Fishery Conservation and Management

§ 648.24 Framework adjustments to management measures.

(a) Within season management action.

The Council, at any time, may initiate action to add or adjust management measures within the Atlantic Mackeral, Squid, and Butterfish FMP if it finds that action is necessary to meet
or be consistent with the goals and objectives of the plan.

(1) Adjustment process. The Council shall develop and analyze appropriate management actions over the span of at least two Council meetings. The Council must provide the public with advance notice of the availability of the recommendation(s), appropriate justification(s) and economic and biological analyses, and the opportunity to comment on the proposed adjustment(s) at the first meeting and prior to and at the second Council meeting. The Council’s recommendations on adjustments or additions to management measures must come from one or more of the following categories: Minimum fish size, maximum fish size, gear restrictions, gear requirements or prohibitions, permitting restrictions, recreational possession limit, recreational seasons, closed areas, commercial seasons, commercial trip limits, commercial quota system including commercial quota allocation procedure and possible quota set aside to mitigate bycatch, recreational harvest limit, annual specification quota setting process, FMP Monitoring Committee composition and process, description and identification of EFH (and fishing gear management measures that impact EFH), description and identification of habitat areas of particular concern, overfishing definition and related thresholds and targets, regional gear restrictions, regional season restrictions (including option to split seasons), restrictions on vessel size (LOA and GRT) or shaft horsepower, changes to the Northeast Region SBRM (including the CV-based performance standard, the means by which discard data are collected/obtained, fishery stratification, reports, and/or industry-funded observers or observer set-aside programs), any other management measures currently included in the FMP, set aside quota for scientific research, regional management, and process for inseason adjustment to the annual specification.

(2) Council recommendation. After developing management actions and receiving public testimony, the Council shall make a recommendation to the Regional Administrator. The Council’s recommendation must include supporting rationale, if management measures are recommended, an analysis of impacts, and a recommendation to the Regional Administrator on whether to issue the management measures as a final rule. If the Council recommends that the management measures should be issued as a final rule, the Council must consider at least the following factors, and provide support and analysis for each factor considered:

(i) Whether the availability of data on which the recommended management measures are based allows for adequate time to publish a proposed rule, and whether the regulations would have to be in place for an entire harvest/fishing season.

(ii) Whether there has been adequate notice and opportunity for participation by the public and members of the affected industry in the development of the recommended management measures.

(iii) Whether there is an immediate need to protect the resource.

(iv) Whether there will be a continuing evaluation of management measures following their implementation as a final rule.

(3) NMFS action. If the Council’s recommendation includes adjustments or additions to management measures and, after reviewing the Council’s recommendation and supporting information:

(i) If NMFS concurs with the Council’s recommended management measures and determines that the recommended management measures should be issued as a final rule based on the factors specified in paragraph (a)(2) of this section, the measures will be issued as a final rule in the FEDERAL REGISTER.

(ii) If NMFS concurs with the Council’s recommended management measures and determines that the recommended management measures should be published first as a proposed rule, the measures will be published as a proposed rule in the FEDERAL REGISTER. After additional public comment, if NMFS concurs with the Council recommendation, the measures will be issued as a final rule in the FEDERAL REGISTER.
(iii) If NMFS does not concur, the Council will be notified in writing of the reasons for the non-concurrence.

(4) Emergency actions. Nothing in this section is meant to derogate from the authority of the Secretary to take emergency action under section 305(e) of the Magnuson-Stevens Act.

(b) [Reserved]

Effective date note: At 76 FR 60619, Sept. 29, 2011, §648.19 was revised, effective October 31, 2011. For the convenience of the user, the revised text is set forth as follows:

§ 648.24 Fishery closures and accountability measures.

(a) Fishery closure procedures—(1) Loligo. NMFS shall close the directed fishery in the EEZ for Loligo when the Regional Administrator projects that 90 percent of the Loligo quota is harvested in Trimesters I and II, and when 95 percent of the Loligo DAH has been harvested in Trimester III. The closure of the directed fishery shall be in effect for the remainder of that fishing period, with incidental catches allowed as specified at §648.26.

(1) If the Regional Administrator determines that the Trimester I closure threshold has been under-harvested by 25 percent or more, then the amount of the underharvest shall be reallocated to Trimester II and Trimester III, as specified at §648.22(f)(2), through notice in the FEDERAL REGISTER.

(ii) [Reserved]

(2) Illex. NMFS shall close the directed Illex fishery in the EEZ when the Regional Administrator projects that 95 percent of the Illex DAH has been harvested. The closure of the directed fishery shall be in effect for the remainder of that fishing period, with incidental catches allowed as specified at §648.26.

(b) Mackerel AMs. (1) Mackerel commercial sector EEZ closure. NMFS shall close the commercial mackerel fishery in the EEZ when the Regional Administrator projects that 90 percent of the mackerel DAH is harvested. If such a closure is necessary to prevent the DAH from being exceeded, the closure of the commercial fishery shall be in effect for the remainder of that fishing year, with incidental catches allowed as specified in §648.26. When the Regional Administrator projects that the DAH for mackerel shall be landed, NMFS shall close the commercial mackerel fishery in the EEZ, and the incidental catches specified for mackerel in §648.26 will be prohibited.

(2) Mackerel commercial landings overage repayment. If the mackerel ACL is exceeded, and commercial fishery landings are responsible for the overage, then landings in excess of the DAH will be deducted from the DAH the following year, as a single-year adjustment to the DAH.

(3) Mackerel recreational sector EEZ closure. NMFS shall close the recreational mackerel fishery in the EEZ when the Regional Administrator determines that recreational landings have exceeded the RHL. This determination shall be based on observed landings and will not utilize projections of future data.

(4) Mackerel recreational landings overage repayment. If the mackerel ACL is exceeded, and the recreational fishery landings are responsible for the overage, then landings in excess of the RHL will be deducted from the RHL for the following year, as a single-year adjustment.

(5) Non-landing AMs, by sector. In the event that the ACL is exceeded, and that the overage has not been accommodated through other landing-based AMs, but is attributable to either the commercial or recreational sector (such as research quota overages, dead discards in excess of those otherwise accounted for in management uncertainty, or other non-landing overages), then the exact amount, in pounds, by which the sector ACT was exceeded will be deducted from the following year, as a single-year adjustment.

(6) Mackerel ACL overage evaluation. The ACL will be evaluated based on a single-year examination of total catch (landings and discards). Both landings and dead discards will be evaluated in determining if the ACL has been exceeded. NMFS shall make determinations about overages and implement any changes to the ACL, in accordance with the Administrative Procedure Act, through notification in the FEDERAL REGISTER, by March 31 of the fishing year in which the deductions will be made.

(c) Butterfish AMs—(1) Butterfish EEZ closure. NMFS shall close the directed butterfish fishery in the EEZ when the Regional Administrator projects that 80 percent of the butterfish DAH has been harvested. The closure of the directed fishery shall be in effect for the remainder of that fishing year, with incidental catches allowed as specified at §648.26.

(2) Butterfish ACL overage repayment. If the butterfish ACL is exceeded, then catch in excess of the ACL will be deducted from the ACL the following year, as a single-year adjustment.

(3) Butterfish mortality cap on the Loligo fishery. NMFS shall close the directed fishery in the EEZ for Loligo when the Regional Administrator projects that 80 percent of the butterfish mortality cap has been harvested in Trimester I, and/or when 90 percent of the butterfish mortality cap has been harvested in Trimester III.

(4) Butterfish ACL overage evaluation. The ACL will be evaluated based on a single-year examination of total catch (landings and discards). Both landings and dead discards will
§ 648.25 Possession restrictions.

(a) Atlantic mackerel. During a closure of the directed Atlantic mackerel fishery that occurs prior to June 1, vessels may not fish for, possess, or land more than 20,000 lb (9.08 mt) of Atlantic mackerel per trip at any time, and may only land Atlantic mackerel once on any calendar day, which is defined as the 24-hr period beginning at 0001 hours and ending at 2400 hours. During a closure of the directed fishery for mackerel that occurs on or after June 1, vessels may not fish for, possess, or land more than 250 lb (0.11 mt) of Atlantic mackerel per trip at any time, and may only land Atlantic mackerel once on any calendar day.

(b) Loligo. During a closure of the directed fishery for Loligo, vessels may not fish for, possess, or land more than 2,500 lb (1.13 mt) of Loligo per trip at any time, and may only land Loligo once on any calendar day.

(c) Illex. During a closure of the directed fishery for Illex, vessels may not fish for, possess, or land more than 10,000 lb (4.54 mt) of Illex per trip at any time, and may only land Illex once on any calendar day. If a vessel has been issued an Illex incidental catch permit (as specified at §648.4(a)(5)(ii)), then it may not fish for, possess, or land more than 10,000 lb (4.54 mt) of Illex per trip at any time, and may only land Illex once on any calendar day.

(d) Butterfish. (1) During a closure of the directed fishery for butterfish that occurs prior to October 1, vessels may not fish for, possess, or land more than 250 lb (0.11 mt) of butterfish per trip at any time, and may only land butterfish once on any calendar day. If a vessel has been issued a butterfish incidental catch permit (as specified at §648.4(a)(5)(ii)), then it may not fish for, possess, or land more than 600 lb (0.27 mt) of butterfish per trip at any time, and may only land butterfish once on any calendar day.

During a closure of the directed fishery for butterfish that occurs after October 1, vessels may not fish for, possess, or land more than 600 lb (0.27 mt) of butterfish per trip at any time, and may only land butterfish once on any calendar day.

Within season management action. The MAFMC may, at any time, initiate action to be evaluated in determining if the ACL has been exceeded. NMFS shall make determinations about overages and implement any changes to the ACL, in accordance with the Administrative Procedure Act, through notification in the Federal Register, by March 31 of the fishing year in which the deductions will be made.

(d) Notification. Upon determining that a closure is necessary, the Regional Administrator will notify, in advance of the closure, the Executive Directors of the MAFMC, NEFMC, and SAFMC; mail notification of the closure to all holders of mackerel, squid, and butterfish fishery permits; and publish notification of closure in the Federal Register.

§ 648.25 Atlantic Mackerel, squid, and butterfish framework adjustments to management measures.

(a) Within season management action. The MAFMC may, at any time, initiate action to
