Environmental Protection Agency

§ 52.34 Action on petitions submitted under section 126 relating to emissions of nitrogen oxides.

(a) Definitions. For purposes of this section, the following definitions apply:

(1) Administrator means the Administrator of the United States Environmental Protection Agency or the Administrator’s duly authorized representative.

(2) Large Electric Generating Units (large EGUs) means:

(i) For units that commenced operation before January 1, 1997, a unit serving during 1995 or 1996 a generator that had a nameplate capacity greater than 25 MWe and produced electricity for sale under a firm contract to the electric grid.

for emission offsets under 42 U.S.C. 7501–7515 for NOx.

(iii) Notwithstanding paragraph (e)(1)(i) of this section, when a finding under paragraph (c) of this section is made with respect to PM–10, or the finding is not pollutant-specific, the State shall not apply the emissions offset requirements, at a ratio of at least 2-to-1 for emission reductions to increased emissions to PM–10 precursors if the Administrator has determined under 42 U.S.C. 7513a(e) that major stationary sources of PM–10 precursors do not contribute significantly to PM–10 levels which exceed the NAAQS in the affected area.

(iv) For purposes of applying the emissions offset requirement set forth in 42 U.S.C. 7503, at the 2-to-1 ratio required under this section, the State shall comply with the provisions of a State-adopted new source review (NSR) program that EPA has approved under 42 U.S.C. 7410(k)(3) as meeting the nonattainment area NSR requirements of 42 U.S.C. 7501–7515, as amended by the 1990 Amendments, or, if no plan has been so approved, the State shall comply directly with the nonattainment area NSR requirements specified in 42 U.S.C. 7501–7515, as amended by the 1990 Amendments, or cease issuing permits to construct and operate major new or modified sources as defined in those requirements. For purposes of applying the offset requirement under 42 U.S.C. 7503 where EPA has not fully approved a State’s NSR program as meeting the requirements of part D, the specifications of those provisions shall supersede any State requirement that is less stringent or inconsistent.

(v) For purposes of applying the emissions offset requirement set forth in 42 U.S.C. 7503, any permit required pursuant to 42 U.S.C. 7503 and issued on or after the date the offset sanction applies under paragraph (d) of this section shall be subject to the enhanced 2-to-1 ratio under paragraph (e)(1)(i) of this section.

(2) Highway funding sanction. The highway sanction shall apply, as provided in 42 U.S.C. 7509(b)(1), in the timeframe prescribed under paragraph (d) of this section on those affected areas subject under paragraph (d) of this section to the highway sanction, but shall apply only to those portions of affected areas that are designated nonattainment under 40 CFR part 81.

[50 FR 39859, Aug. 4, 1994]

§ 52.32 Sanctions following findings of SIP inadequacy.

For purposes of the SIP revisions required by §51.120, EPA may make a finding under section 179(a) (1)–(4) of the Clean Air Act, 42 U.S.C. 7509(a) (1)–(4), starting the sanctions process set forth in section 179(a) of the Clean Air Act. Any such finding will be deemed a finding under §52.31(c) and sanctions will be imposed in accordance with the order of sanctions and the terms for such sanctions established in §52.31.

[60 FR 4737, Jan. 24, 1995]

§ 52.33 Compliance certifications.

(a) For the purpose of submitting compliance certifications, nothing in this part or in a plan promulgated by the Administrator shall preclude the use, including the exclusive use, of any credible evidence or information, relevant to whether a source would have been in compliance with applicable requirements if the appropriate performance or compliance test had been performed.

(b) For all federal implementation plans, paragraph (a) of this section is incorporated into the plan.

(ii) For units that commenced operation on or after January 1, 1997 and before January 1, 1999, a unit serving at any time during 1997 or 1998 a generator that had a nameplate capacity greater than 25 MWe and produced electricity for sale under a firm contract to the electric grid.

(iii) For units that commence operation on or after January 1, 1999, a unit serving at any time a generator that has a nameplate capacity greater than 25 MWe and produces electricity for sale.

(3) Large Non-Electric Generating Units (large non-EGUs) means:

(i) For units that commenced operation before January 1, 1997, a unit that has a maximum design heat input greater than 250 mmBtu/hr and that did not serve during 1995 or 1996 a generator producing electricity for sale under a firm contract to the electric grid.

(ii) For units that commenced operation on or after January 1, 1997 and before January 1, 1999, a unit that has a maximum design heat input greater than 250 mmBtu/hr and that did not serve at any time during 1997 or 1998 a generator producing electricity for sale under a firm contract to the electric grid.

(iii) For units that commence operation on or after January 1, 1999, a unit with a maximum design heat input greater than 250 mmBtu/hr that:

(A) At no time serves a generator producing electricity for sale; or

(B) At any time serves a generator producing electricity for sale, if any such generator has a nameplate capacity of 25 MWe or less and has the potential to use 50 percent or less of the potential electrical output capacity of the unit.

(4) New sources means new and modified sources.

(5) NOX means oxides of nitrogen.

(6) OTAG means the Ozone Transport Assessment Group (active 1995–1997), a national work group that addressed the problem of ground-level ozone and the long-range transport of air pollution across the Eastern United States. The OTAG was a partnership between EPA, the Environmental Council of the States, and various industry and environmental groups.

(7) Ozone season means the period of time beginning May 1 of a year and ending on September 30 of the same year, inclusive.

(8) Potential electrical output capacity means, with regard to a unit, 33 percent of the maximum design heat input of the unit.

(9) Unit means a fossil-fuel fired stationary boiler, combustion turbine, or combined cycle system.

(b) Purpose and applicability. Paragraphs (c), (e)(1) and (e)(2), (g), and (h)(1) and (h)(2) of this section set forth the Administrator’s findings with respect to the 1-hour national ambient air quality standard (NAAQS) for ozone that certain new and existing sources of emissions of nitrogen oxides (“NOX”) in certain States emit or would emit NOX in violation of the prohibition in section 110(a)(2)(D)(i) of the Clean Air Act (CAA) on emissions in amounts that contribute significantly to nonattainment in certain States that submitted petitions in 1997–1998 addressing such NOX emissions under section 126 of the CAA. Paragraphs (d), (e)(3) and (e)(4), (f), and (h)(3) and (h)(4) of this section set forth the Administrator’s affirmative technical determinations with respect to the 8-hour NAAQS for ozone that certain new and existing sources of emissions of NOX in certain States emit or would emit NOX in violation of the prohibition in section 110(a)(2)(D)(i) of the CAA on emissions in amounts that contribute significantly to nonattainment in, or interfere with maintenance by, certain States that submitted petitions in 1997–1998 addressing such NOX emissions under section 126 of the CAA. (As used in this section, the term new source includes modified sources, as well.) Paragraph (i) of this section explains the circumstances under which the findings for sources in a specific State would be withdrawn. Paragraph (j) of this section sets forth the control requirements that apply to the sources of NOX emissions affected by the findings. Paragraph (k) of this section indefinitely stays the effectiveness of the affirmative technical determinations with respect to the 8-hour ozone standard.
§ 52.34

(1) The States that submitted such petitions are Connecticut, Maine, Massachusetts, New Hampshire, New York, Pennsylvania, Rhode Island, and Vermont (each of which, hereinafter in this section, may be referred to also as a "petitioning State").

(2) The new and existing sources of NOₓ emissions covered by the petitions that emit or would emit NOₓ emissions in amounts that make such significant contributions are large electric generating units (EGUs) and large non-EGUs.

(c) Section 126(b) findings relating to impacts on ozone levels in Connecticut—

(1) Section 126(b) findings with respect to the 1-hour ozone standard in Connecticut. The Administrator finds that any existing or new major source or group of stationary sources emits or would emit NOₓ in violation of the Clean Air Act section 110(a)(2)(d)(i) prohibition with respect to the 1-hour ozone standard in the State of Connecticut if it is or will be:

(i) In a category of large EGUs or large non-EGUs;

(ii) Located in one of the States (or portions thereof) listed in paragraph (c)(2) of this section; and

(iii) Within one of the “Named Source Categories” listed in the portion of Table F–1 in appendix F of this part describing the sources of NOₓ emissions covered by the petition of the State of Connecticut.

(2) States or portions of States that contain sources for which EPA is making an affirmative technical determination with respect to the 1-hour ozone standard in Connecticut. The States, or portions of States, that contain sources of NOₓ emissions for which the Administrator is making section 126(b) findings under paragraph (c)(1) of this section are:

(i) Delaware.

(ii) District of Columbia.

(iii) Kentucky located in OTAG Subregion 2, as shown in appendix F, Figure F–2, of this part.

(iv) Portion of Kentucky located in OTAG Subregion 6, as shown in appendix F, Figure F–2, of this part.

(v) Maryland.

(vi) Portion of Michigan located south of 44 degrees latitude in OTAG Subregion 2, as shown in appendix F, Figure F–2, of this part.

(vii) Portion of North Carolina located in OTAG Subregion 7, as shown in appendix F, Figure F–2, of this part.

(viii) New Jersey.

(ix) Portion of New York extending west and south of Connecticut, as shown in appendix F, Figure F–2, of this part.

(x) Ohio.

(xi) Pennsylvania.

(xii) Virginia.

(xiii) West Virginia.

(d) Affirmative technical determinations relating to impacts on ozone levels in Maine—

(1) Affirmative technical determinations with respect to the 8-hour ozone standard in Maine. The Administrator of EPA finds that any existing or new major source or group of stationary sources emits or would emit NOₓ in amounts that contribute significantly to nonattainment in the State of Maine, with respect to the 8-hour NAAQS for ozone if it is or will be:

(i) In a category of large EGUs or large non-EGUs;

(ii) Located in one of the States (or portions thereof) listed in paragraph (d)(2) of this section; and

(iii) Within one of the “Named Source Categories” listed in the portion of Table F–1 of appendix F of this part describing the sources of NOₓ emissions covered by the petition of the State of Maine.

(2) States or portions of States that contain sources for which EPA is making an affirmative technical determination with respect to the 8-hour ozone standard in Maine. The States that contain sources for which EPA is making an affirmative technical determination are:

(i) Connecticut.

(ii) Delaware.

(iii) District of Columbia.

(iv) Maryland.

(v) Massachusetts.

(vi) New Jersey.

(vii) New York.

(viii) Pennsylvania.

(ix) Rhode Island.

(x) Virginia.

(e) Section 126(b) findings and affirmative technical determinations relating to impacts on ozone levels in Massachusetts—

(1) Section 126(b) findings with respect to the 1-hour ozone standard in Massachusetts. The Administrator finds
that any existing major source or group of stationary sources emits NO\textsubscript{X} in violation of the Clean Air Act section 110(a)(2)(d)(i) prohibition with respect to the 1-hour ozone standard in the State of Massachusetts if it is:

(i) In a category of large EGUs or large non-EGUs;

(ii) Located in one of the States (or portions thereof) listed in paragraph (e)(2) of this section; and

(iii) Within one of the “Named Source Categories” listed in the portion of Table F–1 in appendix F of this part describing the sources of NO\textsubscript{X} emissions covered by the petition of the State of Massachusetts.

(2) States that contain sources for which the Administrator is making section 126(b) findings with respect to the 1-hour ozone standard in Massachusetts. The Administrator of EPA finds that any existing major source or group of stationary sources emits NO\textsubscript{X} in amounts that contribute significantly to nonattainment in, or interfere with maintenance by, the State of Massachusetts, with respect to the 1-hour NAAQS for ozone if it is:

(i) In a category of large EGUs or large non-EGUs;

(ii) Located in one of the States (or portions thereof) listed in paragraph (e)(2) of this section; and

(iii) Within one of the “Named Source Categories” listed in the portion of Table F–1 in appendix F of this part describing the sources of NO\textsubscript{X} emissions covered by the petition of the State of Massachusetts.

(4) States or portions of States that contain sources for which EPA is making an affirmative technical determination are:

(i) All counties in Ohio located within a 3-county-wide band of the Ohio River, as shown in appendix F, Figure F–4, of this part.

(ii) All counties in West Virginia located within a 3-county-wide band of the Ohio River, as shown in appendix F, Figure F–4, of this part.

(f) Affirmative technical determinations relating to impacts on ozone levels in New Hampshire—(1) Affirmative technical determinations with respect to the 8-hour ozone standard in New Hampshire. The Administrator of EPA finds that any existing or new major source or group of stationary sources emits or would emit NO\textsubscript{X} in amounts that contribute significantly to nonattainment in, or interfere with maintenance by, the State of New Hampshire, with respect to the 8-hour NAAQS for ozone if it is or will be:

(i) In a category of large EGUs or large non-EGUs;

(ii) Located in one of the States (or portions thereof) listed in paragraph (f)(2) of this section; and

(iii) Within one of the “Named Source Categories” listed in the portion of Table F–1 of appendix F of this part describing the sources of NO\textsubscript{X} emissions covered by the petition of the State of New Hampshire.

(2) States or portions of States that contain sources for which EPA is making an affirmative technical determination with respect to the 8-hour ozone standard in New Hampshire. The States that contain sources for which EPA is making an affirmative technical determination are:

(i) Connecticut.

(ii) Delaware.

(iii) District of Columbia.

(iv) Maryland.

(v) Massachusetts.

(vi) New Jersey.

(vii) New York.

(viii) Pennsylvania.

(ix) Rhode Island.

(g) Section 126(b) findings relating to impacts on ozone levels in the State of New York—(1) Section 126(b) findings with respect to the 1-hour ozone standard in the State of New York. The Administrator finds that any existing or new major source or group of stationary sources...
Environmental Protection Agency § 52.34

sources emits or would emit NO\textsubscript{X} in violation of the Clean Air Act section 110(a)(2)(d)(i) prohibition with respect to the 1-hour ozone standard in the State of New York if it is or will be:

(i) In a category of large EGUs or large non-EGUs;
(ii) Located in one of the States (or portions thereof) listed in paragraph (g)(2) of this section; and
(iii) Within one of the “Named Source Categories” listed in the portion of Table F–1 in appendix F of this part describing the sources of NO\textsubscript{X} emissions covered by the petition of the State of New York.

(2) States or portions of States that contain sources for which the Administrator is making section 126(b) findings with respect to the 1-hour ozone standard in Pennsylvania. The States that contain sources of NO\textsubscript{X} emissions for which the Administrator is making section 126(b) findings under paragraph (h)(1) of this section are:

(i) North Carolina.
(ii) Ohio.
(iii) Virginia.
(iv) West Virginia.

(3) Affirmative technical determinations with respect to the 8-hour ozone standard in Pennsylvania. The Administrator of EPA finds that any existing or new major source or group of stationary sources emits or would emit NO\textsubscript{X} in amounts that contribute significantly to nonattainment in, or interfere with maintenance by, the State of Pennsylvania, with respect to the 8-hour NAAQS for ozone:

(i) In a category of large EGUs or large non-EGUs;
(ii) Located in one of the States (or portions thereof) listed in paragraph (h)(4) of this section; and
(iii) Within one of the “Named Source Categories” listed in the portion of Table F–1 in appendix F of this part describing the sources of NO\textsubscript{X} emissions covered by the petition of the State of Pennsylvania.

(4) States or portions of States that contain sources for which EPA is making an affirmative technical determination with respect to the 8-hour ozone standard in Pennsylvania. The States that contain sources for which EPA is making an affirmative technical determination are:

(i) Alabama.
(ii) Illinois.
(iii) Indiana.
(iv) Kentucky.
(v) Michigan.
§ 52.35 What are the requirements of the Federal Implementation Plans (FIPs) for the Clean Air Interstate Rule (CAIR) relating to emissions of nitrogen oxides?

(a)(1) The Federal CAIR NO\textsubscript{X} Annual Trading Program provisions of part 97 of this chapter constitute the Clean Air Interstate Rule Federal Implementation Plan provisions that relate to annual emissions of nitrogen oxides (NO\textsubscript{X}). Each State that is described in §51.123(c)(1) and (2) of this chapter received a finding by the Administrator that the State failed to submit a State Implementation Plan (SIP) to satisfy the requirements of section 110(a)(2)(D)(i)(I) of the Clean Air Act for the PM\textsubscript{2.5} NAAQS. The provisions of subparts AA through II of part 97 of this chapter, regarding the CAIR NO\textsubscript{X} Annual Trading Program, apply to the sources in each of these States that has not promulgated a SIP approved by the Administrator as correcting that deficiency. Following promulgation of an approval by the Administrator of a State’s SIP as meeting the requirements of CAIR for PM\textsubscript{2.5} relating to NO\textsubscript{X} under §51.123 of this chapter, these provisions of part 97 of this chapter will no longer apply to the sources in that State, except to the extent the Administrator’s approval of the SIP is partial or conditional or unless such approval is under §51.123(p) of this chapter.

(b)(1) The Federal CAIR NO\textsubscript{X} Ozone Season Trading Program provisions of part 97 of this chapter constitute the Clean Air Interstate Rule Federal Implementation Plan provisions that relate to emissions of nitrogen oxides (NO\textsubscript{X}) during the ozone season, as defined in §97.302 of this chapter. Each State that is described in §51.123(c)(1) and (3) of this chapter received a finding by the Administrator that the State failed to submit a State Implementation Plan (SIP) to satisfy the requirements of section 110(a)(2)(D)(i)(I) of the Clean Air Act for the 8-hour ozone NAAQS. The provisions of subparts AAA through III of part 97 of this chapter, regarding the CAIR NO\textsubscript{X} Ozone Season Trading Program, apply to sources in each of these States that...
