more than one extremity, or a single qualifying scar affects one or more extremities and either the anterior portion or posterior portion of the trunk, or both, or a single qualifying scar affects both the anterior portion and the posterior portion of the trunk, assign a separate evaluation for each affected extremity based on the total area of the qualifying scars that affect that extremity, assign a separate evaluation based on the total area of the qualifying scars that affect the anterior portion of the trunk, and assign a separate evaluation based on the total area of the qualifying scars that affect the posterior portion of the trunk. The midaxillary line on each side separates the anterior and posterior portions of the trunk. Combine the separate evaluations under §4.25. Qualifying scars are scars that are nonlinear, superficial, and are not located on the head, face, or neck.</p>	
<p>7801 Burn scar(s) or scar(s) due to other causes, not of the head, face, or neck, that are deep and nonlinear:</p> <p style="padding-left: 20px;">Area or areas of 144 square inches (929 sq. cm.) or greater 40</p> <p style="padding-left: 20px;">Area or areas of at least 72 square inches (465 sq. cm.) but less than 144 square inches (929 sq. cm.) 30</p> <p style="padding-left: 20px;">Area or areas of at least 12 square inches (77 sq. cm.) but less than 72 square inches (465 sq. cm.) 20</p> <p style="padding-left: 20px;">Area or areas of at least 6 square inches (39 sq. cm.) but less than 12 square inches (77 sq. cm.) 10</p> <p>Note (1): A deep scar is one associated with underlying soft tissue damage.</p> <p>Note (2): If multiple qualifying scars are present, or if a single qualifying scar affects more than one extremity, or a single qualifying scar affects one or more extremities and either the anterior portion or posterior portion of the trunk, or both, or a single qualifying scar affects both the anterior portion and the posterior portion of the trunk, assign a separate evaluation for each affected extremity based on the total area of the qualifying scars that affect that extremity, assign a separate evaluation based on the total area of the qualifying scars that affect the anterior portion of the trunk, and assign a separate evaluation based on the total area of the qualifying scars that affect the posterior portion of the trunk. The midaxillary line on each side separates the anterior and posterior portions of the trunk. Combine the separate evaluations under §4.25. Qualifying scars are scars that are nonlinear, deep, and are not located on the head, face, or neck.</p>		<p>7804 Scar(s), unstable or painful:</p> <p style="padding-left: 20px;">Five or more scars that are unstable or painful 30</p> <p style="padding-left: 20px;">Three or four scars that are unstable or painful 20</p> <p style="padding-left: 20px;">One or two scars that are unstable or painful 10</p> <p>Note (1): An unstable scar is one where, for any reason, there is frequent loss of covering of skin over the scar.</p> <p>Note (2): If one or more scars are both unstable and painful, add 10 percent to the evaluation that is based on the total number of unstable or painful scars</p> <p>Note (3): Scars evaluated under diagnostic codes 7800, 7801, 7802, or 7805 may also receive an evaluation under this diagnostic code, when applicable</p>	
<p>7802 Burn scar(s) or scar(s) due to other causes, not of the head, face, or neck, that are superficial and nonlinear:</p> <p style="padding-left: 20px;">Area or areas of 144 square inches (929 sq. cm.) or greater 10</p>		<p>7805 Scars, other (including linear scars) and other effects of scars evaluated under diagnostic codes 7800, 7801, 7802, and 7804:</p> <p style="padding-left: 20px;">Evaluate any disabling effect(s) not considered in a rating provided under diagnostic codes 7800–04 under an appropriate diagnostic code..</p> <p>7806 Dermatitis or eczema.</p> <p style="padding-left: 20px;">More than 40 percent of the entire body or more than 40 percent of exposed areas affected, or; constant or near-constant systemic therapy such as corticosteroids or other immunosuppressive drugs required during the past 12-month period 60</p> <p style="padding-left: 20px;">20 to 40 percent of the entire body or 20 to 40 percent of exposed areas affected, or; systemic therapy such as corticosteroids or other immunosuppressive drugs required for a total duration of six weeks or more, but not constantly, during the past 12-month period 30</p> <p style="padding-left: 20px;">At least 5 percent, but less than 20 percent, of the entire body, or at least 5 percent, but less than 20 percent, of exposed areas affected, or; intermittent systemic therapy such as corticosteroids or other immunosuppressive drugs required for a total duration of less than six weeks during the past 12-month period 10</p>	

	Rat- ing		Rat- ing
Less than 5 percent of the entire body or less than 5 percent of exposed areas affected, and; no more than topical therapy required during the past 12-month period	0	At least 5 percent, but less than 20 percent, of the entire body, or at least 5 percent, but less than 20 percent, of exposed areas affected, or; intermittent systemic therapy such as corticosteroids or other immunosuppressive drugs required for a total duration of less than six weeks during the past 12-month period	10
Or rate as disfigurement of the head, face, or neck (DC 7800) or scars (DC's 7801, 7802, 7803, 7804, or 7805), depending upon the predominant disability.		Less than 5 percent of the entire body or exposed areas affected, and; no more than topical therapy required during the past 12-month period	0
7807 American (New World) leishmaniasis (mucocutaneous, espundia):		Or rate as disfigurement of the head, face, or neck (DC 7800) or scars (DC's 7801, 7802, 7803, 7804, or 7805), depending upon the predominant disability.	
Rate as disfigurement of the head, face, or neck (DC 7800), scars (DC's 7801, 7802, 7803, 7804, or 7805), or dermatitis (DC 7806), depending upon the predominant disability.		7816 Psoriasis:	
Note: Evaluate non-cutaneous (visceral) leishmaniasis under DC 6301 (visceral leishmaniasis).		More than 40 percent of the entire body or more than 40 percent of exposed areas affected, or; constant or near-constant systemic therapy such as corticosteroids or other immunosuppressive drugs required during the past 12-month period	60
7808 Old World leishmaniasis (cutaneous, Oriental sore):		20 to 40 percent of the entire body or 20 to 40 percent of exposed areas affected, or; systemic therapy such as corticosteroids or other immunosuppressive drugs required for a total duration of six weeks or more, but not constantly, during the past 12-month period	30
Rate as disfigurement of the head, face, or neck (DC 7800), scars (DC's 7801, 7802, 7803, 7804, or 7805), or dermatitis (DC 7806), depending upon the predominant disability.		At least 5 percent, but less than 20 percent, of the entire body, or at least 5 percent, but less than 20 percent, of exposed areas affected, or; intermittent systemic therapy such as corticosteroids or other immunosuppressive drugs required for a total duration of less than six weeks during the past 12-month period	10
Note: Evaluate non-cutaneous (visceral) leishmaniasis under DC 6301 (visceral leishmaniasis).		Less than 5 percent of the entire body or exposed areas affected, and; no more than topical therapy required during the past 12-month period	0
7809 Discoid lupus erythematosus or subacute cutaneous lupus erythematosus:		Or rate as disfigurement of the head, face, or neck (DC 7800) or scars (DC's 7801, 7802, 7803, 7804, or 7805), depending upon the predominant disability.	
Rate as disfigurement of the head, face, or neck (DC 7800), scars (DC's 7801, 7802, 7803, 7804, or 7805), or dermatitis (DC 7806), depending upon the predominant disability. Do not combine with ratings under DC 6350.		7817 Exfoliative dermatitis (erythroderma):	
7811 Tuberculosis luposa (lupus vulgaris), active or inactive:		Generalized involvement of the skin, plus systemic manifestations (such as fever, weight loss, and hypoproteinemia), and; constant or near-constant systemic therapy such as therapeutic doses of corticosteroids, immunosuppressive retinoids, PUVA (psoralen with long-wave ultraviolet-A light) or UVB (ultraviolet-B light) treatments, or electron beam therapy required during the past 12-month period	100
Rate under §§ 4.88c or 4.89, whichever is appropriate.		Generalized involvement of the skin without systemic manifestations, and; constant or near-constant systemic therapy such as therapeutic doses of corticosteroids, immunosuppressive retinoids, PUVA (psoralen with long-wave ultraviolet-A light) or UVB (ultraviolet-B light) treatments, or electron beam therapy required during the past 12-month period	60
7813 Dermatophytosis (ringworm: of body, tinea corporis; of head, tinea capitis; of feet, tinea pedis; of beard area, tinea barbae; of nails, tinea unguium; of inguinal area (jock itch), tinea cruris):			
Rate as disfigurement of the head, face, or neck (DC 7800), scars (DC's 7801, 7802, 7803, 7804, or 7805), or dermatitis (DC 7806), depending upon the predominant disability.			
7815 Bullous disorders (including pemphigus vulgaris, pemphigus foliaceus, bullous pemphigoid, dermatitis herpetiformis, epidermolysis bullosa acquisita, benign chronic familial pemphigus (Hailey-Hailey), and porphyria cutanea tarda):			
More than 40 percent of the entire body or more than 40 percent of exposed areas affected, or; constant or near-constant systemic therapy such as corticosteroids or other immunosuppressive drugs required during the past 12-month period	60		
20 to 40 percent of the entire body or 20 to 40 percent of exposed areas affected, or; systemic therapy such as corticosteroids or other immunosuppressive drugs required for a total duration of six weeks or more, but not constantly, during the past 12-month period	30		

	Rat- ing		Rat- ing
Any extent of involvement of the skin, and; systemic therapy such as therapeutic doses of corticosteroids, immunosuppressive retinoids, PUVA (psoralen with long-wave ultraviolet-A light) or UVB (ultraviolet-B light) treatments, or electron beam therapy required for a total duration of six weeks or more, but not constantly, during the past 12-month period	30	20 to 40 percent of the entire body or 20 to 40 percent of exposed areas affected, or; systemic therapy such as corticosteroids or other immunosuppressive drugs required for a total duration of six weeks or more, but not constantly, during the past 12-month period	30
Any extent of involvement of the skin, and; systemic therapy such as therapeutic doses of corticosteroids, immunosuppressive retinoids, PUVA (psoralen with long-wave ultraviolet-A light) or UVB (ultraviolet-B light) treatments, or electron beam therapy required for a total duration of less than six weeks during the past 12-month period	10	At least 5 percent, but less than 20 percent, of the entire body, or at least 5 percent, but less than 20 percent, of exposed areas affected, or; intermittent systemic therapy such as corticosteroids or other immunosuppressive drugs required for a total duration of less than six weeks during the past 12-month period	10
Any extent of involvement of the skin, and; no more than topical therapy required during the past 12-month period	0	Less than 5 percent of the entire body or exposed areas affected, and; no more than topical therapy required during the past 12-month period	0
7818 Malignant skin neoplasms (other than malignant melanoma):		Or rate as disfigurement of the head, face, or neck (DC 7800) or scars (DC's 7801, 7802, 7803, 7804, or 7805), depending upon the predominant disability.	
Rate as disfigurement of the head, face, or neck (DC 7800), scars (DC's 7801, 7802, 7803, 7804, or 7805), or impairment of function.		7822 Papulosquamous disorders not listed elsewhere (including lichen planus, large or small plaque parapsoriasis, pityriasis lichenoides et varioliformis acuta (PLEVA), lymphomatoid papulosus, and pityriasis rubra pilaris (PRP)):	
Note: If a skin malignancy requires therapy that is comparable to that used for systemic malignancies, <i>i.e.</i> , systemic chemotherapy, X-ray therapy more extensive than to the skin, or surgery more extensive than wide local excision, a 100-percent evaluation will be assigned from the date of onset of treatment, and will continue, with a mandatory VA examination six months following the completion of such antineoplastic treatment, and any change in evaluation based upon that or any subsequent examination will be subject to the provisions of §3.105(e) of this chapter. If there has been no local recurrence or metastasis, evaluation will then be made on residuals. If treatment is confined to the skin, the provisions for a 100-percent evaluation do not apply.		More than 40 percent of the entire body or more than 40 percent of exposed areas affected, and; constant or near-constant systemic medications or intensive light therapy required during the past 12-month period	60
7819 Benign skin neoplasms:		20 to 40 percent of the entire body or 20 to 40 percent of exposed areas affected, or; systemic therapy or intensive light therapy required for a total duration of six weeks or more, but not constantly, during the past 12-month period	30
Rate as disfigurement of the head, face, or neck (DC 7800), scars (DC's 7801, 7802, 7803, 7804, or 7805), or impairment of function.		At least 5 percent, but less than 20 percent, of the entire body, or at least 5 percent, but less than 20 percent, of exposed areas affected, or; systemic therapy or intensive light therapy required for a total duration of less than six weeks during the past 12-month period	10
7820 Infections of the skin not listed elsewhere (including bacterial, fungal, viral, treponemal and parasitic diseases):		Less than 5 percent of the entire body or exposed areas affected, and; no more than topical therapy required during the past 12-month period	0
Rate as disfigurement of the head, face, or neck (DC 7800), scars (DC's 7801, 7802, 7803, 7804, or 7805), or dermatitis (DC 7806), depending upon the predominant disability.		Or rate as disfigurement of the head, face, or neck (DC 7800) or scars (DC's 7801, 7802, 7803, 7804, or 7805), depending upon the predominant disability.	
7821 Cutaneous manifestations of collagen-vascular diseases not listed elsewhere (including scleroderma, calcinosis cutis, and dermatomyositis):		7823 Vitiligo:	
More than 40 percent of the entire body or more than 40 percent of exposed areas affected, or; constant or near-constant systemic therapy such as corticosteroids or other immunosuppressive drugs required during the past 12-month period	60	With exposed areas affected	10
		With no exposed areas affected	0
		7824 Diseases of keratinization (including ichthyoses, Darier's disease, and palmoplantar keratoderma):	
		With either generalized cutaneous involvement or systemic manifestations, and; constant or near-constant systemic medication, such as immunosuppressive retinoids, required during the past 12-month period	60
		With either generalized cutaneous involvement or systemic manifestations, and; intermittent systemic medication, such as immunosuppressive retinoids, required for a total duration of six weeks or more, but not constantly, during the past 12-month period	30

	Rat- ing		Rat- ing
With localized or episodic cutaneous involvement and intermittent systemic medication, such as immunosuppressive retinoids, required for a total duration of less than six weeks during the past 12-month period	10	Or rate as disfigurement of the head, face, or neck (DC 7800) or scars (DC's 7801, 7802, 7803, 7804, or 7805), depending upon the predominant disability.	
No more than topical therapy required during the past 12-month period	0		
7825 Urticaria:		7829 Chloracne:	
Recurrent debilitating episodes occurring at least four times during the past 12-month period despite continuous immunosuppressive therapy	60	Deep acne (deep inflamed nodules and pus-filled cysts) affecting 40 percent or more of the face and neck	30
Recurrent debilitating episodes occurring at least four times during the past 12-month period, and; requiring intermittent systemic immunosuppressive therapy for control	30	Deep acne (deep inflamed nodules and pus-filled cysts) affecting less than 40 percent of the face and neck, or; deep acne other than on the face and neck	10
Recurrent episodes occurring at least four times during the past 12-month period, and; responding to treatment with antihistamines or sympathomimetics	10	Superficial acne (comedones, papules, pustules, superficial cysts) of any extent ..	0
7826 Vasculitis, primary cutaneous:		Or rate as disfigurement of the head, face, or neck (DC 7800) or scars (DC's 7801, 7802, 7803, 7804, or 7805), depending upon the predominant disability.	
Recurrent debilitating episodes occurring at least four times during the past 12-month period despite continuous immunosuppressive therapy	60	7830 Scarring alopecia:	
Recurrent debilitating episodes occurring at least four times during the past 12-month period, and; requiring intermittent systemic immunosuppressive therapy for control	30	Affecting more than 40 percent of the scalp	20
Recurrent episodes occurring one to three times during the past 12-month period, and; requiring intermittent systemic immunosuppressive therapy for control	10	Affecting 20 to 40 percent of the scalp	10
Or rate as disfigurement of the head, face, or neck (DC 7800) or scars (DC's 7801, 7802, 7803, 7804, or 7805), depending upon the predominant disability.		Affecting less than 20 percent of the scalp ..	0
7827 Erythema multiforme; Toxic epidermal necrolysis:		7831 Alopecia areata:	
Recurrent debilitating episodes occurring at least four times during the past 12-month period despite ongoing immunosuppressive therapy	60	With loss of all body hair	10
Recurrent episodes occurring at least four times during the past 12-month period, and; requiring intermittent systemic immunosuppressive therapy	30	With loss of hair limited to scalp and face	0
Recurrent episodes occurring during the past 12-month period that respond to treatment with antihistamines or sympathomimetics, or; one to three episodes occurring during the past 12-month period requiring intermittent systemic immunosuppressive therapy	10	7832 Hyperhidrosis:	
Or rate as disfigurement of the head, face, or neck (DC 7800) or scars (DC's 7801, 7802, 7803, 7804, or 7805), depending upon the predominant disability.		Unable to handle paper or tools because of moisture, and unresponsive to therapy	30
7828 Acne:		Able to handle paper or tools after therapy ..	0
Deep acne (deep inflamed nodules and pus-filled cysts) affecting 40 percent or more of the face and neck	30	7833 Malignant melanoma:	
Deep acne (deep inflamed nodules and pus-filled cysts) affecting less than 40 percent of the face and neck, or; deep acne other than on the face and neck	10	Rate as scars (DC's 7801, 7802, 7803, 7804, or 7805), disfigurement of the head, face, or neck (DC 7800), or impairment of function (under the appropriate body system).	
Superficial acne (comedones, papules, pustules, superficial cysts) of any extent ..	0	Note: If a skin malignancy requires therapy that is comparable to that used for systemic malignancies, <i>i.e.</i> , systemic chemotherapy, X-ray therapy more extensive than to the skin, or surgery more extensive than wide local excision, a 100-percent evaluation will be assigned from the date of onset of treatment, and will continue, with a mandatory VA examination six months following the completion of such antineoplastic treatment, and any change in evaluation based upon that or any subsequent examination will be subject to the provisions of § 3.105(e). If there has been no local recurrence or metastasis, evaluation will then be made on residuals. If treatment is confined to the skin, the provisions for a 100-percent evaluation do not apply.
