§ 107.267 Special examination in lieu of drydocking for self-elevating units.

(a) A self-elevating unit must be specially examined in accordance with a plan—
   (1) Submitted in accordance with paragraph (b) of this section; and
   (2) Approved by the Commandant (CG–543).

(b) To meet the requirements in paragraph (a) of this section, the owner or operator of the unit must submit a plan to the Commandant (G-MOC) that provides for—
   (1) Examination of the unit’s hull while it is in the elevated position; and
   (2) Examination of the supporting mat, spud cans, or footings while the unit is afloat.

(c) The plan required in paragraph (b) of this section must contain the following information:
   (1) The planned location where the unit is to be examined.
   (2) The methods to be used to conduct the hull examination.
   (3) The method of visual presentation for examination of the underwater components.
   (4) The methods of determining the condition of the underwater components.
   (5) The underwater high stress areas and the welds in those areas that are to be examined.
   (6) The names of the diver or diving company selected for the examination.

§ 107.269 Annual inspection.

(a) Your mobile offshore drilling unit (MODU) must undergo an annual inspection within the 3 months before or after each anniversary date, except as specified in §107.270.

(b) You must contact the cognizant OCMI to schedule an inspection at a time and place which he or she approves. No written application is required.

(c) The scope of the annual inspection is the same as the inspection for certification as specified in §107.231, except §107.231(x) and (y), but in less detail unless the cognizant OCMI finds deficiencies or determines that a major change has occurred since the last inspection. If deficiencies are found or a major change to the MODU has occurred, the OCMI will conduct an inspection more detailed in scope to ensure that the MODU is in satisfactory condition and fit for the service for which it is intended. If your MODU passes the annual inspection, the OCMI will endorse your current Certificate of Inspection.

(d) If the annual inspection reveals deficiencies in your MODU’s maintenance, you must make any or all repairs or improvements within the time period specified by the OCMI.

(e) Nothing in this subpart limits the marine inspector from conducting such tests or inspections he or she deems necessary to be assured of the vessel’s seaworthiness.

§ 107.270 Periodic inspection.

(a) Your vessel must undergo a periodic inspection within 3 months before or after the second or third anniversary of the date of your vessel’s Certificate of Inspection. This periodic inspection will take the place of an annual inspection.

(b) You must contact the cognizant OCMI to schedule an inspection at a time and place which he or she approves. No written application is required.

(c) The scope of the periodic inspection is the same as that for the inspection for certification, as specified in
§ 107.231 except §107.231(x) and (y). The OCMI will insure that the MODU is in satisfactory condition and fit for the service for which it is intended. If your MODU passes the periodic inspection, the marine inspector will endorse your current Certificate of Inspection.

(d) If the periodic inspection reveals deficiencies in your MODU’s maintenance, you must make any or all repairs or improvements within the time period specified by the OCMI.

(e) Nothing in this subpart limits the marine inspector from conducting such tests or inspections he or she deems necessary to be assured of the vessel’s seaworthiness.

§ 107.271 Inspection: Alterations.

After plans are approved for alterations affecting the safety of the unit the Coast Guard conducts inspections of the affected—

(a) Hull;
(b) Machinery; or
(c) Equipment.

§ 107.275 Other inspections.

When the Coast Guard receives the report required in §109.411 or §109.425, the Coast Guard conducts the following inspections of a unit to determine if the unit meets the requirements under which it was issued its original Certificate of Inspection:

(a) An inspection after an accident.
(b) An inspection after a defect is found that affects—
(1) The seaworthiness of the unit; or
(2) The safety or efficiency of a life-saving device, or firefighting device.
(c) An inspection of repairs made because of an accident or a defect.

§ 107.279 Certificate of Inspection: Failure to meet requirements.

If a unit fails to meet the requirements in §107.231, the Coast Guard may—

(a) Withhold issuance of an original Certificate of Inspection after an original inspection for certification, until the unit meets the requirements in §107.231;
(b) Withhold renewal of the Certificate of Inspection until the MODU meets the requirements of §107.231, except §107.231(x) and (y).
(c) Suspend a valid Certificate of Inspection after an annual or periodic inspection until the MODU meets the requirements of §107.231, except §107.231(x) and (y).
(d) Revoke a valid Certificate of Inspection after an annual or periodic inspection if the unit operates without complying with Coast Guard orders to correct unlawful conditions.
(e) Revoke or suspend an unexpired Certificate of Inspection;
(f) Withhold issuance of a safety equipment certificate;
(g) Withhold renewal of safety equipment certificate;
(b) Suspend an unexpired safety equipment certificate;
(i) Revoke an unexpired safety equipment certificate; and
(j) Withhold, suspend, or revoke an exemption certificate.

§ 107.283 Certificate of Inspection: Conditions of validity.

To maintain a valid Certificate of Inspection, you must complete your annual and periodic inspections within the periods specified in §§107.269 and 107.270 and your Certificate of Inspection must be endorsed.

Subpart C—Plan Approval

§ 107.301 Purpose.

This subpart prescribes procedures for submitting plans and specifications for plan approval and describes the information that must be submitted.

§ 107.305 Plans and information.

Each applicant for approval of plans must submit three copies of each of the following described plans, specifications, and structural calculations concerning the construction, arrangement, required equipment, and safety features of the unit:

GENERAL

(a) Specifications.
