§ 407.10

Subpart F—Canned and Preserved Fruits Subcategory

407.60 Applicability; description of the canned and preserved fruits subcategory.

407.62 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

407.63 [Reserved]

407.64 Pretreatment standards for existing sources.

407.65 [Reserved]

407.66 Pretreatment standards for new sources.

407.67 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

Subpart G—Canned and Preserved Vegetables Subcategory

407.70 Applicability; description of the canned and preserved vegetables subcategory.

407.72 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

Subpart H—Canned and Miscellaneous Specialties Subcategory

407.80 Applicability; description of the canned and miscellaneous specialties subcategory.

407.82 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.84 Pretreatment standards for existing sources.

407.85 [Reserved]

407.86 Pretreatment standards for new sources.

407.88 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.90 Applicability; description of the canned and miscellaneous specialties subcategory.

407.92 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

407.93 [Reserved]

407.94 Pretreatment standards for existing sources.

407.95 [Reserved]

407.96 Pretreatment standards for new sources.

407.98 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available (BPT).

407.90 Applicability; description of the canned and miscellaneous specialties subcategory.

407.92 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

407.93 [Reserved]

407.94 Pretreatment standards for existing sources.

407.95 [Reserved]

407.96 Pretreatment standards for new sources.

407.98 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available (BPT).

407.92 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available (BPT).

407.94 Pretreatment standards for existing sources.

407.95 [Reserved]

407.96 Pretreatment standards for new sources.

407.98 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available (BPT).

407.10 Applicability; description of the apple juice subcategory.

407.12 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

407.14 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.16 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.18 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.20 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.22 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.24 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.26 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.28 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.30 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.32 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.34 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.36 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.38 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.40 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.42 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.44 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.46 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.48 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.50 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.52 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.54 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.56 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.58 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.60 Applicability; description of the canned and preserved fruits subcategory.

407.62 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

407.63 [Reserved]

407.64 Pretreatment standards for existing sources.

407.65 [Reserved]

407.66 Pretreatment standards for new sources.

407.67 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.70 Applicability; description of the canned and preserved vegetables subcategory.

407.72 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.73 [Reserved]

407.74 Pretreatment standards for existing sources.

407.75 [Reserved]

407.76 Pretreatment standards for new sources.

407.77 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.80 Applicability; description of the canned and miscellaneous specialties subcategory.

407.82 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.83 [Reserved]

407.84 Pretreatment standards for existing sources.

407.85 [Reserved]

407.86 Pretreatment standards for new sources.

407.88 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

407.90 Applicability; description of the canned and miscellaneous specialties subcategory.

407.92 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

407.93 [Reserved]

407.94 Pretreatment standards for existing sources.

407.95 [Reserved]

407.96 Pretreatment standards for new sources.

407.98 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available (BPT):
