### Standards of Performance for New Sources

The following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

| Effluent characteristic | Maximum for any 1 day | Average of daily values for 30 consecutive days shall not exceed—
<table>
<thead>
<tr>

¹ Within the range 6.0 to 9.0.

### Pretreatment Standards for New Sources

Any new source subject to this subpart that introduces process wastewater pollutants into a publicly owned treatment works must comply with 40 CFR part 403. In addition, the following pretreatment standards establishes the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged to a publicly owned treatment works by a new source subject to the provisions of this subpart.

(a) There shall be no discharge of waste water streams in which both the COD/BOD₇ ratio exceeds 10.0 and the COD exceeds 0.20 kg/kg of anhydrous product.

(b) For waste streams having either a ratio of COD to BOD₇ of 10.0 or less or a COD content of 0.20 kg/kg of anhydrous product or less the pretreatment standard shall be:

1/ Within the range 6.0 to 9.0.
