not notify the State in writing within 30 days of receipt of the State’s recommendation.

(3) If the State determines that a CDP has not successfully met its goals and objectives or appears unlikely to become successful, the State may submit a recommendation to NMFS that the CDP be partially suspended, suspended, or terminated. The State must set out, in writing, the reasons for recommending suspension or termination of the CDP.

(4) After review of the State’s recommendation and reasons thereof, NMFS will notify the Governor, in writing, of approval or disapproval of the recommendation within 30 days of its receipt. In the case of suspension or termination, NMFS will publish notification in the FEDERAL REGISTER, with reasons thereof.

§ 679.31 CDQ and PSQ reserves.

Portions of the CDQ and PSQ reserves for each subarea or district may be allocated for the exclusive use of CDQ groups in accordance with CDPs approved by the Governor in consultation with the Council and approved by NMFS. NMFS will allocate no more than 33 percent of each CDQ reserve to any one group with an approved CDP.

(a) CDQ and PSQ reserves—(1) Groundfish CDQ reserves. See §679.20(b)(1)(ii).

(2) Halibut CDQ reserve. (i) NMFS will annually withhold from IFQ allocation the proportions of the halibut catch limit that are specified in paragraph (b) of this section for use as a CDQ reserve.

(ii) Portions of the CDQ for each specified IPHC regulatory area may be allocated for the exclusive use of an eligible Western Alaska community or group of communities in accordance with a CDP approved by the Governor in consultation with the Council and approved by NMFS.

(iii) The proportions of the halibut catch limit annually withheld for the halibut CDQ program, exclusive of issued QS, and the eligible communities for which they shall be made available are as follows for each IPHC regulatory area (see Figure 15 to this part):

(A) Area 4B. In IPHC regulatory area 4B, 20 percent of the annual halibut quota shall be made available to eligible communities physically located in, or proximate to, this regulatory area.

(B) Area 4C. In IPHC regulatory area 4C, 50 percent of the halibut quota shall be made available to eligible communities physically located in IPHC regulatory area 4C.

(C) Area 4D. In IPHC regulatory area 4D, 30 percent of the annual halibut quota shall be made available to eligible communities located in, or proximate to, IPHC regulatory areas 4D and 4E.

(D) Area 4E. In IPHC regulatory area 4E, 100 percent of the halibut quota shall be made available to eligible communities located in, or proximate to, IPHC regulatory area 4E. A fishing trip limit of 10,000 lb (4.54 mt) applies to halibut CDQ harvested in IPHC regulatory area 4E through September 1.

(iv) For the purposes of this section, “proximate to” an IPHC regulatory area means within 10 nm from the point where the boundary of the IPHC regulatory area intersects land.

(3) Crab CDQ reserves. Crab CDQ reserves for crab species governed by the Crab Rationalization Program are specified at §680.40(a)(1). For Norton Sound red king crab, 7.5 percent of the guideline harvest level specified by the State of Alaska is allocated to the crab CDQ reserve.

(b)–(f) [Reserved]

(g) Non-specific CDQ reserve (applicable through December 31, 2002). Annually, NMFS will apportion 50 percent of the arrowtooth flounder CDQ and 15 percent of the “other species” CDQ for each CDQ group to a non-specific CDQ reserve. A CDQ group’s non-specific CDQ reserve must be for the exclusive use of that CDQ group. A release from the non-specific reserve to the CDQ group’s arrowtooth flounder or “other species” CDQ is a technical amendment to a community development plan as described in §679.30(g)(5). The technical amendment must be approved before harvests relying on CDQ reserve.
§ 679.32 Groundfish and halibut CDQ catch monitoring.

(a) Applicability. This section contains requirements for CDQ groups, operators of vessels, and managers of processors that harvest and/or process groundfish CDQ, including vessels equal to or greater than 60 ft (18.3 m) LOA that are halibut CDQ fishing.

(b) PSQ catch. Time and area closures required once a CDQ group has reached its salmon PSQ or crab PSQ are listed in § 679.7(d)(8). The catch of salmon or crab by vessels using other than trawl gear does not accrue to the PSQ for these species. The discard of halibut by vessels using pot or jig gear will not accrue to the halibut PSQ if this by-catch has been exempted from the halibut PSC limit under § 679.21(e)(4) in the annual specifications published in the Federal Register.

(c) Vessels eligible for groundfish and halibut CDQ fisheries. The following information must be provided by the CDQ group for all vessels that are groundfish CDQ fishing and all vessels equal to or greater than 60 ft (18.3 m) LOA that are halibut CDQ fishing.

(1) Request for approval of an eligible vessel. Prior to a vessel participating in the CDQ fishery, a CDQ group must submit to NMFS a completed request for approval of an eligible vessel as described at § 679.5(n)(4). NMFS will approve all vessels for which a completed request is submitted. Once approved, a vessel will remain eligible until December 31 of the last year in the current CDQ allocation cycle under § 679.30(d), or until the CDQ group removes the vessel from eligibility under paragraph (c)(2) of this section. A list of eligible vessels for each CDQ group will be publicly available from the Alaska Regional Office or on the NMFS website at http://alaskafisheries.noaa.gov. The CDQ group must provide a copy of the NMFS-approved vessel request to the operator of the approved vessel. The vessel operator must maintain a copy of the eligible vessel request approved by NMFS onboard the vessel at all times while harvesting, transporting, or off-loading CDQ.

(2) Removing a vessel from eligibility. A CDQ group may remove a vessel from eligibility to harvest CDQ on its behalf by advising NMFS by letter of the removal. Removal of a vessel from eligibility to harvest CDQ will be effective on the date that NMFS approves the request and notifies the CDQ group of NMFS’s approval. Upon receipt of notification of NMFS’s approval, the CDQ group must notify the operator of the vessel of the vessel’s removal from eligibility to harvest CDQ on behalf of the CDQ group.

(d) Requirements for vessels and processors. In addition to complying with the minimum observer coverage requirements at § 679.50(c)(4), operators of vessels groundfish CDQ fishing and managers of shoreside processors or stationary floating processors taking deliveries from vessels groundfish CDQ fishing must comply with the following requirements:

(i) Catcher vessels without an observer. Operators of catcher vessels less than 60 ft (18.3 m) LOA must retain all groundfish CDQ species, halibut CDQ, and salmon PSQ until they are delivered to a processor that meets the requirements of paragraph (d)(3) or (d)(4) of this section, unless retention of groundfish CDQ species is not authorized under § 679.4, discard of the groundfish CDQ species is required under subpart B of this part, or, in waters within the State of Alaska, discard is required by the State of Alaska.

(ii) Catcher vessels delivering unsorted codends. Operators of catcher vessels delivering unsorted codends to motherships must retain all CDQ and PSQ species and deliver them to a mothership that meets the requirements of paragraph (d)(4) of this section, unless retention of groundfish CDQ species is not authorized under § 679.4, discard of the groundfish CDQ species is required under subpart B of this part, or, in waters within the State of Alaska, discard is required by the State of Alaska.

(ii) Catcher vessels with observers. Operators of catcher vessels equal to or greater than 60 ft (18.3 m) LOA must comply with the following requirements:
