of the borrower’s outstanding and proposed loans from RUS and all other lenders as of the end of the feasibility Forecast period (i.e. for a 5-year Forecast period, the amount of debt outstanding in year 5).

(g) The financial and statistical data are derived from RUS Form 479, "Financial and Statistical Data for Telephone Borrowers," or for initial loans, the data may be obtained from the borrower’s financial statements and other reports, and from other information supplied with the completed loan applications (see 7 CFR 1737.21 and 1737.22).

(h) When, in RUS’s opinion, the borrower’s operating experience is not adequate or the borrower’s current operations are not representative, the estimates in the feasibility study normally will be developed from state and regional standards based on the experience of RUS borrowers. These standards are included in the Borrower’s Statistical Profile (BSP), which is revised annually by RUS. If the borrower’s operating experience is not the basis for one or more per-subscriber estimates used in the feasibility study, the estimates generally may not vary from the standard by more than 20 percent to reflect the particular characteristics of the loan applicant. Any variation from the standard shall be documented.

(i) In cases where these per-subscriber standards do not represent a reasonable forecast of a particular borrower’s operations (for example, when a variation greater than 20 percent is necessary), estimates based upon a special analysis of the borrower’s projected operations shall be used. The special analysis will accompany the feasibility study.

(j) When it is reasonably expected that a subscriber, classified as a special project, may discontinue service, a second feasibility study will be prepared, for comparison purposes, omitting revenues and expenses from this subscriber.

(k) RUS may obtain and review commercially available credit reports on applicants for a loan or loan guarantee to verify income, assets, and credit history, and to determine whether there are any outstanding delinquent Federal or other debts. Such reports will also be reviewed for parties that are or propose to be joint owners of a project with a borrower.

(1) If it is determined that loan feasibility cannot be proven as described in this section, the loan application will be returned to the borrower with an explanation. A borrower whose application has been returned will have 90 working days, from the date the application was returned, to revise and resubmit its application. If a revised application is not received by RUS within the 90-day period described above, the application will be canceled and a new application will need to be submitted if the borrower wishes further consideration.

§ 1737.71 Interest rate to be considered for the purpose of assessing feasibility for loans.

(a) For purposes of determining the creditworthiness of a borrower for concurrent RUS cost-of-money and RTB loans, the Administrator shall assume that the loans, if made, would bear interest at the Treasury rate on the date of determination as described in paragraph (b) of this section. If the Treasury rate exceeds 7 percent, the interest rate used to determine eligibility for the RUS cost-of-money loan will be 7 percent.

(b) The 30-year Treasury rate will be used in all feasibility studies for loans with a final maturity of at least 30 years. A straight-line interpolation between other Treasury rates will be used to determine the rate used in feasibility studies for loans with final maturities of less than 30 years.

(c) The Treasury rate will be obtained each Tuesday, or as soon as possible thereafter, from the Federal Reserve. The rate for the current week, from the column labeled “This week" in the Federal Reserve statistical release, will be used from that Wednesday through the following Tuesday.

(d) As used in this section, the “date of determination” means the date of the feasibility study used in support of the loan recommendation.
