(2) Consult with cooperating agencies in setting time limits; and
(3) Encourage cooperating agencies to meet established time frames.
(b) Time limits should reflect the availability of Department and bureau personnel and funds. Efficiency of the NEPA process is dependent on the management capabilities of the lead bureau, which must assemble an interdisciplinary team and/or qualified staff appropriate to the type of project to be analyzed to ensure timely completion of NEPA documents.

Subpart D—Environmental Assessments

§ 46.300 Purpose of an environmental assessment and when it must be prepared.

The purpose of an environmental assessment is to allow the Responsible Official to determine whether to prepare an environmental impact statement or a finding of no significant impact.

(a) A bureau must ensure that an environmental assessment is prepared for all proposed Federal actions, except those:
(1) That are covered by a categorical exclusion;
(2) That are covered sufficiently by an earlier environmental document as determined and documented by the Responsible Official; or
(3) For which the bureau has already decided to prepare an environmental impact statement.

(b) A bureau may prepare an environmental assessment for any proposed action at any time to:
(1) Assist in planning and decision-making;
(2) Further the purposes of NEPA when no environmental impact statement is necessary; or
(3) Facilitate environmental impact statement preparation.

§ 46.305 Public involvement in the environmental assessment process.

(a) The bureau must, to the extent practicable, provide for public notification and public involvement when an environmental assessment is being prepared. However, the methods for providing public notification and opportunities for public involvement are at the discretion of the Responsible Official.

(1) The bureau must consider comments that are timely received, whether specifically solicited or not.
(2) Although scoping is not required, the bureau may apply a scoping process to an environmental assessment.

(b) Publication of a “draft” environmental assessment is not required. Bureaus may seek comments on an environmental assessment if they determine it to be appropriate, such as when the level of public interest or the uncertainty of effects warrants, and may revise environmental assessments based on comments received without need of initiating another comment period.

(c) The bureau must notify the public of the availability of an environmental assessment and any associated finding of no significant impact once they have been completed. Comments on a finding of no significant impact do not need to be solicited, except as required by 40 CFR 1501.4(e)(2).

(d) Bureaus may allow cooperating agencies (as defined in § 46.225) to participate in developing environmental assessments.

§ 46.310 Contents of an environmental assessment.

(a) At a minimum, an environmental assessment must include brief discussions of:
(1) The proposal;
(2) The need for the proposal;
(3) The environmental impacts of the proposed action;
(4) The environmental impacts of the alternatives considered; and
(5) A list of agencies and persons consulted.

(b) When the Responsible Official determines that there are no unresolved conflicts about the proposed action with respect to alternative uses of available resources, the environmental assessment need only consider the proposed action and does not need to consider additional alternatives, including the no action alternative. (See section 102(2)(E) of NEPA).

(c) In addition, an environmental assessment may describe a broader range of alternatives to facilitate planning and decision-making.
