Coast Guard, Dept. of Homeland Security

§ 57.02–5

(c) When a paragraph or a section of the regulations in this part relates to material in section IX of the ASME Code, the relationship with the code will be shown immediately following the heading of the section or at the beginning of the paragraph as follows:

(1) (Modifies Q ___.) This indicates that the material in Q ___ is generally applicable but is being altered, amplified or augmented.

(2) (Replaces Q ___.) This indicates that Q ___ does not apply.

(3) (Reproduces Q ___.) This indicates that Q ___ is being identically reproduced for convenience, not for emphasis.

§ 57.02–3 Performance qualifications issued by other agencies.

(a) Within the limits of the qualification tests passed, the Officer in Charge, Marine Inspection, may accept welders who have been qualified by other agencies of the Federal Government; by the American Bureau of Shipping; or by the fabricator concerned, provided the fabricator’s tests have been certified by an authorized Code inspector as defined in paragraphs PG–91, N–612, HG–515.2, or UG–91 of the ASME Code.

§ 57.02–6 Filler metals.

(a) Except as provided for in paragraph (b) of this section, when filler metal is used in a welded fabrication that is required to meet the requirements of this part the filler metal must be one that has been approved by the American Bureau of Shipping.

(b) In instances where a fabricator desires to use a filler metal which has not been approved by the American Bureau of Shipping the approval of the filler metal can be made by the Officer in Charge, Marine Inspection on the basis of the fabricator passing the weld procedure qualification tests as outlined in this part. This alternate means of approval applies to wire-gas and wire-flux combinations as well as to stick electrodes. Filler metal approvals given in this manner will extend only to the specific fabricator to whom they are granted.
