authorized by the Federal Coal Leasing Amendments Act, consists of an environmental assessment or impact statement, public participation as required by §1610.2 of this title, the consultation and consistency determinations required by §1610.3 of this title, the protest procedure prescribed by §1610.5–2 of this title and a decision on the coal lease proposal. A land use analysis meets the planning requirements of section 202 of the Federal Land Policy and Management Act. The decision to approve the land use analysis and to lease coal is made by the Departmental official who has been delegated the authority to issue coal leases.

§ 1610.6 Management decision review by Congress.

The Federal Land Policy and Management Act requires that any Bureau of Land Management management decision or action pursuant to a management decision which totally eliminates one or more principal or major uses for 2 or more years with respect to a tract of 100,000 acres or more, shall be reported by the Secretary to Congress before it can be implemented. This report shall not be required prior to approval of a resource management plan which, if fully or partially implemented, would result in such an elimination. The required report shall be submitted as the first action step in implementing that portion of a resource management plan which would require elimination of such a use.

§ 1610.7 Designation of areas of critical environmental concern.

(a)(1) The inventory data shall be analyzed to determine whether there are areas containing resources, values, systems or processes or hazards eligible for further consideration for designation as an ACEC.

(b)(1) The resource management planning process is the chief process by which public lands are reviewed for designation as unsuitable for entry or leasing for mining operations for minerals and materials other than coal under section 601 of the Surface Mining Control and Reclamation Act.

(2) When petitions to designate lands unsuitable under section 601 of the Surface Mining Control and Reclamation Act are received by the Bureau of Land Management, the resource management plan, if available, shall be the basis for determinations for designation.

(3) After a resource management plan or plan amendment in which lands are designated unsuitable is approved, the Field Manager shall take all necessary steps to implement the results of the unsuitability review as it applies to minerals or materials other than coal.
