boundary must not exceed the greater of $-73.0 + 10 \log(X/6)$ dBW/m², where $X$ is the bandwidth in megahertz of the channel, or for facilities that are substantially similar to the licensee’s pre-transition facilities (including modifications that do not alter the fundamental nature or use of the transmissions), the signal strength at such point that resulted from the station’s operations immediately prior to the transition, provided that such operations complied with paragraph (a)(4)(i) of this section.

(b) Power flux density limit for stations operating in the 698–746 MHz bands. For base and fixed stations operating in the 698–746 MHz band in accordance with the provisions of §27.50(c)(6), the power flux density that would be produced by such stations through a combination of antenna height and vertical gain pattern must not exceed 3000 microwatts per square meter on the ground over the area extending to 1 km from the base of the antenna mounting structure.

(c) Power flux density limit for stations operating in the 746–757 MHz, 758–763 MHz, 776–787 MHz, and 788–793 MHz bands. For base and fixed stations operating in the 746–757 MHz, 758–763 MHz, 776–787 MHz, and 788–793 MHz bands in accordance with the provisions of §27.50(b)(6), the power flux density that would be produced by such stations through a combination of antenna height and vertical gain pattern must not exceed 3000 microwatts per square meter on the ground over the area extending to 1 km from the base of the antenna mounting structure.

§ 27.57 International coordination.

(a) WCS operations in the border areas shall be subject to coordination with those countries and provide protection to non-U.S. operations in the 2305–2320 and 2345–2360 MHz bands as appropriate. In addition, satellite DARS operations in WCS spectrum shall be subject to international satellite coordination procedures.

(b) Operation in the 698–763 MHz, 775–793 MHz, and 805–806 MHz bands is subject to international agreements between Mexico and Canada. Unless otherwise modified by international treaty, licenses must not cause interference to, and must accept harmful interference from, television broadcast operations in Mexico and Canada.
