Federal Communications Commission

§ 80.116

Radiotelephone operating procedures for ship stations.

(a) Calling coast stations. (1) Use by ship stations of the frequency 2182 kHz for calling coast stations and for replying to calls from coast stations is authorized. However, such calls and replies should be made on the appropriate ship-shore working frequency.

(b) Use by ship stations and marine utility stations of the frequency 156.800 MHz for calling coast stations and marine utility stations on shore, and for replying to calls from such stations, is authorized. However, such calls and replies should be made on the appropriate ship-shore working frequency.
