GPO

§ 322.11 Ports of entry.

Shipments of honeybees, honeybee germ plasm, and bees other than honeybees imported under this subpart may enter the United States only at a port of entry staffed by an APHIS inspector.[2]

§ 322.12 Risk assessment procedures for approving countries.

(a) The national government of the region wishing to export must request that we perform a risk assessment for the importation into the United States of honeybees, honeybee germ plasm, or bees other than honeybees from that region.

(b) When we receive a request, we will evaluate the science-based risks associated with such importation. Our risk assessment will be based on information provided by the exporting region, information from topical scientific literature, and, if applicable, information we gain from a site visit to the exporting region. The risk assessment will include:

(1) Identification of all bee diseases, including fungi, bacteria, viruses, mycoplasmas, and protozoa, that occur in the exporting region but not in the United States or that are listed as significant for international trade by the Office International des Epizooties (OIE);

(2) Identification of all bee parasites, including mites, that occur in the exporting region but not in the United States or that are listed as significant for international trade by the OIE;

(3) Identification of all species and subspecies of honeybees that occur in the exporting region but not in the United States or that are listed as significant for international trade by the OIE, if applicable;

(4) Identification of all pests of bee culture, such as the small hive beetle, that occur in the exporting region but not in the United States or that are listed as significant for international trade by the OIE;

(5) Evaluation of the probability of establishment, including pathway, entry, colonization, and spread potentials, of any diseases, parasites, undesirable species or subspecies of honeybees, or pests identified in accordance with paragraphs (b)(1), (2), (3), or (4) of this section;

(6) Evaluation of the potential consequences of establishment, including economic, environmental, and perceived social and political effects, of each disease, parasite, undesirable species or subspecies of honeybees, or pest identified in accordance with paragraphs (b)(1), (2), (3), or (4) of this section; and

(7) Consideration of the effectiveness of the regulatory system of the exporting region to control bee diseases, parasites, undesirable species and subspecies of honeybees, and pests that occur there and to prevent occurrences of new bee diseases, parasites, undesirable species and subspecies of honeybees, and pests.

(c) Based on the conclusions of the risk assessment, we will either:

(1) Publish in the FEDERAL REGISTER a notice of proposed rulemaking to allow honeybees, honeybee germ plasm, or bees other than honeybees to be imported into the United States from that region; or

(2) Deny the request in writing, stating the specific reasons for that action.

(d) We will publish a notice of availability of all completed risk assessments for public comment.

(Approved by the Office of Management and Budget under control number 0579–0207)

Subpart C—Importation of Restricted Organisms

§ 322.13 General requirements; restricted organisms.

(a) For the purposes of this part, the following are restricted organisms:

(1) Honeybee brood in the comb;

(2) Adult honeybees from any region other than those listed in § 322.4(a);

(3) Honeybee germ plasm from any region other than those listed in § 322.4(b); and

(4) Bees other than honeybees, in any life stage, from any region other than those listed in § 322.4(c) or any species

[2] To find out if a specific port is staffed by an APHIS inspector, or for a list of ports staffed by APHIS inspectors, contact Permit Unit, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737–1236; toll-free (877) 770–5990; fax (301) 734–8700.

of bee other than those listed in § 322.5(d)(2).

(b) Restricted organisms may be imported into the United States only by Federal, State, or university researchers for research or experimental purposes and in accordance with this part.

§ 322.14 Documentation; applying for a permit to import a restricted organism.

Any restricted organism imported into the United States must be accompanied by both a permit, in accordance with paragraph (a) of this section, and an invoice or packing list accurately indicating the complete contents of the shipment, in accordance with paragraph (b) of this section.

(a) *Permit.* You must submit a completed application for a permit to import restricted organisms at least 30 days prior to scheduling arrival of those organisms. You may import a restricted organism only if we approve your application and issue you a permit. Our procedures for reviewing permit applications are provided in § 322.15. To apply for a permit, you must supply, either on a completed PPQ Form 526 or in some other written form, the following information:[3]

(1) *Applicant information.* Your name, title, organization, address, telephone number, facsimile number, and electronic mail address (provide all that are applicable). You must also state whether you are a U.S. resident. If you are not a U.S. resident, you must also supply the name, title, organization, address, telephone number, facsimile number, and electronic mail address (provide all that are applicable) of a U.S. resident who will act as a sponsor for the permit application.

(2) *Application type.* New permit, permit renewal, or amendment to existing permit (if a renewal or amendment, provide the current permit number).

(3) *Type of movement.* Select or write "Import into the United States."

(4) *Scientific name of organism.* Genus, species, subspecies or strain, and author (if known).

(5) *Type of organism.* Select or write "Bees and/or bee germ plasm."

(6) *Taxonomic classification.* Family of restricted organisms.

(7) *Life stage(s).* Semen, preovipositional eggs, embryos, postovipositional eggs, larvae, pupae, or adults. If adult queens, please specify.

(8) Number of shipments.

(9) Number of specimens per shipment.

(10) Is the organism established in the United States?

(11) Is the organism established in the destination State?

(12) Media or species of host material accompanying the organism (*e.g.*, pollen, honey, wax, nesting material).

(13) *Source of organism (include any that apply, and list region of origin).* Supplier (provide supplier's name and address), wild collected, or reared under controlled conditions.

(14) *Method of shipment.* Airmail, express delivery (list company name).

(15) Port(s) of entry.

(16) Approximate date(s) of arrival at the port of entry.

(17) *Destination.* Provide the address of the location where the organism will be received and maintained, including building and room numbers where applicable.

(18) *Intended use (include any that apply).* Select or write "Scientific Study."

(19) Has your facility been evaluated by APHIS? If yes, list date(s) of approval. Is your facility approved for the species of bees or bee germ plasm for which you are seeking a permit?

(20) Provide your signature and the date of your signature under the following certification: "I certify that all statements and entries I have made on this document are true and accurate to the best of my knowledge and belief. I understand that any intentional false statement or misrepresentation made on this document is a violation of law and punishable by a fine of not more than $10,000, or imprisonment of not more than 5 years, or both. (18 U.S.C. 1001)." If you are required to have a sponsor for your permit application,

[3] Mail your completed application to Permit Unit, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737–1236. A PPQ Form 526 may be obtained by writing to the same address, calling toll-free (877) 770–5990, faxing your request to (301) 734–8700, or downloading the form from *http://www.aphis.usda.gov/ppq/ss/permits/pests/.*

your sponsor must also sign and date under the same certification.

(b) *Invoice.* Any restricted organism must be accompanied at the time of arrival in the United States by an invoice or packing list accurately indicating the complete contents of the shipment and the exporting region.

(Approved by the Office of Management and Budget under control number 0579–0207)

§ 322.15 APHIS review of permit applications; denial or cancellation of permits.

(a) *Review of permit applications to import restricted organisms*—(1) *Consultation.* During our review of your permit application, we may consult with any Federal officials; appropriate officials of any State, Territory, or other jurisdiction in the United States in charge of research or regulatory programs relative to bees; and any other qualified governmental or private research laboratory, institution, or individual. We will conduct these consultations to gain information on the risks associated with the importation of the restricted organisms.

(2) *Review by destination State.* We will transmit a copy of your permit application, along with our anticipated decision on the application, to the appropriate regulatory official in the destination State for review and recommendation. A State's response, which we will consider before taking final action on the permit application, may take one of the following forms:

(i) The State recommends that we issue the permit;

(ii) The State recommends that we issue the permit with specified additional conditions;

(iii) The State recommends that we deny the permit application and provides scientific, risk-based reasons supporting that recommendation; or

(iv) The State makes no recommendation, thereby concurring with our decision regarding the issuance of the permit.[4]

[4] If a State regulatory official does not respond within 20 business days, we will conclude that the State has chosen to make no recommendation regarding the issuance of the permit.

(b) *Results of review.* After a complete review of your application, we will either:

(1) Issue you a written permit with, if applicable, certain specific conditions listed for the importation of the restricted organisms you applied to import. You must initial each condition on the proposed permit and return the proposed permit conditions to the Permit Unit before we will issue you a signed valid permit; or

(2) Notify you that your application has been denied and provide reasons for the denial.

(c) *Denial of permit applications.* APHIS will deny an application for a permit to import a restricted organism regulated under this subpart when, in its opinion, such movement would involve a danger of dissemination of an exotic bee disease or parasite, or an undesirable species or subspecies of honeybee. Danger of such dissemination may be deemed to exist when:

(1) Existing safeguards against dissemination are inadequate and no adequate safeguards can be arranged; or

(2) The potential for disseminating an exotic bee disease or parasite, or an undesirable species or subspecies of honeybee, with the restricted organism outweighs the probable benefits that could be derived from the proposed movement and use of the restricted organism; or

(3) When you, as a previous permittee, failed to maintain the safeguards or otherwise observe the conditions prescribed in a previous permit and have failed to demonstrate your ability or intent to observe them in the future; or

(4) The proposed movement of the restricted organism is adverse to the conduct of an eradication, suppression, control, or regulatory program of APHIS.

(d) *Cancellation of permits.* (1) APHIS may cancel any outstanding permit whenever:

(i) We receive information subsequent to the issuance of the permit of circumstances that would constitute cause for the denial of an application for permit under paragraph (c) of this section; or

(ii) You, as the permittee, fail to maintain the safeguards or otherwise

observe the conditions specified in the permit or in any applicable regulations.

(2) Upon cancellation of a permit, you must either:

(i) Surrender all restricted organisms to an APHIS inspector; or

(ii) Destroy all restricted organisms under the supervision of an APHIS inspector.

(e) *Appealing the denial of permit applications or cancellation of permits.* If your permit application has been denied or your permit has been canceled, APHIS will promptly inform you, in writing, of the reasons for the denial or cancellation. You may appeal the decision by writing to the Administrator and providing all of the facts and reasons upon which you are relying to show that your permit application was wrongfully denied or your permit was wrongfully canceled. The Administrator will grant or deny the appeal as promptly as circumstances allow and will state, in writing, the reasons for the decision. If there is a conflict as to any material fact, you may request a hearing to resolve the conflict. Rules of practice concerning the hearing will be adopted by the Administrator.

(Approved by the Office of Management and Budget under control number 0579–0207)

§ 322.16 Packaging of shipments.

(a) Restricted organisms must be packed in a container or combination of containers that will prevent the escape of the organisms and the leakage of any contained materials. The container must be sufficiently strong to prevent it from rupturing or breaking during shipment.

(b) The outer container must be clearly marked with the contents of the shipment, *i.e.*, either "Live Bees," "Bee Germ Plasm," or "Live Bee Brood," and the name of the region of origin.

(c) Only approved packing materials may be used in a shipment of restricted organisms.

(1) The following materials are approved as packing materials: Absorbent cotton or processed cotton padding free of cottonseed; cages made of processed wood; cellulose materials; excelsior; felt; ground peat (peat moss); paper or paper products; phenolic resin foam; sawdust; sponge rubber; thread waste, twine, or cord; and vermiculite.

(2) Other materials, such as host material for the organism, soil, or other types of packing material, may be included in a container only if identified in the permit application and approved by APHIS on the permit.

§ 322.17 Mailed packages.

(a) If you import a restricted organism through the mail or through commercial express delivery, you must attach a special mailing label (APHIS Form 599), which APHIS will provide with your permit, to the package or container. The mailing label indicates that APHIS has authorized the shipment.

(b) You must address the package containing the restricted organism to the containment facility or apiary identified on the permit (post office boxes are not allowed).

(c) If the restricted organism arrives in the mail without the mailing label described in paragraph (a) of this section or addressed to a containment facility or apiary other than the one listed on the permit, an inspector will refuse to allow the organism to enter the United States.

§ 322.18 Restricted organisms in a commercial vehicle arriving at a land border port in the United States.

(a) If you import a restricted organism through a land border port in the United States by commercial vehicle (*i.e.*, automobile or truck), then the person carrying the restricted organism must present the permit required by § 322.14 and an invoice or packing slip accurately indicating the complete contents of the shipment to the inspector at the land border port.

(b) The restricted organisms must be surrendered at the port of entry and can continue on to the destination identified on the permit only by a bonded carrier (commercial express delivery).

(c) If you fail to present a copy of the permit and an invoice or packing list accurately indicating the complete contents of the shipment at the port of entry, an inspector will refuse the organism's entry to the United States or

confiscate and destroy the refused material.

(Approved by the Office of Management and Budget under control number 0579–0207)

§ 322.19 Inspection; refusal of entry.

(a) APHIS may inspect any restricted organism at the time of importation to determine if the organism meets all of the requirements of this part.

(b) If, upon inspection, any shipment fails to meet the requirements of the regulations, that shipment will be refused entry into the United States. In accordance with § 322.2(c), the inspector will offer the shipper the opportunity to immediately export any refused shipments. If the shipper declines to immediately export the shipment, we will destroy the shipment at his or her expense.

§ 322.20 Ports of entry.

A restricted organism may be imported only at a port of entry staffed by an APHIS inspector.[5] After a restricted organism has been cleared for importation at the port of entry, the organism can only be transported by a bonded commercial carrier immediately and directly from the port of entry to the containment facility or apiary identified on the permit. You may open the package containing the restricted organism only within the containment facility or apiary identified on the permit.

(Approved by the Office of Management and Budget under control number 0579–0207)

§ 322.21 Post-entry handling.

(a) Immediately following clearance at the port of entry, a restricted organism must move by a bonded commercial carrier directly to a containment facility or apiary that has been inspected and approved by APHIS.[6] We must inspect and approve the containment facility or apiary before we will issue a permit to import a restricted organism.

(b) *Inspection of premises.* Prior to issuing a permit to import restricted organisms, we will inspect the apiary or containment facility where you intend to contain the restricted organisms. In order to approve the apiary or containment facility, an inspector must determine that adequate safeguards are in place to prevent the release of diseases or parasites of bees, or of undesirable species or strains of honeybees. We will use the following criteria to determine whether adequate safeguards are in place:

(1) *Enclosed containment facilities.* (i) Will the facility's entryways, windows, and other structures, including water, air, and waste handling systems, contain the restricted organisms, parasites and pathogens, and prevent the entry of other organisms and unauthorized visitors?

(ii) Does the facility have operational and procedural safeguards in place to prevent the escape of the restricted organisms, parasites, and pathogens, and to prevent the entry of other organisms and unauthorized visitors?

(iii) Does the facility have a means of inactivating or sterilizing restricted organisms and any breeding materials, pathogens, parasites, containers, or other material?

(2) *Containment apiaries.* (i) Is the apiary located in an area devoid of indigenous bees and sufficiently isolated to prevent contact between indigenous bees and imported restricted organisms? Is the area extending from the apiary to the nearest indigenous bees constantly unsuitable for foraging individuals of the imported restricted organisms?

(ii) Does the apiary have sufficient physical barriers to prevent the entry of unauthorized visitors?

(iii) Does the apiary have operational and procedural safeguards in place to prevent the escape of the restricted organisms, parasites, and pathogens, and to prevent the entry of other organisms and unauthorized visitors?

(iv) Does the apiary have a means of inactivating or sterilizing restricted

[5] To find out if a specific port is staffed by an APHIS inspector, or for a list of ports staffed by APHIS inspectors, contact Permit Unit, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737–1236; toll-free (877) 770–5990; fax (301) 734–8700.

[6] For a list of approved facilities, or to arrange to have a facility inspected by APHIS, contact Permit Unit, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737–1236; toll-free (877) 770–5990.

organisms, and any hives, wax, pathogens, parasites, containers, or other materials?

(3) Containment apiaries for honeybees resulting from germ plasm imported from nonapproved regions.

(i) Does the apiary have sufficient physical barriers to prevent the entry of unauthorized visitors?

(ii) Are there sufficient physical barriers (*e.g.*, excluders) in hives in the apiary to prevent the escape of all adult queen and drone honeybees resulting from the germ plasm?

(iii) Does the apiary have operational and procedural safeguards in place to prevent the escape of all queen and drone honeybees resulting from the germ plasm?

(iv) Does the apiary have a means of destroying colonies of honeybees with undesirable characteristics that may result from imported germ plasm?

(c) *Holding in containment.* (1) If we issue a permit for importing restricted organisms into an approved containment facility or apiary, you may not remove or release the restricted organisms, or the progeny or germ plasm resulting from the restricted organisms, from the apiary or facility without our prior approval.

(2) You must allow us to inspect the apiary or facility and all documents associated with the importation or holding of restricted organisms at any time to determine whether safeguards are being maintained to prevent the release of the restricted organisms, their progeny and germ plasm, parasites, and pathogens.

(3) You must inform us immediately, but no later than 24 hours after detection, if restricted organisms escape from the facility

(d) *Release from containment apiary or facility.* (1) After rearing the restricted organisms in an approved containment facility or apiary through at least 4 months of active reproduction with no evidence of nonindigenous parasites or pathogens or of undesirable characteristics, you may submit a request to us for the release of the bees. The request must include:

(i) Inspection protocols;

(ii) Inspection frequencies;

(iii) Names and titles of inspectors;

(iv) Complete information, including laboratory reports, on detection of diseases and parasites in the population;

(v) Complete notes and observations on behavior, such as aggressiveness and swarming; and

(vi) Any other information or data relating to bee diseases, parasites, or adverse species or subspecies.

(2) Mail your request for release to the Permit Unit, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737–1236, or fax to (301) 734–8700.

(3) When we receive a complete request for release from containment, we will evaluate the request and determine whether the bees may be released. Our evaluation may include an environmental assessment or environmental impact statement prepared in accordance with the National Environmental Policy Act. We may conduct an additional inspection of the bees during our evaluation of the request. You will receive a written statement as soon as circumstances allow that approves or denies your request for release of the bees.

(Approved by the Office of Management and Budget under control number 0579–0207)

Subpart D—Transit of Restricted Organisms Through the United States

§ 322.22 General requirements.

(a) You may transit restricted organisms from any region through the United States to another region only in accordance with this part. For a list of restricted organisms, see § 322.13(a).

(b) You may ship restricted organisms only aboard aircraft to the United States for transit to another country.

(c) You may transload a shipment of restricted organisms only once during the shipment's entire transit through the United States and only at an airport in the continental United States. You may not transload restricted organisms in Hawaii. In Hawaii, the restricted organisms must remain on, and depart for another destination aboard, the same aircraft on which the shipment arrived at the Hawaiian airport.
