Federal Property Management Regulations

§ 101–25.107

(1) For essential requirements arising from quantitative increases in onboard employment which constitute the total requirement of any agency or major component thereof (e.g., bureau, service, office).

(2) For essential requirements arising from a need not related to onboard employment increases but which are determined necessary to avoid impairment of program efficiency.

(b) Each agency shall restrict replacement of furniture or office machines either to usable excess, rehabilitated, or the least expensive new lines available which will meet the requirement under the following circumstances, authority for which shall be fully documented in the agency file:

(1) Where the agency determines that the item is not economically repairable.

(2) Where reductions in office space occupancy are accomplished through use of more convenient or smaller size furniture and the space economies thus achieved offset the cost of the furniture to be acquired.

§ 101–25.104–1 Redistribution, repair, or rehabilitation.

Prior to the purchase of new office furniture and office machines, agencies shall fulfill needs insofar as practicable through redistribution, repair, or rehabilitation of already owned furniture and office machines. In furtherance of the use of rehabilitated furniture and office machines, agencies shall review inventories on a continuing basis to ascertain those items which can be economically rehabilitated and institute programs for their orderly repair and rehabilitation. All such items which are not required for immediate needs shall be reported as excess.

[42 FR 1031, Jan. 5, 1977]

§ 101–25.105 [Reserved]

§ 101–25.106 Servicing of office machines.

(a) The determination as to whether office machines are to be serviced by use of annual maintenance contracts or per-call arrangements shall be made in each case after comparison of the relative cost affecting specific types of equipment in a particular location and consideration of the factors set forth in paragraph (b) of this section.

(b) Prior to making the determination required by paragraph (a) of this section, consideration shall be given to:

(1) Standard of performance required;

(2) Degree of reliability needed;

(3) Environmental factors; i.e., dusty surroundings or other unfavorable conditions;

(4) Proximity to available repair facilities;

(5) Past experience with service facility; i.e., reputation, performance record, quality of work, etc.;

(6) Daily use (heavy or light) and operator’s care of machine;

(7) Age and performance record of machine;

(8) Machine inventory in relation to operating needs; i.e., availability of reserve machine in case of breakdown;

(9) Number of machines; including overall frequency of repairs required;

(10) Security restrictions, if any; and

(11) Other pertinent factors.

[31 FR 14260, Nov. 4, 1966]

§ 101–25.107 Guidelines for requisitioning and proper use of consumable or low cost items.

Consumable and low value items in inventory (cupboard stocks are not considered inventory) are subject to accounting and inventory record controls in accordance with applicable provisions of law and the principles and standards prescribed by the General Accounting Office, 2 GAO 12.5. Normally, however, the systems of control for such property cease at the time of issuance from a warehouse or storeroom to the consumer.

(a) The guidelines set forth in this §101–25.107 are considered minimum to assure proper use of consumable or low cost items by individuals, subsequent to issue from accountable records and termination of formal accountability. Consumable items, for the purpose of this section, are considered to include those items actually consumed in use (e.g., pads and pencils) and those items
required in performance of duties but for which, primarily by reason of the low value involved, no formal accountability is maintained after issue, and are generally referred to as “expendable.”

(b) Approval of requisitions for replenishment of cupboard storeroom stocks should be restricted to officials at a responsible supervisory level to ensure that supply requirements are justified on the basis of essentiality and quantity. Where requisitions are not required, such as in obtaining items from GSA customer supply centers, informal “shopping lists” should be approved at the same level.

(c) Adequate safeguards and controls should be established to assure that issues of expendable supplies are made for official use only. In appropriate situations, this will include identification of individuals to whom expendable supplies have been issued. Experience has indicated, also, that certain items of expendables should not be displayed either at seasonal periods of the year or on a permanent basis.

(d) The items listed below have from experience proven to be personally attractive and particularly susceptible to being used for other than official duties. Agencies should give special attention to these and any other consumable or low cost items when issues are excessive when compared with normal program needs.

\begin{itemize}
  \item Attache cases
  \item Ball point pens and refills
  \item Brief cases
  \item Binders
  \item Carbon paper
  \item Dictionaries
  \item Felt tip markers
  \item Felt tip pens and refills
  \item File folders
  \item Letter openers
  \item Pads (paper)
  \item Paper clips
  \item Pencils
  \item Pencil sharpeners
  \item Portfolios (leather, plastic, and writing pads)
  \item Rubber bands
  \item Rulers
  \item Scissors
  \item Spray paint and lacquer
  \item Staplers
  \item Staples
  \item Staple removers
  \item Tape dispensers
  \item Transparent tape
  \item Typewriter ribbons
\end{itemize}

\section*{§ 101–25.108 Multiyear subscriptions for publications.}

Subscriptions for periodicals, newspapers, and other publications for which it is known in advance that a continuing requirement exists should be for multiple years rather than for a single year where such method is advantageous for the purpose of economy or otherwise. Where various bureaus or offices in the same agency are subscribing to the same publication, consideration shall be given to consolidating these requirements, to the extent practical, on an agency-wide basis and on a multiyear basis. Payment covering issues to be delivered during the entire subscription period may be made in advance from currently available appropriations (31 U.S.C. 530a).

\section*{§ 101–25.109 Laboratory and research equipment.}

(a) This section prescribes controls for use by Federal agencies in managing laboratory and research equipment in Federal laboratories. Agencies may establish such additional controls as are appropriate to increase the use of already-owned equipment instead of procuring similar equipment.

(b) The term Federal laboratory, as used in this section, means any laboratory or laboratory facility in any Government-owned or -leased building which is equipped and/or used for scientific research, testing, or analysis, except clinical laboratories operating in direct support of Federal health care programs. To the extent practicable, agencies should observe the provisions of this section with regard to commercial laboratories and laboratory facilities which operate under contract with the Government and use Government-furnished equipment.

\[43 \text{FR} 29004, \text{July 5, 1978}\]

\section*{§ 101–25.109–1 Identification of idle equipment.}

(a) The provisions of this §101–25.109–1 apply to all Federal laboratories regardless of size.

(b) Inspection tours of Federal laboratories shall be conducted on a scheduled basis, annually, if feasible, but no less than every 2 years, for the purpose of identifying idle and unneeded laboratory and research equipment. Following each tour, a report of findings shall be prepared by the inspection team and, as determined by the agency head or his designee,
