§ 300.104 Scientific research. 

(a) The management measures issued pursuant to the procedures at §300.111 do not apply to catches of less than 5 tons taken by any vessel for research purposes, unless otherwise indicated. 

(b) Catches taken by any vessel for research purposes will be considered as part of any catch limit. 

(c) The catch reporting procedure identified in management measures issued pursuant to the procedures at §300.111 applies whenever the catch within any 5-day reporting period exceeds 5 tons, unless more specific reporting requirements apply to the species being fished. 

(d) Any person, organization or institution planning to use a vessel for research purposes, when the estimated catch is expected to be more than 50 tons, must provide the following vessel and research notification to the Assistant Administrator at least 2 months in advance of the planned research: 

(1) Name and registration number of vessel. 

(2) Division and subarea in which research is to be carried out. 

(3) Estimated dates of entering and leaving CCAMLR Convention Area. 

(4) Purposes of research. 

(5) Fishing equipment to be used (bottom trawl, midwater trawl, longline, crab pots, other). 

(e) The following measures apply to any person planning to use any vessel for research purposes, when the estimated catch is expected to be more than 50 tons: 

(1) The person must use the CCAMLR Format for Reporting Plans for Finfish Surveys in the Convention Area when the Total Catch is Expected to be More Than 50 Tons to report the details of...
§ 300.106 Exploratory fisheries.

(a) An exploratory fishery, for purposes of this section, is a fishery that was previously defined as a new fishery under §300.105.

(b) A fishery will continue to be classified as an exploratory fishery until sufficient information is available to:

(1) Evaluate the distribution, abundance, and demography of the target species, leading to an estimate of the fishery’s potential yield.

(2) Review the fishery’s potential impacts on dependent and related species.

(3) Allow the CCAMLR Scientific Committee to formulate and provide advice to the Commission on appropriate harvest catch levels and fishing gear.

(c) The operator of any vessel engaging in an exploratory fishery must submit, by the date specified in the operator’s harvesting permit, catch, effort, and related biological, ecological, and environmental data as required by a data collection plan for the fishery formulated by the CCAMLR Scientific Committee.

(d) In addition to the requirements in §300.112, any individual planning to enter an exploratory fishery must notify the Assistant Administrator no later than 4 months in advance of the annual meeting of CCAMLR. The Assistant Administrator will not issue a permit to enter an exploratory fishery until after the requirements of §300.112 have been met and the meeting of CCAMLR, which receives and considers the notice made to the Assistant Administrator, has been concluded.
