

MARCH [YEAR TO BE INSERTED]

COMPARISON OF DIFFERENCES IN INSURANCE COSTS FOR PASSENGER CARS, STATION WAGONS/PASSENGER VANS, PICKUPS AND UTILITY VEHICLES ON THE BASIS OF DAMAGE SUSCEPTIBILITY

The National Highway Traffic Safety Administration (NHTSA) has provided the information in this booklet in compliance with Federal law as an aid to consumers considering the purchase of a new vehicle. The booklet compares differences in insurance costs for different makes and models of passenger cars, station wagons/passenger vans, pickups, and utility vehicles on the basis of damage susceptibility. However, it does not indicate a vehicle's relative safety.

The following table contains the best available information regarding the effect of damage susceptibility on insurance premiums. It was taken from data compiled by the Highway Loss Data Institute (HLDI) in its December [YEAR TO BE INSERTED] *Insurance Collision Report*, and reflects the collision loss experience of passenger cars, utility vehicles, light trucks, and vans sold in the United States in terms of the average loss payment per insured vehicle year for [THREE APPROPRIATE YEARS TO BE INSERTED]. NHTSA has not verified the data in this table.

The table represents vehicles' collision loss experience in relative terms, with 100 representing the average for all passenger vehicles. Thus, a rating of 122 reflects a collision loss experience that is 22 percent higher (worse) than average, while a rating of 96 reflects a collision loss experience that is 4 percent lower (better) than average. The table is not relevant for models that have been substantially redesigned for [YEAR TO BE INSERTED], and it does not include information about models without enough claim experience.

Although many insurance companies use the HLDI information to adjust the "base rate" for the collision portion of their insurance premiums, the amount of any such adjustment is usually small. It is unlikely that your total premium will vary more than ten percent depending upon the collision loss experience of a particular vehicle.

If you do not purchase collision coverage or your insurance company does not use the HLDI information, your premium will not vary at all in relation to these rankings.

In addition, different insurance companies often charge different premiums for the same driver and vehicle. Therefore, you should contact insurance companies or their agents directly to determine the actual premium that you will be charged for insuring a particular vehicle.

PLEASE NOTE: In setting insurance premiums, insurance companies mainly rely on factors that are not directly related to the vehicle itself (except for its value). Rather, they mainly consider driver characteristics (such as age, gender, marital status, and driving record), the geographic area in which the vehicle is driven, how many miles are traveled, and how the vehicle is used. Therefore, to obtain complete information about insurance premiums, you should contact insurance companies or their agents directly.

Insurance companies do not generally adjust their premiums on the basis of data reflecting the crashworthiness of different vehicles. However, some companies adjust their premiums for personal injury protection and medical payments coverage if the insured vehicle has features that are likely to improve its crashworthiness, such as air bags and automatic seat belts.

Test data relating to vehicle crashworthiness and rollover ratings are available from NHTSA's New Car Assessment Program (NCAP). NCAP test results demonstrate relative frontal and side crash protection in new vehicles, and relative rollover resistance. Information on vehicles that NHTSA has tested in the NCAP program can be obtained from <http://www.safercar.gov> or by calling NHTSA's toll-free Vehicle Safety Hotline at 1-888-327-4236 (TTY: 1-800-424-9153).

[Insert Table To Be Published Each March by the National Highway Traffic Safety Administration]

If you would like more details about the information in this table, or wish to obtain the complete Insurance Collision Report, please contact HLDI directly, at: Highway Loss Data Institute, 1005 North Glebe Road, Arlington, VA 22201, Tel: (703) 247-1600.

PART 583—AUTOMOBILE PARTS CONTENT LABELING

Sec.

- 583.1 Scope.
- 583.2 Purpose.
- 583.3 Applicability.
- 583.4 Definitions.
- 583.5 Label requirements.
- 583.6 Procedure for determining U.S./Canadian parts content.
- 583.7 Procedure for determining major foreign sources of passenger motor vehicle equipment.
- 583.8 Procedure for determining country of origin for engines and transmissions (for purposes of determining the information specified by §§ 583.5(a)(4) and 583.5(a)(5) only).

- 583.9 Attachment and maintenance of label.
- 583.10 Outside suppliers of passenger motor vehicle equipment.
- 583.11 Allied suppliers of passenger motor vehicle equipment.
- 583.12 Suppliers of engines and transmissions.
- 583.13 Supplier certification and certificates.
- 583.14 Currency conversion rate.
- 583.15 Joint ownership.
- 583.16 Maintenance of records.
- 583.17 Reporting.

AUTHORITY: 49 U.S.C. 32304, 49 CFR 1.50, 501.2(f).

SOURCE: 59 FR 37330, July 21, 1994, unless otherwise noted.

§ 583.1 Scope.

This part establishes requirements for the disclosure of information relating to the countries of origin of the equipment of new passenger motor vehicles.

§ 583.2 Purpose.

The purpose of this part is to aid potential purchasers in the selection of new passenger motor vehicles by providing them with information about the value of the U.S./Canadian and foreign parts content of each vehicle, the countries of origin of the engine and transmission, and the site of the vehicle's final assembly.

§ 583.3 Applicability.

This part applies to manufacturers of new passenger motor vehicles manufactured or imported for sale in the United States, suppliers of passenger motor vehicle equipment, and dealers of new passenger motor vehicles.

§ 583.4 Definitions.

(a) *Statutory terms.* The terms *allied supplier, carline, country of origin, dealer, foreign content, manufacturer, new passenger motor vehicle, of U.S./Canadian origin, outside supplier, passenger motor vehicle, passenger motor vehicle equipment, percentage (by value), State, and value added in the United States and Canada*, defined in 49 U.S.C. 32304(a), are used in accordance with their statutory meanings except as further defined in paragraph (b) of this section.

(b) *Other terms and further definitions.*

(1) *Administrator* means the Administrator of the National Highway Traffic Safety Administration.

(2) *Allied supplier* means a supplier of passenger motor vehicle equipment that is wholly owned by the manufacturer, or in the case of a joint venture vehicle assembly arrangement, any supplier that is wholly owned by one member of the joint venture arrangement. A supplier is considered to be wholly owned by the manufacturer if a common parent company owns both the manufacturer and the supplier, or if a group of related companies own both the manufacturer and the supplier and no outside interests (interests other than the manufacturer itself or companies which own the manufacturer) own the supplier.

(3) *Carline* means a name denoting a group of vehicles which has a degree of commonality in construction (*e.g.*, body, chassis). Carline does not consider any level of decor or opulence and is not generally distinguished by such characteristics as roof line, number of doors, seats, or windows, except for light duty trucks. Carline is not distinguished by country of manufacture, final assembly point, engine type, or driveline. Light duty trucks are considered to be different carlines than passenger cars. A carline includes all motor vehicles of a given nameplate. Special purpose vehicles, vans, and pickup trucks are classified as separate carlines.

(4) *Final assembly* means all operations involved in the assembly of a vehicle, performed at the final assembly point including but not limited to assembly of body panels, painting, final chassis assembly, trim installation, except engine and transmission fabrication and assembly and the fabrication of motor vehicle equipment components produced at the same final assembly point using forming processes such as stamping, machining or molding processes.

(5) *Final assembly point* means the plant, factory, or other place, which is a building or series of buildings in close proximity, where a new passenger motor vehicle is produced or assembled from passenger motor vehicle equipment and from which such vehicle is delivered to a dealer or importer in
